Chapter 1. Introduction	1
1.1. A counting problem	1
1.2. Motivations	2
1.3. The main result	3
1.4. Langlands-Sato-Tate groups	4
1.5. The symplectic-orthogonal alternative	5
1.6. Case-by-case description, examples in low motivic weight	6
1.7. Generalizations	11
1.8. Methods and proofs	11
1.9. Application to Borcherds even lattices of rank 25 and determinant 2	13
1.10. A level 1, non-cuspidal, tempered automorphic representation of GL_{28} over $\mathbb{Q}$ with weights $0, 1, 2, \dots, 27$	15
Chapter 2. Polynomial invariants of finite subgroups of compact connected Lie groups	17
2.1. The setting	17
2.2. The degenerate Weyl character formula	18
2.3. A computer program	19
2.4. Some numerical applications	20
2.5. Reliability	22
2.6. A check: the harmonic polynomial invariants of a Weyl group	23
Chapter 3. Automorphic representations of classical groups : review of Arthur's results	25
3.1. Classical semisimple groups over $\mathbb{Z}$	25
3.2. Discrete automorphic representations	27
3.3. The case of Chevalley and definite semisimple $\mathbb{Z}$ -groups	28
3.4. Langlands parameterization of $\Pi_{\mathrm{disc}}(G)$	30
3.5. Arthur's symplectic-orthogonal alternative	31
3.6. The symplectic-orthogonal alternative for polarized algebraic regular cuspidal automorphic representations of GL_n over $\mathbb{Q}$	32
3.7. Arthur's classification: global parameters	36
3.8. The packet $\Pi(\psi)$ of a $\psi \in \Psi_{\mathrm{glob}}(G)$	37
3.9. The character ε_ψ of C_ψ	41
3.10. Arthur's multiplicity formula	43
Chapter 4. Determination of $\Pi_{\mathrm{alg}}^\perp(\mathrm{PGL}_n)$ for $n \leq 5$	47
4.1. Determination of $\Pi_{\mathrm{cusp}}^\perp(\mathrm{PGL}_2)$	47
4.2. Determination of $\Pi_{\mathrm{alg}}^s(\mathrm{PGL}_4)$	47

4.3.	An elementary lifting result for isogenies	50
4.4.	Symmetric square functoriality and $\Pi_{\text{cusp}}^{\perp}(\text{PGL}_3)$	52
4.5.	Tensor product functoriality and $\Pi_{\text{cusp}}^{\circ}(\text{PGL}_4)$	53
4.6.	Λ^* functoriality and $\Pi_{\text{cusp}}^{\circ}(\text{PGL}_5)$	55
Chapter 5.	Description of $\Pi_{\text{disc}}(\text{SO}_7)$ and $\Pi_{\text{alg}}^{\text{s}}(\text{PGL}_6)$	59
5.1.	The semisimple $\mathbb{Z}$ -group SO_7	59
5.2.	Parameterization by the infinitesimal character	59
5.3.	Endoscopic partition of $\Pi_{\text{disc}}(\text{SO}_7)$	60
5.4.	Conclusions	62
Chapter 6.	Description of $\Pi_{\text{disc}}(\text{SO}_9)$ and $\Pi_{\text{alg}}^{\text{s}}(\text{PGL}_8)$	65
6.1.	The semisimple $\mathbb{Z}$ -group SO_9	65
6.2.	Endoscopic partition of Π_w	65
6.3.	Conclusions	68
Chapter 7.	Description of $\Pi_{\text{disc}}(\text{SO}_8)$ and $\Pi_{\text{alg}}^{\circ}(\text{PGL}_8)$	71
7.1.	The semisimple $\mathbb{Z}$ -group SO_8	71
7.2.	Endoscopic partition of Π_w	71
7.3.	Conclusions	74
Chapter 8.	Description of $\Pi_{\text{disc}}(\text{G}_2)$	75
8.1.	The semisimple definite G_2 over $\mathbb{Z}$	75
8.2.	Polynomial invariants for $\text{G}_2(\mathbb{Z}) \subset \text{G}_2(\mathbb{R})$	75
8.3.	Endoscopic classification of $\Pi_{\text{disc}}(\text{G}_2)$	77
8.4.	Conclusions	80
Chapter 9.	Application to Siegel modular forms	81
9.1.	Vector valued Siegel modular forms of level 1	81
9.2.	Two lemmas on holomorphic discrete series	81
9.3.	An example: the case of genus 3	84
Appendix A.	Adams-Johnson packets	87
A.1.	Strong inner forms of compact connected real Lie groups	87
A.2.	Adams-Johnson parameters	88
A.3.	Adams-Johnson packets	90
A.4.	Shelstad's parameterization map	91
Appendix B.	The Langlands group of $\mathbb{Z}$ and Sato-Tate groups	95
B.1.	The locally compact group $\mathcal{L}_{\mathbb{Z}}$	95
B.2.	Sato-Tate groups	97
B.3.	A list in rank $n \leq 8$	99
Appendix C.	Tables	101
Appendix D.	The 121 level 1 automorphic representations of SO_{25} with trivial coefficients	115
Bibliography		117
