

## Contents

Preface	ix
Mandelbrot sets for fixed template iterations MARK COMERFORD, ANCA RĂDULESCU, and KIERAN CAVANAGH	1
Random beta-transformations on fat Sierpinski gaskets KARMA DAJANI, WENXIA LI, and TINGYU ZHANG	15
Polymorphisms, their associated operator theory, self-similar fractals, and harmonic analysis PALLE E. T. JORGENSEN and JAMES TIAN	37
Fractal interpolation over curves PETER R. MASSOPUST	61
Conditional proof of the ergodic conjecture for falling ball systems NANDOR SIMANYI	75
Computability in dynamical systems MICHAEL BURR and CHRISTIAN WOLF	85
Geodesics in generalizations of the Sierpinski carpet ETHAN BERKOVE, ELENE KARANGOZISHVILI, and DEREK SMITH	99
IFS measures on generalized Bratteli diagrams SERGEY BEZUGLYI and PALLE E. T. JORGENSEN	123
Unicritical and maximally critical laminations BRITTANY E. BURDETTE, CALEB S. FALCIONE, CAMERON G. HALE, and JOHN C. MAYER	147
On fractal dimension of the graph of nonstationary fractal interpolation function SUBHASH CHANDRA and SYED ABBAS	173
Recurrence properties of superadditive processes and universally good weights DOĞAN ÇÖMEZ	189
Toral band Fatou components for the Weierstrass $\wp$ function JANE HAWKINS and LORELEI KOSS	203
Fractal functions using weak contraction theory in some function spaces and generalized $\alpha$ -fractal functions MANUJ VERMA and AMIT PRIYADARSHI	219

Unmating of expanding Thurston maps with Julia set  $\mathbb{S}^2$   
MARY WILKERSON

237
