Preface	vii
Perspectives on the past, present, and future of representation theory and mathematical physics: An interview of Igor Frenkel by Joshua Sussan IGOR FRENKEL and JOSHUA SUSSAN	1
Homological link invariants from Floer theory MINA AGANAGIC, ELISE LEPAGE, and MIROSLAV RAPČAK	17
A braid group action on an A_∞ -category for zigzag algebras BENJAMIN COOPER, YOU QI, and JOSHUA SUSSAN	119
Looking for a refined Monster NORA GANTER	145
From finite state automata to tangle cobordisms: a TQFT journey from one to four dimensions MEE SEONG IM and MIKHAIL KHOVANOV	179
Quantum cluster mutations and reduced word graphs IVAN C. H. IP	221
A trilogy of mapping class group representations from three-dimensional quantum gravity HYUN KYU KIM	255
Quantum loop groups for arbitrary quivers ANDREI NEGUȚ	287
On the topics of my conversations with Igor Frenkel SAMSON L. SHATASHVILI	325
Superopers revisited ANTON M. ZEITLIN	347
Variation diminishing operators and unitary representations SL_2 over semifields YONGCHANG ZHU	367
