

Contents

Preface	vii
Bibliography	xv
Speakers and organizing committee	xix
Participants	xxi
A topological perspective on singular canards for critical sets with transverse intersections	
RICCARDO BONETTO and HILDEBERTO JARDÓN-KOJAKHMETOV	1
Canards in modified equations for Euler discretizations	
MAXIMILIAN ENGEL and GEORG A. GOTTWALD	15
Noise-induced instabilities in a stochastic Brusselator	
MAXIMILIAN ENGEL and GUILLERMO OLICÓN-MÉNDEZ	29
A formal geometric blow-up method for pattern forming systems	
SAMUEL JELBART and CHRISTIAN KUEHN	49
Infinite dimensional slow manifolds for a linear fast-reaction system	
CHRISTIAN KUEHN, PASCAL LEHNER, and JAN-ERIC SULZBACH	87
Spectral and bispectral densities of squared stationary Gaussian processes	
ADAM H. MONAHAN	105
A heteroclinic surface between two saddle slow manifolds organizing sectors of rotation of mixed-mode oscillations	
ELLE MUSOKE, BERND KRAUSKOPF, and HINKE M. OSINGA	127
The effect of a cut-off on a model of invasion with dispersive variability	
NIKOLA POPOVIĆ and ZHOUQIAN MIAO	151
Fast-reaction limits for predator–prey reaction–diffusion systems: improved convergence	
CINZIA SORESINA, BAO QUOC TANG, and BAO-NGOC TRAN	173
A new class of multi-scale reaction-diffusion systems with closed-form, low-dimensional, invariant manifolds	
XIAOXUAN WU and TASSO J. KAPER	189
