

Contributor Details	v
Foreword from Prof Tina Overton	1
1. Introduction to the <i>Festschrift</i> Michael K. Seery and Claire Mc Donnell	5
2. A framework to evaluate the transition to undergraduate studies in chemistry Kristy L. Turner	9
3. Nurturing reflection in science foundation year undergraduate students David Read, Stephen M. Barnes, Julie Hyde and James S. Wright	23
4. Integration of technology in the chemistry classroom and laboratory Barry J. Ryan	39
5. Developing problem-solving skills in physical chemistry Elizabeth Yuriev, Sabrina Basal, and Kimberly Vo	55
6. A pre-arrival summer school to solve the maths problem in chemistry Dudley E. Shallcross	77
7. Peer instruction as a flexible, scalable, active learning approach in higher education Simon J. Lancaster, Dennis F. Cook and William J. Massingberd-Mundy	89
8. Collaborative, scenario-based, open-ended, problem-solving tasks in chemistry Gwendolyn Lawrie, Kelly E. Matthews and Lawrence Gahan	105
9. Context- and problem-based learning in chemistry in higher education Dylan P. Williams	123
10. Approaches to context-based learning in higher education chemistry Christine M. O'Connor	137
11. Developing inquiring minds through learning chemistry Natalie M. Rowley	151
12. Diagnosing and addressing the issues faced when students learn stereochemistry Nimesh Mistry	165
13. Using PeerWise to support the transition to higher education Suzanne Fergus	181
14. Student-led interviews to develop employability skills James W. Gaynor	195
15. Implementing community engaged learning with chemistry undergraduates Claire Mc Donnell and Vanessa L. Murphy	209

16. Implementing inquiry-based learning activities in chemistry education Jane Essex	225
17. A sustainable peer assisted learning scheme for chemistry undergraduates Gita Sedghi	237
18. Developing business and employability skills for undergraduate chemists Christopher M. Pask and Samantha L. Pugh	249
19. Undergraduate screencast presentations with self-, peer-, and tutor-assessment Katherine J. Haxton	265
20. Computational thinking in the chemical sciences curriculum Daniel C. Southam and Brenda M. Rohl	283
21. Student-led research groups for supporting education research projects Jenny L. Slaughter and Lynne Bianchi	301
22. Designing online pre-laboratory activities for chemistry undergraduate laboratories Dino Spagnoli, Cara Rummey, Nikki Y. T. Man, Siobhán S. Wills, and Tristan D. Clemons	315
23. Developing scientific reporting skills of early undergraduate chemistry students Natalie J. Capel, Laura M. Hancock, Katherine J. Haxton, Martin J. Hollamby, Richard H. Jones, Daniela Plana and David J. McGarvey	333
24. Teaching and assessing technical competency in the chemistry laboratory Michael K. Seery, Hendra Y. Agustian and Thomas O. Lambert	349
25. Overturning a laboratory course to develop 21st century skills Angela Ziebell, Stephen R. George-Williams, Stephen M. Danczak, Jared C. Ogunde, Michelle A. Hill, Katherine Fernandez, Mahbub Sarkar, Christopher D. Thompson and Tina L. Overton	363
26. Introducing elements of inquiry into undergraduate chemistry laboratories Patrick I. T. Thomson, Lauren McShannon and Samantha Owens	377
27. Developing student expertise in scientific inquiry Jennifer A. J. Burnham	391
28. Design of a three year laboratory programme for international delivery Julie Hyde	405
29. Working with graduate teaching assistants to enhance chemistry laboratory teaching Aishling Flaherty, Tina L. Overton, Anne O'Dwyer, Patricia Mannix-McNamara and J. J. Leahy	421
30. Developing reflective practice in graduate teaching assistants Christopher A. Randles	435
