Preface	ix
Acknowledgments	xi
1 Introduction	1
1.1 Motivation of the problem: From Euler to gSQG	1
1.2 Overview of related works	7
1.3 Main result	11
1.4 Strategy of the proof and the structure of the monograph	15
2 Preliminaries and Notations	50
2.1 Basic notations	50
2.2 Function spaces and norms	50
2.3 Linear operators	52
2.4 Modified fractional Laplacians $\Lambda^{\alpha-1}$ and $\Upsilon^{\alpha-3}$	73
2.5 Hamiltonian structure in L_0^2	87
2.6 Time-reversible Hamiltonians	88
2.7 Translation invariance	92
3 Hamiltonian Structure of the gSQG Equations	94
3.1 Hamiltonian equation in the patch setting	94
3.2 Expansion of $\mathcal{H}$	95
3.3 Conservation of momentum, time-reversibility, and M-fold symmetry	100
4 Weak Birkhoff Normal Form	103
4.1 Tangential sites and normal sites	103
4.2 Composition with a time-1 flow	105
4.3 Weak Birkhoff normal form	106
5 Action–Angle Variables	124
5.1 Hypotheses on the tangential sites	129
6 The Nonlinear Functional Setting	132
6.1 Regularity of the functional $\mathcal{F}_\omega$	133
6.2 Reversible and $\frac{2\pi}{M}$ -translation invariant solutions	136
6.3 Statement of the main theorem	137

7	Approximate Inverse	138
7.1	Linearized system at an invariant torus	151
8	Linearized Operator in the Normal Directions	153
8.1	Homogeneous expansion	153
8.2	Finite-dimensional operators	159
8.3	Linearized operator in the normal directions	161
8.4	Structure of the operator of size $O(\epsilon^2)$	167
9	Symplectic Transformations	168
9.1	Properties of the type (1) flow	169
9.2	Properties of the type (2) flow	176
10	Reduction to a Constant Coefficient Operator	180
10.1	Change of the space variables	180
10.2	Reparametrization of time	188
10.3	Egorov method	193
10.4	Linear Birkhoff normal form	219
10.5	Lipschitz tame estimates for the remainders	248
10.6	KAM reducibility and inversion of $\mathcal{L}_\omega$	253
10.7	Invertibility of $\mathcal{L}_\omega$: Proof of Proposition 7.14	274
11	Nash–Moser Iteration	277
11.1	Measure of the frequency set	289
12	Proof of Theorem 6.5	304
A	Conjugation with the Operators $\Lambda_a^{\alpha-1}, \Upsilon_a^{\alpha-3}$	307
B	Analysis of the Nonresonance Condition	310
B.1	Expressions of $\mathbb{A}$ and $\vec{D}(\xi)$	310
B.2	Estimates for B_1, B_2, B_3 , and $m_{3,\alpha}^\circ$	314
B.3	Asymptotics of $\mathbb{A}$ and $\vec{D}(\xi)$ for large M	325
B.4	Choice of tangential sites	337
	Bibliography	347
	Index	355
