

# Radial Basis Functions: Theory and Implementations

M. D. BUHMANN

*University of Giessen*

# Contents

---

<i>Preface</i>	<i>page ix</i>
<b>1 Introduction</b>	<b>1</b>
1.1 Radial basis functions	2
1.2 Applications	5
1.3 Contents of the book	8
<b>2 Summary of methods and applications</b>	<b>11</b>
2.1 Invertibility of interpolation matrices	11
2.2 Convergence analysis	16
2.3 Interpolation and convergence	23
2.4 Applications to PDEs	29
<b>3 General methods for approximation and interpolation</b>	<b>36</b>
3.1 Polynomial schemes	37
3.2 Piecewise polynomials	41
3.3 General nonpolynomial methods	45
<b>4 Radial basis function approximation on infinite grids</b>	<b>48</b>
4.1 Existence of interpolants	49
4.2 Convergence analysis	65
4.3 Numerical properties of the interpolation linear system	89
4.4 Convergence with respect to parameters in the radial functions	95
<b>5 Radial basis functions on scattered data</b>	<b>99</b>
5.1 Nonsingularity of interpolation matrices	100
5.2 Convergence analysis	105
5.3 Norm estimates and condition numbers of interpolation matrices	136

<b>6</b>	<b>Radial basis functions with compact support</b>	147
6.1	Introduction	147
6.2	Wendland's functions	150
6.3	Another class of radial basis functions with compact support	153
6.4	Convergence	159
6.5	A unified class	162
<b>7</b>	<b>Implementations</b>	163
7.1	Introduction	164
7.2	The BFGP algorithm and the new Krylov method	167
7.3	The fast multipole algorithm	183
7.4	Preconditioning techniques	188
<b>8</b>	<b>Least squares methods</b>	196
8.1	Introduction to least squares	196
8.2	Approximation order results	199
8.3	Discrete least squares	201
8.4	Implementations	207
8.5	Neural network applications	208
<b>9</b>	<b>Wavelet methods with radial basis functions</b>	209
9.1	Introduction to wavelets and prewavelets	209
9.2	Basic definitions and constructions	212
9.3	Multiresolution analysis and refinement	214
9.4	Special constructions	226
<b>10</b>	<b>Further results and open problems</b>	231
10.1	Further results	231
10.2	Open problems	236
	<b>Appendix: some essentials on Fourier transforms</b>	240
	<i>Commentary on the Bibliography</i>	243
	<i>Bibliography</i>	246
	<i>Index</i>	258
