

Contents

Contents of Volume II	vii
Contents of Volume III	viii
Preface	ix
Part 1. Representations, automorphic forms, and endoscopy	1
The local Langlands conjecture	
OLIVIER TAÏBI	3
Supercuspidal representations: Construction, classification, and characters	
JESSICA FINTZEN	51
Arthur’s conjectures and the orbit method for real reductive groups	
LUCAS MASON-BROWN	87
A brief introduction to the trace formula and its stabilization	
TASHO KALETHA	115
Some perspectives on Eisenstein series	
ERFZ LAPID	245
Part 2. Shimura varieties and shtukas	269
Shimura varieties	
SOPHIE MOREL	271
Introduction to shtukas and their moduli	
ZHIWEI YUN	337
Shtukas and the Langlands program: A bird’s eye view	
JARED WEINSTEIN	379
Recent progress on Langlands reciprocity for general linear groups: Shimura varieties and beyond	
ANA CARAIANI and SUG WOO SHIN	413
Cohomology sheaves of stacks of shtukas	
CONG XUE	471
An arithmetic application of geometric Langlands	
SAM RASKIN	501
