

Contents

Contents of Volume I	vii
Contents of Volume II	viii
Preface	ix
Part 4. Periods, L -functions, and the relative trace formula	1
Introduction to the relative Langlands program	
RAPHAËL BEUZART-PLESSIS	3
Explicit constructions of automorphic forms: theta correspondence and automorphic descent	
WEE TECK GAN	139
Homological aspects of branching laws	
DIPENDRA PRASAD	201
Introduction to the (relative) trace formula	
PIERRE-HENRI CHAUDOUARD	235
On generalized Hitchin fibrations and orbital integrals	
NGÔ BẢO CHÂU	313
Local and global questions “beyond endoscopy”	
YIANNIS SAKELLARIDIS	337
High dimensional Gross–Zagier formula: a survey	
WEI ZHANG	381
Geometric and arithmetic theta correspondences	
CHAO LI	413
