<b>List of contributors</b>	<b>ix</b>
<b>Woodhead Publishing Series in Textiles</b>	<b>xi</b>
<b>Part One Conductive fibres, yarns and fabrics</b>	<b>1</b>
<b>1 Conductive fibres for electronic textiles: an overview</b>	<b>3</b>
<i>C.R. Cork</i>	
1.1 Introduction	3
1.2 Types of conductive fibre	6
1.3 Applications of conductive fibres	13
1.4 Future trends	14
1.5 Conclusion	15
1.6 Sources of further information and advice	15
References	15
<b>2 Conductive polymer yarns for electronic textiles</b>	<b>21</b>
<i>H. Qu, M. Skorobogatiy</i>	
2.1 Introduction	22
2.2 Bulk CPYs	23
2.3 Surface CPYs	36
2.4 Techniques for processing CPYs	41
References	45
<b>3 Carbon nanotube yarns for electronic textiles</b>	<b>55</b>
<i>M. Miao</i>	
3.1 Introduction	55
3.2 CNT forests and drawability	55
3.3 CNT yarns	57
3.4 CNT yarn structure and properties	61
3.5 Applications	64
3.6 Summary and outlook	71
References	71
<b>Part Two Integrating textiles and electronics</b>	<b>73</b>
<b>4 Design and manufacture of textile-based sensors</b>	<b>75</b>
<i>P. Bosowski, M. Hoerr, V. Mecnika, T. Gries, S. Jockenhövel</i>	
4.1 Introduction	75

4.2	What are textile-based sensors?	76
4.3	Methodical approach to developing textile-based sensors	78
4.4	Types of textile-based sensors (measurement parameters)	85
4.5	Manufacturing textile-based sensor technologies	89
4.6	Applications of textile-based sensors	95
4.7	Future trends	102
4.8	Conclusion	104
	References	104
<b>5</b>	<b>Integration of micro-electronics with yarns for smart textiles</b>	<b>109</b>
	<i>T. Dias, A. Ratnayake</i>	
5.1	Introduction	109
5.2	State of the art	110
5.3	Fibre electronics technology	111
5.4	Summary	116
	References	116
<b>6</b>	<b>Design and manufacture of heated textiles</b>	<b>117</b>
	<i>E. Mbise, T. Dias, W. Hurley</i>	
6.1	Introduction	117
6.2	Types of textile heaters and development	118
6.3	Design rules for polymer-based textile heaters	121
6.4	Applications of polymer-based heating systems	128
6.5	Future trends	130
6.6	Conclusions	131
6.7	Sources of further reading and advice	131
	References	131
<b>7</b>	<b>Joining technologies for electronic textiles</b>	<b>133</b>
	<i>V. Mecnika, K. Scheulen, C.F. Anderson, M. Hörr, C. Breckenfelder</i>	
7.1	Introduction	133
7.2	Joining by textile processing	137
7.3	Strategies and automatic approaches for textile joining	145
7.4	Future trends	149
	References	152
<b>8</b>	<b>Photovoltaic energy harvesting for intelligent textiles</b>	<b>155</b>
	<i>J.I.B. Wilson, R.R. Mather</i>	
8.1	Introduction	155
8.2	Background	155
8.3	PV materials and energy harvesting	156
8.4	Requirements of textiles to be suitable substrates	163
8.5	Strategies for rendering textiles electrically conducting	165
8.6	Technological specifications	166
8.7	Manufacture of PV fabrics	166

8.8	Applications: present and future	167
8.9	Future trends	168
8.10	Sources of further information	169
	References	170
<b>9</b>	<b>Piezoelectric energy harvesting from intelligent textiles</b>	<b>173</b>
	<i>S. Waqar, L. Wang, S. John</i>	
9.1	Introduction	173
9.2	Piezoelectric materials	173
9.3	History of piezoelectricity	174
9.4	Basic principles	175
9.5	General theory of mechanical energy conversion	176
9.6	Different piezoelectric materials	178
9.7	Manufacturing piezo textiles	179
9.8	Applications	188
9.9	Future trends	191
9.10	Conclusions	192
	Acknowledgements	192
	References	193
	<b>Part Three Applications</b>	<b>199</b>
<b>10</b>	<b>Embroidered antennas for communication systems</b>	<b>201</b>
	<i>Z. Wang, J.L. Volakis, A. Kiourti</i>	
10.1	Introduction	201
10.2	Background of textile antennas	201
10.3	Design rules for embroidered antennas	203
10.4	Characterizations of embroidered conductive textiles at radio frequencies	207
10.5	Applications of embroidered antennas	219
10.6	Conclusion	233
10.7	Future work	234
	References	236
<b>11</b>	<b>Electronic textiles for military personnel</b>	<b>239</b>
	<i>R. Nayak, L. Wang, R. Padhye</i>	
11.1	Introduction	239
11.2	Applications of e-textiles in military hardware	240
11.3	Difficulties in designing e-textiles for military use	249
11.4	Future trends	253
11.5	Conclusion	254
11.6	Sources of further information	254
	References	255

<b>12</b>	<b>Wearable sensors for athletes</b>	<b>257</b>
	<i>Minyoung Suh</i>	
12.1	Introduction	257
12.2	Textile sensor technology	258
12.3	Applications in the market	262
12.4	Future trends	267
12.5	Conclusion	269
12.6	Sources of further information and advice	269
	References	271
<b>13</b>	<b>Electronic textiles for geotechnical and civil engineering</b>	<b>275</b>
	<i>D. Zangani, C. Fuggini, G. Loriga</i>	
13.1	Introduction	275
13.2	Technical textiles suitable for geotechnical and civil engineering	276
13.3	Sensors to be embedded in smart textiles	281
13.4	Smart multi-functional technical textiles incorporating sensors	287
13.5	Application cases in the construction sector	291
13.6	Standardisation issues	297
13.7	Conclusion	299
	References	299
