

# AMBER

*The Golden Gem  
of the Ages*

FOURTH EDITION

PATTY C. RICE, PH.D.

2006

# CONTENTS

Preface *v*

## PART I AMBER, THE GOLDEN GEM OF THE AGES I

- 1 Introduction 3
  - Amber as a Gemstone 5
    - Transparent Amber 10
    - Translucent Amber 10
    - Opaque Yellow Amber 11
    - Opaque White Amber 12
    - Earthy or Contaminated Amber 13
  - Amber as a Fossil Resin 14
  - Baltic Amber Coast Today 21
  - Summary 23

## PART II HISTORIC ASPECTS OF AMBER 25

- 2 History of Baltic Amber 27
  - Early Man and Amber 27
    - The Paleolithic Period or Old Stone Age 27
    - The Mesolithic Period 28
    - The Neolithic Period 29
  - Amber Trade During the Stone Age 36
  - Bronze Age and Iron Age Amber Trade 37
    - Hallstatt Amber 38
  - Amber Trade Routes Across Europe 39
  - Phoenician Trade in Amber 42
  - Greek Cultures and Amber 44
  - Roman Era—"Golden Age of Amber" 46
  - Amberland of the Early Balts and Its Archaeology 52
- 3 Amber Gatherers-Gathering/Mining/Production 59
  - Amber Monopoly and Guilds of the Middle Ages 59
    - The Amber Room—A Magnificent Work and Wonder 75
    - Eighteenth Century Collapse of the Amber Guilds 84
  - Historical Methods of Gathering Amber 86
  - Lithuania/ Latvian Amber Workings 106
  - Amber Production in Kaliningrad from 1947 to 1997 116

- Photo Documentation: Kaliningrad Amber Factory Mining Operation 1997 122
- Amber Craft Development in Poland 128
- Photo Documentation: Hydraulic Extraction of Amber at Wislinka Outside Gdańsk in 1997 143
- The Amber Belt of Denmark, Sweden, and the Frisian Islands 147
- German Amber Lapidaries 151
- English Amber 153
- 4 The Curious Lore of Amber 157
  - Ancient Myths 157
    - Tears of the Heliades and Other Greek Myths 157
    - The Tale of Juratė and Kastytis 160
    - The Tale of Freya and Odur 161
    - Other Folklore and Myths depicted in Amber 163
  - Powers and Symbolism of Amber 166
  - Talismanic, Amuletic, and Folk Medicine 171
  - Astrological Significance of Amber 177
  - The Names of Amber 178

### PART III DESCRIPTIVE ASPECTS OF AMBER 179

- 5 Physical, Chemical, and Optical Properties 183
  - Hardness and Tenacity (Toughness) 184
  - Specific Gravity 185
  - Optical Properties 187
    - Polarized Light 187
    - Fluorescence 187
  - Diaphaneity and Structure 188
  - Color Versus Resin Source 190
  - Solubility 190
  - Reactions to Heat 191
  - Electrical Properties 192
  - Mineralogical Classification 192
  - Chemistry 193
  - Classifications of Amber Gemstones (by CIABJO of Poland) 200
- 6 Scientific Studies of Amber 203
  - Historical Speculations on the Origin of Amber 203
  - Current Geologic Theories on the Origin of Baltic Amber 207
  - Ukrainian Amber—Part of the Baltic Formation 213
  - Bitterfeld Amber from the Baltic Region in Germany 215
  - Age of Amber 218
  - Amber deposits of Russia and Former Countries of the Soviet Union 219
  - Other Fossil Resins Associated with Baltic Amber 220

