A CHAPMAN & HALL BOOK

CONTENTS

Preface**Chapter 1. Finite Matrices**

| | |
|-----------------------------------------------------------------------------|----|
| 1.1. Inequalities for eigenvalues and singular numbers | 1 |
| 1.2. Inequalities for convex functions | 3 |
| 1.3. Traces of powers of matrices | 4 |
| 1.4. A relation between determinants and resolvents | 6 |
| 1.5. Estimates for norms of resolvents in terms of the distance to spectrum | 8 |
| 1.6. Bounds for roots of some scalar equations | 10 |
| 1.7. Perturbations of matrices | 13 |
| 1.8. Preservation of multiplicities of eigenvalues | 16 |
| 1.9. An identity for imaginary parts of eigenvalues | 17 |
| 1.10. Additional estimates for resolvents | 18 |
| 1.11. Gerschgorin's circle theorem | 22 |
| 1.12. Cassini ovals and related results | 23 |
| 1.13. The Brauer and Perron theorems | 27 |
| 1.14. Comments to Chapter 1 | 28 |

Chapter 2. Eigenvalues of Compact Operators

| | |
|-------------------------------------------------------------------|----|
| 2.1. Banach and Hilbert spaces | 29 |
| 2.2. Linear operators | 31 |
| 2.3. Classification of spectra | 33 |
| 2.4. Compact operators in a Hilbert space | 35 |
| 2.5. Compact matrices | 37 |
| 2.6. Resolvents of Hilbert-Schmidt operators | 40 |
| 2.7. Operators with Hilbert-Schmidt powers | 41 |
| 2.8. Resolvents of Schatten -von Neumann operators | 43 |
| 2.9. Auxiliary results | 43 |
| 2.10. Equalities for eigenvalues | 47 |
| 2.11. Proofs of Theorems 2.6.1 and 2.8.1 | 48 |
| 2.12. Spectral variations | 51 |
| 2.13. Preservation of multiplicities of eigenvalues | 53 |
| 2.14. Entire Banach-valued functions and regularized determinants | 54 |
| 2.15. Comments to Chapter 2 | 57 |

Chapter 3. Some Basic Results of the Theory of Analytic Functions

| | |
|--------------------------------------|----|
| 3.1. The Rouché and Hurwitz theorems | 59 |
| 3.2. The Caratheodory inequalities | 61 |
| 3.3. Jensen's theorem | 63 |

| | |
|------------------------------------------------------------------------|-----|
| 3.4. Lower bounds for moduli of holomorphic functions | 66 |
| 3.5. Order and type of an entire function | 69 |
| 3.6. Taylor coefficients of an entire function | 71 |
| 3.7. The theorem of Weierstrass | 73 |
| 3.8. Density of zeros | 76 |
| 3.9. An estimate for canonical products in terms of counting functions | 78 |
| 3.10. The convergence exponent of zeros | 79 |
| 3.11. Hadamard's theorem | 81 |
| 3.12. The Borel transform | 83 |
| 3.13. Comments to Chapter 3 | 85 |
| | |
| Chapter 4. Polynomials | |
| 4.1. Some classical theorems | 87 |
| 4.2. Equalities for real and imaginary parts of zeros | 93 |
| 4.3. Partial sums of zeros and the counting function | 96 |
| 4.4. Sums of powers of zeros | 98 |
| 4.5. The Ostrowski type inequalities | 99 |
| 4.6. Proof of Theorem 4.5.1 | 100 |
| 4.7. Higher powers of real parts of zeros | 101 |
| 4.8. The Gerschgorin type sets for polynomials | 102 |
| 4.9. Perturbations of polynomials | 102 |
| 4.10. Proof of Theorem 4.9.1 | 105 |
| 4.11. Preservation of multiplicities | 106 |
| 4.12. Distances between zeros and critical points | 107 |
| 4.13. Partial sums of imaginary parts of zeros | 108 |
| 4.14. Functions holomorphic on a circle | 110 |
| 4.15. Comments to Chapter 4 | 112 |
| | |
| Chapter 5. Bounds for Zeros of Entire Functions | |
| 5.1. Partial sums of zeros | 114 |
| 5.2. Proof of Theorem 5.1.1 | 117 |
| 5.3. Functions represented in the root-factorial form | 119 |
| 5.4. Functions represented in the Mittag-Leffler form | 121 |
| 5.5. An additional bound for the series of absolute values of zeros | 124 |
| 5.6. Proofs of Theorems 5.5.1 and 5.5.3 | 127 |
| 5.7. Partial sums of imaginary parts of zeros | 129 |
| 5.8. Representation of e^{z^r} in the root-factorial form | 132 |
| 5.9. The generalized Cauchy theorem for entire functions | 133 |
| 5.10. The Gerschgorin type domains for entire functions | 134 |
| 5.11. The series of powers of zeros and traces of matrices | 136 |
| 5.12. Zero-free sets | 137 |
| 5.13. Taylor coefficients of some infinite-order entire functions | 139 |
| 5.14. Comments to Chapter 5 | 142 |

