Chapter 1. Introduction	1
1.1. Conventions	3
1.2. Some corollaries	3
1.3. The role of carrier graphs	5
1.4. Wide product regions are unknotted	6
1.5. The structure of strong limits	7
1.6. Minimizing simplicial ruled surfaces	8
1.7. Plan of the paper	10
1.8. Acknowledgments	10
Chapter 2. An outline of the proof	11
Chapter 3. Some topology	17
3.1. Interval bundles	17
3.2. Fibers	18
3.3. Compact cores and ends	18
3.4. Compression bodies	20
Chapter 4. Negatively curved manifolds	23
4.1. Thin-thick decomposition	23
4.2. Distances rel the thin part	24
4.3. Ends of negatively curved 3-manifolds	26
4.4. Geometry of the convex core boundary	28
4.5. Covering maps	36
Chapter 5. Simplicial ruled surfaces	39
5.1. Ruled triangles	39
5.2. Δ -complexes with $CAT(\kappa^+)$ -triangles	40
5.3. Presimplicial ruled surfaces	43
5.4. Simplicial ruled surfaces	49
5.5. Bounded diameter lemmas	51
5.6. Minimizing simplicial ruled surfaces	57
5.7. Constructions	61
5.8. Filling theorems	69
5.9. Ruled surfaces in link complements	71
Chapter 6. Wide product regions	73
6.1. Width and Topological Product Regions	75
6.2. Level surfaces and subproduct regions	76
6.3. Incompressibility rel links	78
6.4. Reconciling the definitions, and bilipschitz maps	83

6.5. Multiple product regions	85
6.6. A covering theorem	86
6.7. Wide product regions are unknotted	93
Chapter 7. Double compression bodies	99
7.1. Proof of Theorem 7.1, (1)	100
7.2. Proof of Theorem 7.1, (2)	100
7.3. Some applications	105
Chapter 8. Carrier graphs	113
8.1. Proof of Theorem 8.2	115
8.2. Further observations about relative connectivity	119
Chapter 9. Algebraic and geometric limits	123
9.1. Geometric convergence	123
9.2. Algebraic convergence	126
9.3. Strong convergence	128
9.4. The structure of strong limits	129
Chapter 10. Splitting along barriers	133
10.1. Proof of Theorem 10.2, given Lemma 10.3	134
10.2. Setting up the barriers	137
10.3. Proof of Lemma 10.3	140
Chapter 11. Short carrier graphs	147
11.1. Proof of Lemma 11.3	150
Chapter 12. When all barriers are peripheral	165
Chapter 13. When there are no short compressible curves	175
13.1. Product regions and diameter bounds	175
13.2. Bounding the number of topological types	178
Chapter 14. The general case	181
14.1. Proofs of the three corollaries	185
Bibliography	189
