

# TABLE OF CONTENTS FOR PART I

	Page
I. The Structure of Experience	14
1.1 The Map is Not the Territory	14
A. Forms of Experience	14
1. Immediate Sensory Experience	15
2. Experience of Experience	15
Meta-Section: Consciousness	17
3. Experience About Experience	19
B. The Structure of Epistemology	19
1.2 Cybernetics	20
A. Cybernetic Explanation	21
B. Units of Meaning	21
1. Information and Difference	22
2. Dimensionality and Chunking of Information	23
a. Classification of Difference	23
1) Hierarchies	23
2) Logical Typing	24
3. Redundancy and the Coding of Information	25
a. Coding	25
1) causal and correlative	26
2) analogic	26
3) digital	27

4) iconic	27
5) ostensive	28
6) evolutionary	28
7) holographic	29
b. Entropy	29
c. Discontinuities and Catastrophies	30
C. Patterning	32
1.3 Properties of a Cybernetic System	33
A. Units of Difference and Information	34
B. Classification and Chunking of Information and Difference	36
1. Dimensionality and Measurement	39
(1) Spatial Relations	39
(2) Temporal Relations	39
(3) Causal Relations	39
a. Descriptive Parameters	40
(a) Signal -To - Noise Ratio	40
(b) Simultaneous or Sequential Expression	40
(c) Afferent versus Efferent	41
2. Classification and Interaction	41
a. Properties of Interaction	43
(a) Differences of the same logical type interacting with each other at the same hierarchic or logical level	44
(b) Differences of different logical types interacting at the same logical level	46
(c) Differences of the same or different logical type interacting at different levels	49
b. Feedback	53
(a) Feedback between similar types on the same level	53

Roots of Neuro-Linguistic Programming	13
(b) Feedback between different types on the same level	54
(c) Feedback between different types on different levels	55
(d) Feedback between similar logical types on different levels	57
c. Coding of Information	58
II. Towards a Cybernetic Theory of Brain	
Function	58
2.1 Some previous theories of brain function	60
A. Generation of New Connections	60
B. Cell Assemblies	61
C. Causal Loops	62
D. Digital Circuitry	63
2.2 The Statistical Brain	64
2.3 The Cybernetic Brain	68
Appendix A: Electrostatic versus Electromagnetic Field	70
a. Electrostatic field	70
b. Electromagnetic field	70
1. Field effect	72
Bibliography for Part I	76
