<b>1</b>	<b>Introduction and Main Results</b> .....	<b>1</b>
1.1	A Historical Perspective of Weyl's Law on the Asymptotics of Eigenvalues .....	1
1.1.1	The Kac Problem .....	1
1.1.2	Isospectral Manifolds.....	3
1.2	Spectral Analysis of the Realization of the Hypoelliptic Robin Problem .....	4
1.2.1	Formulation of the Hypoelliptic Robin Problem .....	4
1.2.2	Spectral Properties of the Closed Realization $\mathfrak{A}_p$ .....	8
1.3	Analytic Semigroups of the Hypoelliptic Robin Problem.....	10
1.4	Heat Green Kernel of Chisato Iwasaki .....	14
1.4.1	The C. Iwasaki Method.....	15
1.4.2	Our Roundabout Course.....	15
1.5	Trace Formulas for the Heat Green Kernel .....	16
1.6	Model Cases on the Half Axis $\mathbf{R}_+$ .....	19
1.6.1	The Neumann Case .....	19
1.6.2	The Dirichlet Case .....	20
1.6.3	The Generalized Robin Case .....	22
1.7	Outline of the Contents .....	22
1.7.1	Part I: Functional Analytic Approach to Heat Operators .....	22
1.7.2	Part II: Pseudo-Differential Operators and Elliptic Boundary Value Problems .....	23
1.7.3	Part III: Analytic Semigroup Approach to Heat Operators .....	29
1.7.4	Part IV: The Fundamental Solution for the Cauchy Problem .....	31
1.7.5	Part V: Symbolic Calculus for Dirichlet, Neumann and Regular Robin Problems .....	33
1.7.6	Part VI: Transport Equations and Trace Formulas on the Half Space.....	34

1.7.7	Part VII: Heat Kernel Asymptotics for Dirichlet, Neumann and Regular Robin Problems .....	36
1.7.8	Part VIII: Heat Kernel Asymptotics for the Hypoelliptic Robin Problem .....	39
1.7.9	Part IX: Appendices .....	41

## Part I Functional Analytic Approach to Heat Operators

<b>2</b>	<b>Preliminaries from Manifold Theory</b> .....	45
2.1	Manifolds and Submanifolds .....	46
2.1.1	Manifolds with Boundary .....	48
2.2	Volume Densities and Orientation .....	48
2.3	Vector Bundles .....	49
2.4	Differential Operators and Ellipticity .....	51
2.5	Distance Functions .....	54
2.6	Normal Derivatives Near the Boundary .....	55
2.7	Green's Formula .....	55
2.8	The Geometry of Submanifolds .....	58
<b>3</b>	<b>Finite Double-Norm and Trace-Class Operators on a Hilbert Space</b> .....	63
3.1	Operators of Finite Double-Norm on a Hilbert Space .....	63
3.2	Operators of Trace-Class on a Hilbert Space .....	68
3.3	Hilbert–Schmidt Kernels .....	70
<b>4</b>	<b>Hilbert–Schmidt and Trace-Class Operators on a Manifold</b> .....	77
4.1	The Hilbert Space $L^2(M)$ .....	77
4.2	The Hilbert Space $L^2(\mathcal{X}(M)) = L^2(M; T(M))$ .....	78
4.3	Divergence and Gradient Vector Fields .....	80
4.4	The Hilbert Space $L^2(\mathcal{X}^*(M)) = L^2(M; T^*(M))$ .....	84
4.5	The Sobolev Space $H^s(M)$ .....	85
4.6	Hilbert–Schmidt Operators on a Manifold .....	87
4.7	Trace-Class Operators on a Manifold .....	89
<b>5</b>	<b>Analytic Semigroups via Dunford Integrals</b> .....	95
5.1	Analytic Semigroups via the Cauchy Integral .....	95
5.2	Generation Theorem for Analytic Semigroups .....	100

## Part II Pseudo-Differential Operators and Elliptic Boundary Value Problems

<b>6</b>	<b><math>L^p</math> Theory of Pseudo-Differential Operators</b> .....	111
6.1	Function Spaces .....	112
6.1.1	Hölder Spaces .....	112
6.1.2	$L^p$ Spaces .....	113
6.1.3	Fourier Transforms .....	114
6.1.4	Distributions .....	117

