

Albrecht Fritzsche • Sascha Julian Oks  
Editors

# The Future of Engineering

Philosophical Foundations, Ethical Problems  
and Application Cases

 Springer

# Contents

<b>1</b>	<b>Translations of Technology and the Future of Engineering . . . . .</b>	<b>1</b>
	Albrecht Fritzsche and Sascha Julian Oks	
<b>2</b>	<b>“The One, the Few or the Many?”: Using Independence As a Strategy in Engineering Development and Modeling . . . . .</b>	<b>13</b>
	Zachary Pirtle, Jay Odenbaugh, and Zoe Szajnfarder	
<b>3</b>	<b>Practical Inference—A Formal Analysis . . . . .</b>	<b>33</b>
	Sjoerd Zwart, Maarten Franssen, and Peter Kroes	
<b>4</b>	<b>Intuition and Ineffability: Tacit Knowledge and Engineering Design . . . . .</b>	<b>53</b>
	Mark Thomas Young	
<b>5</b>	<b>The Engineering Knowledge Research Program . . . . .</b>	<b>69</b>
	Terry Bristol	
<b>6</b>	<b>Philosophy of Engineering and the Quest for a Novel Notion of Experimentation . . . . .</b>	<b>89</b>
	Viola Schiaffonati	
<b>7</b>	<b>Demarcating Simulation . . . . .</b>	<b>105</b>
	Nico Formanek	
<b>8</b>	<b>Three Stages of Technical Artifacts’ Life Cycle: Based on a Four Factors Theory . . . . .</b>	<b>113</b>
	Nan Wang and Bocong Li	
<b>9</b>	<b>Métis: Reconfiguring the Philosophy of Engineering . . . . .</b>	<b>123</b>
	José Aravena-Reyes	
<b>10</b>	<b>Thorstein B. Veblen’s Philosophy of Technology and Modern Capitalism . . . . .</b>	<b>137</b>
	Tuna Baskoy	

<b>11</b>	<b>Energy Technologies and Human Well-being. Using Sustainable Design for the Energy Transition</b> . . . . .	151
	Rafaela Hillerbrand and Kathrin Goldammer	
<b>12</b>	<b>Technology, Society, and Survival</b> . . . . .	177
	Erik W. Aslaksen	
<b>13</b>	<b>Manufacturing with a big M – The Grand Challenges of Engineering in Digital Societies from the Perspective of the Institute for Manufacturing at Cambridge University</b> . . . . .	191
	Andy Neely, Sarah Fell, and Albrecht Fritzsche	
<b>14</b>	<b>Fostering Subjectivity in Engineering Education: Philosophical Framework and Pedagogical Strategies</b> . . . . .	201
	Cecilia Moloney, Cecile Badenhorst, and Janna Rosales	
<b>15</b>	<b>Managing the State of the Art of Engineering: Learning from Medicine.</b> . . . . .	217
	Édison Renato Silva, Roberto Bartholo, and Domício Proença Jr	
<b>16</b>	<b>What Ethics Owes Engineering</b> . . . . .	229
	Glen Miller	
<b>17</b>	<b>New Trends in Engineering Ethics – A Japanese Perspective.</b> . . . . .	243
	Hidekazu Kanemitsu	
<b>18</b>	<b>Nietzsche, Postphenomenology, and Nihilism-Technology Relations.</b> . . . . .	257
	Nolen Gertz	
<b>19</b>	<b>Assisting Ourselves to Death – A Philosophical Reflection on Lifting a Finger with Advanced Assistive Systems</b> . . . . .	271
	Bruno Gransche	
<b>20</b>	<b>Engineering Privacy on the Scaffolds: An Existentialist Examination of Privacy by Design</b> . . . . .	291
	Kristen Psaty
