Chapter 1. Introduction	1
Acknowledgments	4
Chapter 2. Noncommutative convex sets	5
2.1. Operator spaces, cardinality, dimension and topology	5
2.2. Noncommutative convex sets	6
2.3. Matrix convexity	8
2.4. Noncommutative separation theorem	9
2.5. Noncommutative affine maps	10
Chapter 3. Categorical duality	15
3.1. Convex sets and function systems	15
3.2. Noncommutative convex sets and operator systems	15
Chapter 4. Noncommutative functions	19
4.1. Functions on compact convex sets	19
4.2. Noncommutative functions	20
4.3. $C(K)$ as a C^* -algebra	22
4.4. Continuity and $C(K)$	24
4.5. Maximal C^* -algebra	26
4.6. Representing maps	26
4.7. Minimal C^* -algebra	27
Chapter 5. Dilations of points and representations of maps	29
5.1. Dilations, compressions and maximal points	29
5.2. Representations of maps	29
Chapter 6. Extreme points	33
6.1. Extreme points	33
6.2. Existence of extreme points	36
6.3. Accessibility of extreme points	36
6.4. Noncommutative Krein-Milman theorem	37
6.5. Extreme points and the minimal C^* -algebra	38
6.6. Examples	39
Chapter 7. Noncommutative convex functions	43
7.1. Convex functions and convex envelopes	43
7.2. Noncommutative convex functions	43
7.3. Multivalued noncommutative functions	46
7.4. Noncommutative convex envelopes	47
7.5. Completely positive maps	52

7.6. Noncommutative Jensen inequality	55
Chapter 8. Orders on Completely Positive Maps	57
8.1. Classical Choquet order	57
8.2. Noncommutative Choquet order	57
8.3. Dilation order	58
8.4. Dilation order and convex envelopes	59
8.5. Equivalence of orders	60
8.6. Maximality in the dilation order	61
8.7. Scalar convex envelope	64
Chapter 9. Noncommutative Choquet-Bishop-de Leeuw theorem	67
9.1. Classical Choquet-Bishop-de Leeuw theorem	67
9.2. Noncommutative Choquet-Bishop-de Leeuw theorem	67
Chapter 10. Noncommutative integral representation theorem	73
10.1. Motivation	73
10.2. Noncommutative integration	73
10.3. Noncommutative integral representation theorem	75
Bibliography	81