6.1.5	Generalized Sobolev Spaces or Bessel Potential Spaces .....	124
6.1.6	Besov Spaces .....	126
6.1.7	Bessel Potential and Besov Spaces .....	128
6.1.8	Sobolev's Imbedding Theorems .....	130
6.1.9	The Rellich–Kondrachov Theorem .....	131
6.2	Seeley's Extension Theorem.....	132
6.3	Trace Theorems .....	133
6.3.1	Sectional Traces .....	136
6.3.2	Jump Formulas.....	137
6.4	Fourier Integral Operators .....	138
6.4.1	Symbol Classes .....	138
6.4.2	Phase Functions.....	141
6.4.3	Oscillatory Integrals .....	142
6.4.4	Definitions and Basic Properties of Fourier Integral Operators .....	144
6.5	Pseudo-Differential Operators .....	145
6.5.1	Definitions and Basic Properties of Pseudo-Differential Operators .....	146
6.5.2	$L^p$ Boundedness of Pseudo-Differential Operators.....	153
6.5.3	Definition of Pseudo-Differential Operators on a Manifold .....	154
6.5.4	Hypoelliptic Pseudo-Differential Operators .....	157
6.5.5	Distribution Kernel of Pseudo-Differential Operators ....	158
6.6	Elliptic Pseudo-Differential Operators and Their Indices .....	160
6.6.1	Pseudo-Differential Operators on Sobolev Spaces.....	160
6.6.2	The Index of an Elliptic Pseudo-Differential Operator ...	163
<b>7</b>	<b>Elliptic Boundary Value Problems on a Manifold .....</b>	<b>169</b>
7.1	The Shapiro–Lopatinskii Ellipticity Condition .....	170
7.2	The Fundamental Theorem for Elliptic Boundary Value Problems .....	175
7.3	Reduction to the Boundary via the Calderón Projection .....	176
7.4	Eigenvalue Problems for Elliptic Equations of Second Order .....	178
<b>8</b>	<b><math>L^p</math> Theory of Elliptic Boundary Value Problems .....</b>	<b>183</b>
8.1	Classical Potentials and Pseudo-Differential Operators .....	185
8.1.1	Single and Double Layer Potentials .....	186
8.1.2	The Green Representation Formula via Jump Formulas.....	187
8.1.3	Volume and Surface Potentials via Jump Formulas .....	188
8.2	Dirichlet Problem .....	191
8.2.1	Volume and Surface Potentials.....	191
8.2.2	Uniqueness Theorem for the Dirichlet Problem .....	193
8.2.3	Poisson Kernel for the Dirichlet Problem .....	194
8.2.4	Unique Solvability for the Dirichlet Problem .....	195

8.3	Unique Solvability for the Neumann Problem .....	196
8.4	Formulation of the Boundary Value Problem .....	197
8.5	Standard Reduction to the Boundary .....	200
8.6	Hypoellipticity of the Fredholm Boundary Operator $T$ .....	204
	8.6.1 Hypoellipticity of the Adjoint Fredholm Boundary Operator $T^*$ .....	210
8.7	Standard Reduction to the Boundary Revisited .....	211
<b>9</b>	<b>Boutet de Monvel Calculus</b> .....	217
9.1	The Function Spaces $H$ , $H^+$ and $H^-$ .....	219
9.2	Transmission Property of Pseudo-Differential Operators .....	224
9.3	Trace, Potential and Singular Green Operators on $\mathbf{R}_+^n$ .....	232
	9.3.1 Potential Operators on $\mathbf{R}_+^n$ .....	233
	9.3.2 Trace Operators on $\mathbf{R}_+^n$ .....	235
	9.3.3 Singular Green Operators on $\mathbf{R}_+^n$ .....	239
	9.3.4 Boundary Operators on $\mathbf{R}^{n-1}$ .....	244
9.4	Boundary Value Problems via Boutet de Monvel Calculus .....	246
	9.4.1 A Modified Boundary Space $B_*^{s-1-1/p,p}(\partial\Omega)$ .....	246
9.5	Index Formula of Agranovič–Dynin Type .....	249
9.6	Index Formula for the Operator $\mathfrak{A}_p$ .....	255
<b>10</b>	<b>Pseudo-Differential Operator Approach to Agmon’s Method</b> .....	259
10.1	The Dirichlet Problem for Agmon’s Method .....	264
	10.1.1 Symbol of the Differential Operator $\tilde{\Lambda}(\theta)$ on $\Omega \times S$ .....	264
10.2	Special Reduction to the Boundary $\partial\Omega \times S$ .....	267
10.3	Symbolic Calculus on $\partial\Omega \times S$ .....	269
	10.3.1 Symbols of $\tilde{T}(\theta)$ for the Differential Operator $\tilde{\Lambda}_0(\theta)$ ....	269
	10.3.2 Hypoellipticity of $\tilde{T}(\theta)$ for the Differential Operator $\tilde{\Lambda}(\theta)$ .....	272
10.4	Proof of Theorem 10.1, Part (i) .....	277
10.5	Proof of Theorem 10.1, Part (ii) .....	279
<b>Part III Analytic Semigroup Approach to Heat Operators</b>		
<b>11</b>	<b>Generation Theorem for Analytic Semigroups via Agmon’s Method</b> .....	285
11.1	Analytic Semigroups in the $L^p$ Topology .....	288
11.2	A Priori Estimates for the Closed Operator $\mathfrak{A}_p$ .....	290
	11.2.1 Proof of Theorem 11.2 .....	293
11.3	Proof of Theorem 11.4 .....	299
<b>12</b>	<b>Hypoelliptic Robin Problems via Boutet de Monvel Calculus</b> .....	303
12.1	Formulation of the Problem .....	303
12.2	Asymptotic Eigenvalue Distribution for the Robin Problem (12.3) .....	306
	12.2.1 The Heat Asymptotics for the Robin Problem (12.3) .....	308

