

Contents

Chapter 1. Introduction	1
1.1. Main results	4
1.2. Relation with the Nordheim equation	7
1.3. Plan of the paper	7
Chapter 2. Well-Posedness Results	9
2.1. Weak solutions with interacting condensate	9
2.2. Weak solutions with non interacting condensate	11
2.3. Mild solutions	12
2.4. Existence of bounded mild solutions	17
2.5. Existence of global weak solutions with interacting condensate	18
2.6. Stationary solutions	25
2.7. Weak solutions with non interacting condensate	28
Chapter 3. Qualitative behaviors of the solutions	39
3.1. Weak solutions with interacting condensate as $t \rightarrow \infty$	39
3.2. Energy transfer towards large values of k .	58
3.3. Detailed asymptotic behaviour of weak solutions	61
3.4. Finite time condensation	65
3.5. Finite time blow up of bounded mild solutions	65
Chapter 4. Solutions without condensation: Pulsating behavior	67
4.1. Statement of the result	67
4.2. Proof of the result	67
Chapter 5. Heuristic arguments and open problems	91
5.1. Transport of the energy towards large values of ω	91
5.2. Open problems	96
Chapter 6. Auxiliary results	99
Bibliography	103
Index	107
