

Contents

Chapter 1. Introduction	1
Chapter 2. The Model	9
Chapter 3. Main Results	13
Chapter 4. Coupling	19
Chapter 5. Normalized Model	21
Chapter 6. Lumping	25
6.1. Distance process	25
6.2. Occupancy process	28
6.3. Invariant probability measures	30
Chapter 7. Monotonicity	33
7.1. Coupling of the lumped processes	33
7.2. Monotonicity of the model	35
Chapter 8. Stochastic Bounds	39
8.1. Lower and upper processes	39
8.2. Dynamics of the bounding processes	40
8.3. A renewal argument	41
8.4. Bounds on ν	43
Chapter 9. Birth and Death Processes	47
9.1. General formulas	47
9.2. The case of $(Z_t^\theta)_{t \geq 0}$	47
9.3. Persistence time	49
9.4. Invariant probability measure	51
Chapter 10. The Neutral Phase	55
10.1. Ancestral lines	55
10.2. Mutation dynamics	58
10.3. Falling to equilibrium from the left	61
10.4. Falling to equilibrium from the right	66
10.5. Discovery time	70
Chapter 11. Synthesis	79
Appendix A. Appendix on Markov Chains	81
Bibliography	85
Index	87
