

Contents

1	Introduction	1
1.1	(Wheeled) Properads as Generalized Categories	1
1.2	Infinity Categories and Infinity Operads	4
1.3	Infinity (Wheeled) Properads	6
1.4	Chapter Summaries	7
 Part I Infinity Properads		
2	Graphs	13
2.1	Wheeled Graphs	14
2.1.1	Profiles of Colors	14
2.1.2	Generalized Graphs	15
2.1.3	Structures on Generalized Graphs	16
2.2	Examples of Graphs	17
2.3	Connected Graphs	22
2.3.1	Paths	23
2.3.2	Connected Graphs	24
2.3.3	Wheel-Free Graphs	25
2.4	Graph Substitution	28
2.4.1	Properties of Graph Substitution	28
2.4.2	Examples	30
2.5	Closest Neighbors	32
2.5.1	Motivating Examples	32
2.5.2	Closest Neighbors	33
2.5.3	Inner Properadic Factorization	34
2.6	Almost Isolated Vertices	36
2.6.1	Definition and Examples	36
2.6.2	Extremal Paths	39
2.6.3	Existence of Almost Isolated Vertices	41
2.6.4	Outer Properadic Factorization	42

2.7	Deletable Vertices and Internal Edges.....	44
2.7.1	Deletable Vertices	45
2.7.2	Internal Edges.....	48
2.8	Disconnectable Edges and Loops.....	50
2.8.1	Disconnectable Edges	50
2.8.2	Loops.....	53
3	Properads	55
3.1	Biased Properads	56
3.1.1	Σ -Bimodules and Colored Objects	56
3.1.2	Biased Definition of a Properad.....	58
3.1.3	Algebras over a Properad.....	60
3.2	Unbiased Properads	61
3.2.1	Monads and Their Algebras.....	62
3.2.2	Decorated Graphs.....	63
3.2.3	Free Properad Monad.....	64
3.2.4	Maps from Free Properads	66
4	Symmetric Monoidal Closed Structure on Properads	69
4.1	Symmetric Monoidal Product	70
4.1.1	Smash Product	70
4.1.2	Tensor Product	71
4.1.3	Distributivity	72
4.1.4	Symmetric Monoidal Structure	75
4.2	Symmetric Monoidal Product of Free Properads	76
4.2.1	Motivation	76
4.2.2	The First Two Relations	77
4.2.3	Generating Distributivity	81
4.2.4	Consequences of Theorem 4.14.....	82
4.3	Proof of Theorem 4.14	83
4.3.1	Reduction of Proof	83
4.3.2	Induction Step	84
4.4	Internal Hom of Special Properads	92
4.4.1	Natural Transformation.....	92
4.4.2	Internal Hom	96
4.4.3	Symmetric Monoidal Closed Structure.....	96
5	Graphical Properads	99
5.1	Properads Generated by Connected Wheel-Free Graphs.....	100
5.1.1	1-Colored Graphs.....	100
5.1.2	Generating Set	101
5.1.3	Size of Graphical Properads.....	103
5.2	Symmetric Monoidal Product	106
5.2.1	Symmetric Monoidal Product of Graphical Properads ...	106
5.2.2	The Connected Wheel-Free Graphs	107
5.2.3	The Smash Product	108

5.2.4	Generating Distributivity	109
5.2.5	Generating Distributivity in Action	112
5.3	Maps of Graphical Properads	113
5.3.1	Maps Between Graphical Properads	114
5.3.2	Non-determination by Edge Sets	115
5.3.3	Non-injections	117
5.4	Maps with Simply Connected Targets	120
5.4.1	Simply Connected Targets	121
5.4.2	Injectivity on Inputs and Outputs	121
5.4.3	Non-injections	122
5.4.4	Unique Determination by Edge Sets	123
6	Properadic Graphical Category	125
6.1	Coface and Codegeneracy Maps	126
6.1.1	Inner Coface Maps	126
6.1.2	Outer Coface Maps	130
6.1.3	Codegeneracy Maps	132
6.2	Graphical Identities	134
6.2.1	Identities of Codegeneracy Maps	134
6.2.2	Identities Involving Both Codegeneracy and Coface Maps	135
6.2.3	Identities of Coface Maps	138
6.3	Graphical Category	145
6.3.1	Input and Output Relabeling	145
6.3.2	Subgraphs	146
6.3.3	Images	150
6.3.4	Graphical Maps	153
6.3.5	Graphical Category	155
6.3.6	Factorization of Graphical Maps	156
6.4	A Generalized Reedy Structure on Γ	160
7	Properadic Graphical Sets and Infinity Properads	165
7.1	∞ -Properads	166
7.1.1	Graphical Sets	166
7.1.2	Why a Graphical Set Resembles a Properad	168
7.1.3	Properadic Nerve	171
7.1.4	Symmetric Monoidal Closed Structure on Graphical Sets	173
7.1.5	Faces and Horns	174
7.1.6	∞ -Properads	178
7.2	Properadic Segal Maps	179
7.2.1	Motivation of the Properadic Segal Maps	179
7.2.2	Outer Coface Maps from Corollas	182
7.2.3	Compatibility over Ordinary Edges	184
7.2.4	Properadic Segal Maps	184

