Preface vii

Online International Graduate course on Tight Closure and Its Applications, summer 2022

An introduction to the tight closure operation NEIL EPSTEIN, WITH EXERCISE SOLUTIONS BY KRITI GOEL	3
F-rational rings and rational singularities FLORIAN ENESCU, WITH EXERCISE SOLUTIONS BY KYLE MADDOX	29
Three lectures on test ideals KEVIN TUCKER, WITH EXERCISE SOLUTIONS BY KENTA SATO	57
Hilbert-Kunz multiplicity VIJAYALAXMI TRIVEDI, WITH EXERCISE SOLUTIONS BY MANDIRA MONDAL	85
Briançon-Skoda Theorems in positive characteristic IAN M. ABERBACH, WITH SOLUTIONS BY SUPRAJO DAS	105
On the applications of Big Cohen-Macaulay modules and algebras THOMAS POLSTRA, WITH EXERCISE SOLUTIONS BY MITRA KOLEY	121
Uniform Artin Rees results IRENA SWANSON, WITH EXERCISE SOLUTIONS BY KRITI GOEL	141
Lectures on the localization problem in tight closure WENLIANG ZHANG, WITH EXERCISE SOLUTIONS BY SUDESHNA ROY	159

School on Commutative Algebra and Algebraic Geometry in Prime Characteristics, May 2023

An invitation to equimultiplicity of F-invariants ILYA SMIRNOV	179
Vector bundles and tight closure HOLGER BRENNER	203
F-singularities; characteristic p methods in commutative ring theory and algebraic geometry KEI-ICHI WATANABE	225

An introduction to singularities in commutative algebra via perfectoid big
Cohen-Macaulay algebras

LINQUAN MA and KEVIN TUCKER

245
