

Contents

1	Cubic Forms Over Local Fields	1
1.1	The Hasse Principle	2
1.2	Systems of Equations Over Finite Fields	6
1.3	Solubility Over Local Fields.....	13
1.4	Local Densities	19
2	Waring's Problem for Cubes	25
2.1	Weyl Differencing.....	29
2.2	The Asymptotic Formula	40
2.3	Analysis of the Singular Series	48
3	Cubic Forms via Weyl Differencing	57
3.1	Cubic Forms in Many Variables	58
3.2	The Minor Arcs	66
3.3	The Major Arcs	79
4	Norm Forms Over Number Fields	89
4.1	Background on Algebraic Number Theory	92
4.2	The Circle Method Over Number Fields.....	96
4.3	Singular Integral	103
4.4	Singular Series	107
5	Diagonal Cubic Forms Over Function Fields	113
5.1	Background on Function Fields	115
5.2	The Circle Method	124
5.3	The Major Arcs and the Asymptotic Formula	131
6	Lines on Cubic Hypersurfaces	141
6.1	Transition to Counting Functions	145
6.2	Dimension and Irreducibility via the Circle Method	148
6.3	Singular Locus via the Circle Method	151