7.2.5	Alternative Description of the Properadic Segal Maps	187
7.2.6	Properadic Nerves Satisfy the Segal Condition	188
7.2.7	Properadic Nerve Is Fully Faithful.....	189
7.2.8	The Segal Condition Implies Strict ∞ -Properad.....	190
7.3	Characterization of Strict ∞ -Properads	194
7.3.1	Properad Associated to a Strict ∞ -Properad	195
7.3.2	Strict ∞ -Properads Are Properadic Nerves	202
7.3.3	Fundamental Properad.....	207
8	Fundamental Properads of Infinity Properads	209
8.1	Homotopy in a Graphical Set	210
8.1.1	Motivation from Fundamental Categories	210
8.1.2	Homotopy of 1-Dimensional Elements.....	212
8.1.3	Homotopy Relations Are Equivalence Relations	218
8.1.4	Same Equivalence Relation	226
8.2	Properad Associated to an ∞ -Properad	233
8.2.1	Properadic Composition of 1-Dimensional Elements.....	233
8.2.2	Properad of Homotopy Classes	245
 Part II Infinity Wheeled Properads		
9	Wheeled Properads and Graphical Wheeled Properads	251
9.1	Biased and Unbiased Wheeled Properads	252
9.1.1	Biased Wheeled Properads	252
9.1.2	Unbiased Wheeled Properads	255
9.1.3	Symmetric Monoidal Structure	256
9.2	Graphical Wheeled Properads	257
9.2.1	Wheeled Properads Generated by Connected Graphs	257
9.2.2	Size of Graphical Wheeled Properads	260
9.2.3	Maps Between Graphical Wheeled Properads	261
9.3	Wheeled Properadic Coface Maps	262
9.3.1	Motivation for Coface Maps	263
9.3.2	Coface and Codegeneracy Maps	264
9.3.3	Graphical Identities	269
9.3.4	Codimensional 2 Property.....	271
9.4	Wheeled Properadic Graphical Category	278
9.4.1	Subgraphs	278
9.4.2	Images.....	281
9.4.3	Graphical Maps	283
9.4.4	Graphical Category	285
9.4.5	Factorization of Graphical Maps.....	287
10	Infinity Wheeled Properads	293
10.1	∞ -Wheeled Properads	294
10.1.1	Wheeled Properadic Graphical Sets and Nerve	294
10.1.2	Symmetric Monoidal Closed Structure	296

10.1.3	Faces and Horns	297
10.1.4	∞ -Wheeled Properads	302
10.2	Characterization of Strict ∞ -Wheeled Properads	303
10.2.1	Outer Coface Maps from Corollas	304
10.2.2	Wheeled Properadic Segal Maps	304
10.2.3	Wheeled Properadic Nerves Satisfy the Segal Condition	308
10.2.4	Wheeled Properadic Nerve Is Fully Faithful	308
10.2.5	The Segal Condition Implies Strict ∞ -Wheeled Properad	309
10.2.6	Wheeled Properad Associated to a Strict ∞ -Wheeled Properad	313
10.2.7	Strict ∞ -Wheeled Properads Are Nerves	320
10.3	Fundamental Wheeled Properads of ∞ -Wheeled Properads.....	324
10.3.1	Homotopy of 1-Dimensional Elements.....	324
10.3.2	Dioperadic Compositions of 1-Dimensional Elements ...	326
10.3.3	Contractions of 1-Dimensional Elements	329
10.3.4	Wheeled Properad of Homotopy Classes.....	334
10.3.5	Fundamental Wheeled Properad	338
11	What's Next?	341
11.1	Homotopy Theory of Infinity Properads	341
11.2	String Topology Infinity Properad	342
11.3	Operadic Approach.....	342
11.4	Strong Homotopy Properads.....	343
11.5	Deformation Theory.....	344
11.6	Weber Theory	344
Notation	347
References	351
Index	355
