1	Introduction	1
1.1	No-Sign Parabolic Obstacle-Type Problems	4
1.1.1	Motivation	4
1.1.2	Main Results for No-Sign Parabolic Obstacle-Type Problems	7
1.1.3	Historical Review	8
1.1.4	Main Strategy	9
1.2	Boundary Estimates for Solutions of Free Boundary Problems	12
1.2.1	Estimates for Solutions to the Elliptic Obstacle Problem	12
1.2.2	Estimates for Solutions to the Two-Phase Elliptic Problem	15
1.2.3	Estimates for Solutions to the Two-Phase Parabolic Problem	20
1.2.4	Estimates Near the Initial State for Solutions to the Two-Phase Parabolic Problem	22
1.3	Appendices	25
1.3.1	Appendix A: Monotonicity Formulas	25
1.3.2	Appendix B: Auxiliary Results	25
1.3.3	Appendix C: Additional Facts	26
1.4	Notes	26
1.5	Open Problems	26
2	No-Sign Parabolic Obstacle-Type Problems	29
2.1	Statement of the Problem and Main Results	29
2.2	Optimal Regularity of Solutions	33
2.3	Useful Properties of Solutions	44
2.3.1	Nondegeneracy	44
2.3.2	Measure of $\Gamma(u)$	47
2.3.3	Convergence	48
2.3.4	Blow-Up and Blow-Down	49
2.3.5	Balanced Energy	51

2.4	Classification of the Nonnegative Global Solutions	53
2.5	Geometric Classification of the Global Solutions with No Sign Restrictions	57
2.6	Characterization of the Free Boundary Points Near Π	60
2.7	Regularity Properties of Solutions	63
2.8	Regularity Properties of the Free Boundary	70
3	Boundary Estimates for Solutions of Free Boundary Problems	73
3.1	One-Sided Estimates up to the Boundary for Solutions to the Elliptic Obstacle Problem	73
3.1.1	Statement of the Problem and Main Results	73
3.1.2	Estimates for Mixed Derivatives on the Boundary	75
3.1.3	Estimates for Pure Second Derivatives.....	80
3.2	Boundary Estimates for Solutions to the Two-Phase Elliptic Problem	85
3.2.1	Statement of the Problem and Main Result	85
3.2.2	Estimates of the Tangential Gradient Near the Boundary	86
3.2.3	Boundary Estimates of the Second Derivatives.....	89
3.3	Estimates Near the Given Boundary of the Second-Order Derivatives for Solutions to the Two-Phase Parabolic Problem	92
3.3.1	Statement of the Problem and Main Result	92
3.3.2	Lipschitz Estimate of the Normal Derivative at the Boundary Points	93
3.3.3	Boundary Estimates of the Second Derivatives.....	95
3.4	Uniform Estimates Near the Initial State for Solutions to the Two-Phase Parabolic Problem	98
3.4.1	Statement of the Problem and Main Result	98
3.4.2	Estimate of the Time Derivative	100
3.4.3	Estimates of the Second Derivatives	102
A	Monotonicity Formulas	107
A.1	C-monotonicity Formula	107
A.2	ACF-monotonicity Formula	113
A.3	W-monotonicity Formula	115
B	Auxiliary Results	123
C	Additional Facts	131
	References	137
	Index	143