Chapter 6. Perturbations of Finite-Order Entire Functions

| | |
|--------------------------------------------------|-----|
| 6.1. Variations of zeros | 143 |
| 6.2. Proof of Theorem 6.1.2 | 147 |
| 6.3. Approximations by partial sums | 150 |
| 6.4. Preservation of multiplicities | 151 |
| 6.5. Distances between roots and critical points | 152 |
| 6.6. Tails of Taylor series | 154 |
| 6.7. Comments to Chapter 6 | 156 |

Chapter 7. Functions of Order Less than Two

| | |
|------------------------------------------------------------------|-----|
| 7.1. Relations between real and imaginary parts of zeros | 157 |
| 7.2. Proof of Theorem 7.1.1 | 160 |
| 7.3. Perturbations of functions of order less than two | 162 |
| 7.4. Proof of Theorem 7.3.1 | 164 |
| 7.5. Approximations by polynomials | 166 |
| 7.6. Preservation of multiplicities of in the case $\rho(f) < 2$ | 168 |
| 7.7. Comments to Chapter 7 | 171 |

Chapter 8. Exponential Type Functions

| | |
|--------------------------------------------------------|-----|
| 8.1. Application of the Borel transform | 173 |
| 8.2. The counting function | 175 |
| 8.3. The case $\alpha(f) < \infty$ | 176 |
| 8.4. Variations of roots | 179 |
| 8.5. Functions close to $\cos z$ and e^z | 181 |
| 8.6. Estimates for functions on the positive half-line | 183 |
| 8.7. Difference equations | 184 |
| 8.8. Comments to Chapter 8 | 186 |

Chapter 9. Quasipolynomials

| | |
|--------------------------------------------------------------------|-----|
| 9.1. Sums of absolute values of zeros | 187 |
| 9.2. Variations of roots | 189 |
| 9.3. Trigonometric polynomials | 192 |
| 9.4. Estimates for quasipolynomials on the positive half-line | 194 |
| 9.5. Differential equations | 194 |
| 9.6. Positive Green functions of functional differential equations | 197 |
| 9.7. Stability conditions and lower bounds for quasipolynomials | 202 |
| 9.8. Comments to Chapter 9 | 204 |

| | |
|-------------------------------------------------------------------------------------------|-----|
| Chapter 10. Transforms of Finite Order Entire Functions and Canonical Products | |
| 10.1. Comparison functions | 207 |
| 10.2. Transforms of entire functions | 210 |
| 10.3. Relations between canonical products and S_p | 215 |
| 10.4. Lower bounds for canonical products in terms of S_p | 217 |
| 10.5. Proof of Theorem 10.4.1 | 218 |
| 10.6. Canonical products and determinants | 220 |
| 10.7. Perturbations of canonical products | 222 |
| 10.8. Comments to Chapter 10 | 225 |
| | |
| Chapter 11. Polynomials With Matrix Coefficients | |
| 11.1. Partial sums of moduli of characteristic values | 227 |
| 11.2. An identity for sums of characteristic values | 230 |
| 11.3. Imaginary parts of characteristic values of polynomial pencils | 233 |
| 11.4. Perturbations of polynomial pencils | 235 |
| 11.5. Multiplicative representations of rational pencils | 238 |
| 11.6. The Cauchy type theorem for polynomial pencils | 243 |
| 11.7. The Gerschgorin type sets for polynomial pencils | 244 |
| 11.8. Estimates for rational matrix functions | 245 |
| 11.9. Coupled systems of polynomial equations | 249 |
| 11.10. Vector difference equations | 251 |
| 11.11. Comments to Chapter 11 | 253 |
| | |
| Chapter 12. Entire Matrix-Valued Functions | |
| 12.1. Preliminaries | 255 |
| 12.2. Partial sums of moduli of characteristic values | 257 |
| 12.3. Proof of Theorem 12.2.1 | 260 |
| 12.4. Imaginary parts of characteristic values of entire pencils | 263 |
| 12.5. Variations of characteristic values of entire pencils | 265 |
| 12.6. Proof of Theorem 12.5.1 | 269 |
| 12.7. An identity for powers of characteristic values | 271 |
| 12.8. Multiplicative representations of meromorphic matrix functions | 272 |
| 12.9. Estimates for meromorphic matrix functions | 273 |
| 12.10. Zero free domains | 277 |
| 12.11. Matrix-valued functions of a matrix argument | 278 |
| 12.12. Green's functions of differential equations | 282 |
| 12.13. Comments to Chapter 12 | 284 |
| | |
| Bibliography | 287 |
| List of Main Symbols | 297 |
| Index | 299 |
