## Contents

List of Figures *ix*

Preface *xi*

About the Companion Website *xv*

### Part I Fitting *1*

- 1 Elementary Data Analysis** *3*
- 1.1 Variables and Observations *3*
- 1.2 Summary Statistics *4*
- 1.3 Correlation *6*
- 1.4 Regression *10*
- 1.5 Computing the Regression Line *12*
- 1.6 Multiple Regression *16*
- 1.7 Exercises *18*
  
- 2 Matrix Representation** *21*
- 2.1 Systems of Equations *21*
- 2.2 Matrix Algebra Basics *23*
- 2.3 Rules of Matrix Algebra *26*
- 2.4 Partitioned Matrices *27*
- 2.5 Exercises *28*
  
- 3 Solving the Matrix Equation** *31*
- 3.1 Matrix Inversion *31*
- 3.2 Determinant and Adjoint *34*
- 3.3 Transposes and Products *37*
- 3.4 Cramer's Rule *38*
- 3.5 Partitioning and Inversion *39*
- 3.6 A Note on Computation *41*
- 3.7 Exercises *43*
  
- 4 The Least Squares Solution** *47*
- 4.1 Linear Dependence and Rank *47*
- 4.2 The General Linear Regression *50*

- 4.3 Definite Matrices 52
- 4.4 Matrix Calculus 56
- 4.5 Goodness of Fit 57
- 4.6 Exercises 59

## Part II Modelling 63

- 5 Probability Distributions 65**
  - 5.1 A Random Experiment 65
  - 5.2 Properties of the Normal Distribution 68
  - 5.3 Expected Values 72
  - 5.4 Discrete Random Variables 75
  - 5.5 Exercises 80
  
- 6 More on Distributions 83**
  - 6.1 Random Vectors 83
  - 6.2 The Multivariate Normal Distribution 84
  - 6.3 Other Continuous Distributions 87
  - 6.4 Moments 90
  - 6.5 Conditional Distributions 92
  - 6.6 Exercises 94
  
- 7 The Classical Regression Model 97**
  - 7.1 The Classical Assumptions 97
  - 7.2 The Model 99
  - 7.3 Properties of Least Squares 101
  - 7.4 The Projection Matrices 103
  - 7.5 The Trace 104
  - 7.6 Exercises 106
  
- 8 The Gauss-Markov Theorem 109**
  - 8.1 A Simple Example 109
  - 8.2 Efficiency in the General Model 111
  - 8.3 Failure of the Assumptions 113
  - 8.4 Generalized Least Squares 114
  - 8.5 Weighted Least Squares 116
  - 8.6 Exercises 118

## Part III Testing 121

- 9 Eigenvalues and Eigenvectors 123**
  - 9.1 The Characteristic Equation 123
  - 9.2 Complex Roots 124
  - 9.3 Eigenvectors 126
  - 9.4 Diagonalization 128

9.5	Other Properties	130
9.6	An Interesting Result	131
9.7	Exercises	133
<b>10</b>	<b>The Gaussian Regression Model</b>	<b>135</b>
10.1	Testing Hypotheses	135
10.2	Idempotent Quadratic Forms	137
10.3	Confidence Regions	140
10.4	$t$ Statistics	141
10.5	Tests of Linear Restrictions	144
10.6	Constrained Least Squares	146
10.7	Exercises	149
<b>11</b>	<b>Partitioning and Specification</b>	<b>153</b>
11.1	The Partitioned Regression	153
11.2	Frisch-Waugh-Lovell Theorem	155
11.3	Misspecification Analysis	156
11.4	Specification Testing	159
11.5	Stability Analysis	160
11.6	Prediction Tests	162
11.7	Exercises	163
<b>Part IV Extensions</b> 167		
<b>12</b>	<b>Random Regressors</b>	<b>169</b>
12.1	Conditional Probability	169
12.2	Conditional Expectations	170
12.3	Statistical Models Contrasted	174
12.4	The Statistical Assumptions	176
12.5	Properties of OLS	178
12.6	The Gaussian Model	182
12.7	Exercises	183
<b>13</b>	<b>Introduction to Asymptotics</b>	<b>187</b>
13.1	The Law of Large Numbers	187
13.2	Consistent Estimation	192
13.3	The Central Limit Theorem	195
13.4	Asymptotic Normality	198
13.5	Multiple Regression	201
13.6	Exercises	203
<b>14</b>	<b>Asymptotic Estimation Theory</b>	<b>207</b>
14.1	Large Sample Efficiency	207
14.2	Instrumental Variables	208
14.3	Maximum Likelihood	210
14.4	Gaussian ML	213

14.5	Properties of ML Estimators	214
14.6	Likelihood Inference	216
14.7	Exercises	218

**Part V Appendices 221**

<b>A</b>	<b>The Binomial Coefficients</b>	<b>223</b>
<b>B</b>	<b>The Exponential Function</b>	<b>225</b>
<b>C</b>	<b>Essential Calculus</b>	<b>227</b>
<b>D</b>	<b>The Generalized Inverse</b>	<b>229</b>
