	EDITORIAL FOREWORD TO THE SERIES	XV
	FOREWORD	XVII
	PREFACE	XIX
Chapter 1	INTRODUCTION TO CIRCADIAN RHYTHMS	1
	<i>David S. Minors and James M. Waterhouse</i>	
	1.1 Basic Ideas	1
	1.1.1 A rhythmic world	1
	1.1.2 Constancy and rhythmicity in physiological systems	2
	1.2 Circadian Rhythms	3
	1.3 Exogenous and Endogenous Components of Circadian Rhythmicity	6
	1.3.1 Exogenous or masking component	8
	1.3.2 Endogenous component	8
	1.3.3 Entrainment and zeitgebers	9
	1.3.4 Zeitgebers in humans	10
	1.3.5 The relative sizes of endogenous and exogenous components	11
	1.4 Implications	12
Chapter 2	MAN IN TEMPORAL ISOLATION: BASIC PRINCIPLES OF THE CIRCADIAN SYSTEM	15
	<i>Rütger A. Wever</i>	
	2.1 Introduction	15
	2.2 Free-running Rhythms	16
	2.3 Entrained Rhythms	19
	2.3.1 Artificial zeitgebers	19
	2.3.2 Phase-shift studies	21
	2.4 Internal Desynchronization	22
	2.4.1 Spontaneous desynchronization	22
	2.4.2 Individual differences	23
	2.4.3 Multioscillatory control	24

	2.4.4 Induced internal desynchronization	25
	2.4.5 Performance rhythms and masking effects	26
	2.5 Conclusions	28
Chapter 3	INDIVIDUAL DIFFERENCES IN CIRCADIAN RHYTHMS	29
	<i>Gerard Kerkhof</i>	
	3.1 Introduction	29
	3.2 Morning Types and Evening Types	30
	3.2.1 Selection	30
	3.2.2 A diurnal study	31
	3.2.3 Rhythm parameters	33
	3.3 Personality, Age and Sex	34
	3.4 Concluding Remarks	35
Chapter 4	CIRCADIAN PERFORMANCE RHYTHMS	37
	<i>Simon Folkard and Timothy H. Monk</i>	
	4.1 Introduction	37
	4.2 Problems in Examining Performance Rhythms	38
	4.3 'Time-of-Day' Effects in Performance	39
	4.3.1 Early educational research	39
	4.3.2 The arousal theory	39
	4.3.3 The post-lunch dip	41
	4.4 The Influence of Task Demands	43
	4.4.1 Memory tasks	43
	4.4.2 'Working memory' tasks	46
	4.4.3 Underlying changes in information- processing	48
	4.4.4 Other tasks	49
	4.5 Oscillatory Control	50
	4.6 Conclusions	52
Chapter 5	SLEEP LOSS: UNDERLYING MECHANISMS AND TIREDNESS	53
	<i>James A. Horne</i>	
	5.1 Introduction and Overview	53
	5.2 Sleep and Body Restitution	55
	5.3 Sleep and Brain Restitution	58
	5.4 Facultative Sleep	61
	5.4.1 Sleep reduction	61
	5.4.2 Extended sleep	62
	5.4.3 Naturally long and short sleepers	63
	5.5 Conclusions	64

Chapter 6	SLEEP DEPRIVATION AND PROLONGED WORK HOURS	67
	<i>Jan E. Fröberg</i>	
	6.1 Introduction	67
	6.2 Type of Task	69
	6.3 The Role of Motivation	72
	6.4 The Importance of Sleep: Microsleeps	73
	6.5 Recovery	73
	6.6 Countermeasures	74
	6.7 Conclusions	75
Chapter 7	EFFECTS OF NAPS ON PERFORMANCE	77
	<i>Mats Gillberg</i>	
	7.1 Introduction	77
	7.2 Napping Habits: The Incidence, Timing and Duration of Habitual Naps	78
	7.2.1 The incidence of naps	78
	7.2.2 The timing of naps	79
	7.2.3 The duration of naps	79
	7.3 Naps and Performance	80
	7.3.1 Daytime naps	80
	7.3.2 Nighttime naps	82
	7.3.3 Multiple naps (fragmented sleep)	84
	7.4 Conclusions	85
Chapter 8	THE MENSTRUAL CYCLE	87
	<i>Paula Patkai</i>	
	8.1 Introduction	87
	8.2 Research on the Menstrual Cycle	88
	8.2.1 Subjective reactions: mood and somatic complaints	88
	8.2.2 Sexual behaviour	91
	8.2.3 Arousal and performance	92
	8.3 Conclusions	95
Chapter 9	ULTRADIAN CYCLES IN WAKEFULNESS — POSSIBLE IMPLICATIONS FOR WORK-REST SCHEDULES	97
	<i>Peretz Lavie</i>	
	9.1 Introduction	98
	9.2 The REM-NONREM 1½-h Sleep Cycle	98