- Relationships to Baltic Amber's Botanical Origin 224  
Morphology of Amber as Found in Nature 226  
Botanical Origins of Baltic Amber and Its Botanical  
Affinity to Recent Trees 228  
Insect Inclusions in Baltic Amber 230  
Conclusions Drawn from Organic Inclusions Found  
in Baltic Amber 237  
Analysis of Baltic Amber in Archaeological Finds 241  
7 Amber Varieties—Fossil Resins Other than Baltic Succinite 243  
Cretaceous Age Amber 243  
Canadian Amber: Chemawinite or Cedarite 247  
Cretaceous Amber from the United States 250  
Cretaceous Amber from the Middle East 255  
Cretaceous Amber from Myanmar amber 257  
Tertiary Age Amber 258  
Dominican Amber from the Dominican Republic 258  
Chiapas Amber from Mexico 281  
Rumanite Amber from Romania 283  
Simeite Amber from Sicily 288  
Asian Amber 291  
Amber from Sarawak, Brunei, Malaysia 298  
Chinese Amber from Fu Shun 300  
Tertiary Amber/Fossil Resins from the United States 300  
8 Natural Resins That Resemble Amber 305  
Kauri Copal 307  
Colombian Copal 313  
East African Copals—Zanzibar 316  
West African Copals—Sierra Leone - Congo 318  
Manila Copal—Dammar Resin 319  
Other Resins Associated with the Amber and  
Varnish Industries 320  
Sandarac 320  
Mastic 321  
Frankincense 321  
Myrrh 321  
Rosin 321  
Varnish 322  
African Amber—Is It Amber, Is It Copal or  
Is It Synthetic Resin? 324  
PART IV COMMERCIAL ASPECTS OF AMBER 329  
9 Imitations of Amber and Their Discrimination 331  
The Nature of Plastics 331  
Celluloids 333

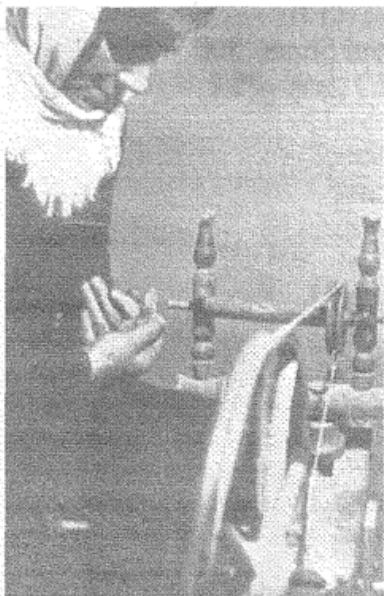

Safe Celluloid	334
Caseins	335
Phenol Formaldehyde Resins or Bakelite and Catalin	335
Bakelite	337
Catalin	338
Polystyrenes	339
Acrylic-type Resins	340
Slocum Imitation Amber	340
Thermosetting Ethenoid Plastics	341
Bernit (Bernat)	341
Polybern	342
Sun-spangle Imitations	343
General Recommendations for Detecting	
Amber Imitations	344
Glass Imitations	345
Horn Imitations	345
Reconstructed Burmese Amber	346

## 10 Preparation and Working of Amber 349

Clarification and Heat Treatment of Natural Amber	349
Commercial Methods of Treatment	351
Manufacture of Adulterated Ambers	354
Ambroid or Pressed Amber	355
Early Methods of Working Amber	360
Industrial Production of Amber Objects	362
Comments from and about Selected Artists Working	
in Amber	366
Cutting and Polishing Amber	372
Hand Methods of Working Amber	372
Mechanical Polishing	374
Drilling Amber	374
Faceting Amber	375
Amber Art Articles	375
Care of Amber Jewelry	377
Care of Beads	377
Care of Rings	377
Care of Carvings and Art Objects	378
Repair of Amber Objects	378
Removal of Chemically Formed Coatings	378
Make Your Own Polybern	379

## 11 Ancient DNA Research Using Fossils in Amber 381

## 12 Conclusions 391

Appendix 401  
Appendix A Classification System for Fossil Resins 401  
Appendix B Collections of Fossiferous Amber in Institutions  
Open to the Public 403  
Appendix C Charts for Comparing Amber with Common  
Substitutes 406  
Appendix D Amber Flow Chart: An Overview of the Extrac-  
tion and Uses of Amber 407  
Appendix E Institute, Museum, and Internet Resources 408  
Photographic References 410  
References and Bibliography 413  
Index 432-

*Dr. Brouwer, Dominican geologist, and author visit the Sierra de Agua mines in the Dominican Republic.*