12.2.2	Outline of Chap. 12 .....	310
12.3	Formulation of the Homogeneous Robin Problem .....	312
12.4	Special Reduction to the Boundary .....	318
12.5	Regularity Theorem for the Robin Problem (12.14) .....	323
12.6	Uniqueness Theorem for the Robin Problem (12.14) .....	326
12.7	The Neumann Problem (12.13) via Boutet de Monvel Calculus ...	327
12.8	Representation Formula of the Resolvent via Boutet de Monvel Calculus .....	332
12.9	Proof of Theorem 12.3 via Boutet de Monvel Calculus .....	336
12.9.1	The Mapping Property of the Adjoint Operator $\mathcal{G}^*$ .....	336
12.9.2	End of Proof of Theorem 12.3 .....	338
<b>13</b>	<b>Distribution Kernel of Analytic Semigroups in the Hypoelliptic Case .....</b>	<b>341</b>
13.1	Distribution Kernel via the Riesz–Markov Representation Theorem .....	343
13.2	Distribution Kernel via the Schwartz Kernel Theorem .....	346
13.3	Heat Green Kernel due to Chisato Iwasaki .....	348
13.3.1	Analytic Semigroups in the Topology of Uniform Convergence .....	351
 <b>Part IV The Fundamental Solution for the Cauchy Problem</b>		
<b>14</b>	<b>The Cauchy Problem for the Heat Operator on <math>\mathbb{R}^n</math> .....</b>	<b>357</b>
14.1	Oscillatory Integrals Revisited .....	360
14.2	Pseudo-Differential Operators and Multi Product Symbols .....	368
14.3	Construction of the Fundamental Solution .....	371
14.4	Distribution Kernel of the Fundamental Solution .....	379
<b>15</b>	<b>Fundamental Solution Operator for the Cauchy Problem on a Manifold .....</b>	<b>383</b>
15.1	The Fundamental Solution Operator on a Manifold .....	384
15.2	Trace Formulas for the Fundamental Solution Operator on a Manifold .....	390
 <b>Part V Symbolic Calculus for Dirichlet, Neumann and Regular Robin Problems</b>		
<b>16</b>	<b>Symbolic Calculus Near the Boundary .....</b>	<b>403</b>
16.1	Symbolic Calculus, Part (i) .....	405
16.2	Symbolic Calculus, Part (ii) .....	408
<b>17</b>	<b>Analytic Version of Weyl Bases for the Heat Kernel on the Half Axis .....</b>	<b>413</b>
17.1	Symbol Function Groups for the Dirichlet and Neumann Problems .....	415
17.2	Symbol Function Group for the Regular Robin Problem .....	416

