<b>Preface</b>	<b>vii</b>
<b>Introduction</b>	<b>ix</b>
<b>1 Preliminaries</b>	<b>1</b>
<b>2 Function spaces and functionals</b>	<b>9</b>
2.1 Ordered sets and lattices	9
2.2 The spaces $\mathbb{R}^X$ and $\overline{\mathbb{R}}^X$	17
2.3 Vector lattices of functions	23
2.4 Functionals	30
2.5 Daniell spaces	46
<b>3 Extension of Daniell spaces</b>	<b>49</b>
3.1 Upper functions	50
3.2 Lower functions	53
3.3 The closure of $(X, \mathcal{L}, \ell)$	55
3.4 Convergence theorems for $(X, \overline{\mathcal{L}}(\ell), \overline{\ell})$	62
3.5 Examples	69
3.6 Null functions, null sets and integrability	75
3.7 Examples	86
3.8 The induction principle	88
3.9 Functionals on $\mathbb{R}^X$	91
3.10 Summary	98
<b>4 Measure and integral</b>	<b>101</b>
4.1 Extensions of positive measure spaces	102
4.2 Examples	120
4.3 Locally integrable functions	124

4.4	$\mu$ -measurable functions	128
4.5	Product measures and Fubini's theorem	139
<b>5</b>	<b>Measures on Hausdorff spaces</b>	<b>159</b>
5.1	Regular measures	159
5.2	Measures on metric and locally compact spaces	176
5.3	The congruence invariance of the $n$ -dimensional Lebesgue measure	188
<b>6</b>	<b><math>\mathcal{L}^p</math>-spaces</b>	<b>195</b>
6.1	The structure of $\mathcal{L}^p$ -spaces	195
6.2	Uniform integrability	209
<b>7</b>	<b>Vector lattices, <math>L^p</math>-spaces</b>	<b>221</b>
7.1	Vector lattices	221
7.2	$L^p$ -spaces	235
<b>8</b>	<b>Spaces of measures</b>	<b>241</b>
8.1	The vector lattice structure and Hahn's theorem	241
8.2	Absolute continuity and the Radon-Nikodym theorem	255
<b>9</b>	<b>Elements of the theory of real-valued functions on <math>\mathbb{R}</math></b>	<b>263</b>
9.1	Functions of locally finite variation	263
9.2	Absolutely continuous functions	268
	<b>Symbol index</b>	<b>283</b>
	<b>Subject index</b>	<b>287</b>
