

Contents

Preface	vii
List of participants	ix
Artificial neural networks on graded vector spaces TONY SHASKA	1
Computational complexity reduction of deep neural networks MEE SEONG IM and VENKAT R. DASARI	73
Calabi–Yau metrics through Grassmannian learning and Donaldson’s algorithm CARL HENRIK EK, OISIN KIM, and CHALLENGER MISHRA	89
Neural network design options for RNG’s verification JOSÉ LUIS CRESPO, JAIME GUTIERREZ, and ANGEL VALLE	125
Diagrammatics of information MEE SEONG IM, CLEMENT KAM, and CADEN PICI	139
A neurosymbolic framework for geometric reduction of binary forms ILIAS KOTSIREAS and TONY SHASKA	173
Geometric generality of Transformer-based Gröbner basis computation YUTA KAMBE, YOTA MAEDA, and TRISTAN VACCON	195
Semi-invariants of filtered quiver representations with at most two pathways MEE SEONG IM	215
Polynomials, Galois groups, and database-driven arithmetic ELIRA CURRI and TONY SHASKA	231