17.3	Symbol Function Groups for the Generalized Regular Robin Problem .....	418
17.4	Symbol Function Groups for the Hypoelliptic Robin Problem ....	422
17.5	Pseudo-Differential Operators via the Weyl–Hörmander Calculus.....	423
17.6	Trace Theorem in terms of the Weyl–Hörmander Calculus .....	426
<b>18</b>	<b>Symbolic Calculus for Boundary Value Problems on a Manifold .....</b>	<b>429</b>
18.1	The Symbol of the Laplace–Beltrami Operator Near the Boundary .....	430
18.2	Transport Equations Near the Boundary .....	442
18.3	Remarks on the Riemannian Metric Near the Boundary .....	446
 <b>Part VI Transport Equations and Trace Formulas on the Half Space</b>		
<b>19</b>	<b>Transport Equations via the Weyl–Hörmander Calculus.....</b>	<b>451</b>
19.1	The Dirichlet Case .....	453
19.1.1	Verification of the Transport Equation (D) .....	456
19.2	The Neumann Case.....	457
19.2.1	Verification of the Transport Equation (N) .....	460
19.3	The Regular Robin Case .....	461
19.3.1	Verification of the Transport Equation (R) .....	464
19.4	The Generalized Regular Robin Case .....	466
19.4.1	Verification of the Transport Equation (G) .....	469
19.5	The Hypoelliptic Robin Case .....	470
<b>20</b>	<b>Several Trace Formulas for Auxiliary Operators on the Half Space .....</b>	<b>477</b>
20.1	The Operators $W_{0,0}(t)$ , $W_{1,0}(t)$ , $K_1(t)$ and $K_2(t)$ on $\mathbf{R}_+^n$ .....	478
20.2	Trace Formula for the Operator $W_{0,0}(t)$ on a bounded domain $\Omega$ .....	482
20.3	Trace Formulas for Three Operators on a Bounded Domain $\Omega$ .....	486
20.3.1	The Operator $t A(x') W_{1,0}(t)$ .....	486
20.3.2	The Operator $2t^2 B(x', D_{x'}) W_{1,0}(t)$ .....	487
20.3.3	The Operator $2t x_n B(x', D_{x'}) W_{0,0}(t)$ .....	490
20.4	Trace Formula for the Operator $K_1(t)$ on a bounded domain $\Omega$ .....	491
20.5	List of Auxiliary Heat Kernels: $W_{0,0}(t)$ , $K_1(t)$ and $K_2(t)$ .....	492
 <b>Part VII Heat Kernel Asymptotics for Dirichlet, Neumann and Regular Robin Problems</b>		
<b>21</b>	<b>Heat Kernel Asymptotics for the Dirichlet Problem .....</b>	<b>497</b>
21.1	The Compensating Operator $W_D(t)$ for the Dirichlet Problem ....	501
21.2	Trace Formula for the Compensating Operator $W_D(t)$ .....	503

21.3	The Compensating Term $V_D(t)$ for the Dirichlet Problem .....	509
21.4	List of Dirichlet Heat Kernels: $W_D(t)$ and $V_D(t)$ .....	515
<b>22</b>	<b>Heat Kernel Asymptotics for the Neumann Problem</b> .....	<b>517</b>
22.1	The Compensating Operator $W_N(t)$ for the Neumann Problem ...	519
22.2	Trace Formula for the Compensating Operator $W_N(t)$ .....	521
22.3	The Compensating Term $V_N(t)$ for the Neumann Problem .....	526
22.4	List of Neumann Heat Kernels: $W_N(t)$ and $V_N(t)$ .....	532
<b>23</b>	<b>Heat Kernel Asymptotics for the Regular Robin Problem</b> .....	<b>535</b>
23.1	The Compensating Operator $W_R(t; b)$ for the Regular Robin Problem .....	538
23.2	Trace Formula for the Compensating Operator $W_R(t; b)$ .....	540
23.3	The Compensating Term $V_R(t; b)$ for the Regular Robin Problem .....	548
23.4	List of Regular Robin Heat Kernels: $W_R(t; b)$ and $V_R(t; b)$ .....	554
<b>24</b>	<b>Heat Kernel Asymptotics for the Generalized Regular Robin Problem</b> .....	<b>557</b>
24.1	Compensating Operator $W_G(t; a, b)$ for the Generalized Robin Problem .....	560
24.2	The Compensating Term $V_G(t; a, b)$ for the Generalized Robin Problem .....	563
24.3	List of Generalized Robin Heat Kernels: $W_G(t; a, b)$ and $V_G(t; a, b)$ .....	566
 <b>Part VIII Heat Kernel Asymptotics for the Hypoelliptic Robin Problem</b>		
<b>25</b>	<b>Heat Kernel Asymptotics for the Hypoelliptic Robin Problem</b> .....	<b>571</b>
25.1	The Compensating Operator $W_S(t; a, b)$ in the Hypoelliptic Case .....	574
25.1.1	Verification of the Transport Equation (S).....	575
25.2	Trace Formulas for the Compensating Operator $W_S(t; a, b)$ .....	578
25.3	Proof of the Trace Formulas for the Operator $W_S(t; a, b)$ .....	581
25.4	The Compensating Term $V_S(t; a, b)$ in the Hypoelliptic Case .....	592
25.5	The Regular Robin and Dirichlet Problems .....	600
25.6	List of Hypoelliptic Robin Heat Kernels: $W_S(t; a, b)$ and $V_S(t; a, b)$ .....	603
<b>26</b>	<b>Examples in the Plane <math>\mathbb{R}^2</math></b> .....	<b>605</b>
<b>27</b>	<b>Concluding Remarks</b> .....	<b>609</b>

<b>A</b>	<b>Integral Formulas</b> .....	613
<b>B</b>	<b>An Elementary Formula for the Fourier Transform</b> .....	615
<b>C</b>	<b>Asymptotic Behaviors of Some Symbol Functions of Negative Order</b> .....	617
	<b>Bibliography</b> .....	623
	<b>Index</b> .....	633