	9.3 Kleitman's BRAC Model	99
	9.4 Ultradian Rhythms During Wakefulness	99
	9.5 Alertness or 'Sleepability'	100
	9.6 Perceptual-motor Performance	102
	9.7 The Effects of Sleep Deprivation	103
	9.8 Theoretical Implications	104
	9.9 Ultradian Rhythms and Work–Rest Schedules	105
Chapter 10	VIGILANCE: THEORIES AND LABORATORY STUDIES	107
	<i>Angus Craig</i>	
	10.1 Introduction and Background	108
	10.1.1 The problems of vigilance	108
	10.1.2 Central or peripheral?	109
	10.1.3 Requisites of a theory of vigilance	110
	10.2 Theories of Vigilance	110
	10.2.1 Inhibition theory	110
	10.2.2 Expectancy theory	112
	10.2.3 Arousal theory	114
	10.2.4 Attention theory	115
	10.2.5 Comment	117
	10.3 Contemporary Models	117
	10.3.1 Detectability decrements: a taxonomic approach	117
	10.3.2 Response rate shifts: empirical evidence	119
	10.4 Conclusions	121
Chapter 11	INDIVIDUAL AND GROUP DIFFERENCES IN SUSTAINED ATTENTION	123
	<i>D. Roy Davies</i>	
	11.1 Introduction	123
	11.2 Individual Differences in Vigilance Performance	124
	11.3 Group Differences in Vigilance Performance	126
	11.3.1 Personality	126
	11.3.2 Age	129
	11.3.3 Mental abilities	130
	11.3.4 Sex	131
	11.4 Conclusions	132

Chapter 12	FIELD STUDIES OF HUMAN INSPECTION: THE APPLICATION OF VIGILANCE RESEARCH	133
	<i>Angus Craig</i>	
	12.1 Introduction and Overview	133
	12.2 On the Nature of Vigilance	134
	12.3 Incidence of Vigilance Problems in Real Operations	134
	12.3.1 Task duration	134
	12.3.2 Signal rate	135
	12.3.3 Performance assessment	136
	12.3.4 Efficiency problems	136
	12.4 Applications of Research Findings	138
	12.4.1 Uncertainty reduction	138
	12.4.2 Maintenance of interest and alertness	142
	12.5 Conclusions	144
Chapter 13	FLEXITIME, COMPRESSED WORKWEEKS AND OTHER ALTERNATIVE WORK SCHEDULES	147
	<i>Donald I. Tepas</i>	
	13.1 Introduction	148
	13.2 Alternative Work Schedules practice in the USA	149
	13.3 Automation, Freedom and AWS Systems	151
	13.4 Flexitime	152
	13.4.1 Development and definition	152
	13.4.2 Advantages and disadvantages	153
	13.4.3 Problems and pitfalls	155
	13.5 The Compressed Workweek	157
	13.5.1 Development and definition	157
	13.5.2 Advantages and disadvantages	157
	13.5.3 Problems and pitfalls	159
	13.6 The Magnificent Trial?	160
	13.7 Computer-Assisted Time-scheduling (CAT)	161
	13.8 Summary and Discussion	163
Chapter 14	INTRODUCTION TO THE PROBLEMS OF SHIFTWORK	165
	<i>Kazutaka Kogi</i>	
	14.1 Daily Life of Shiftworkers	165
	14.1.1 The nature of shiftwork	165

	14.1.2 The development of shiftwork	167
	14.1.3 The spread to developing countries	169
	14.1.4 Characteristics of 'shift-lag'	171
	14.2 The Diversity of Shift Systems	172
	14.2.1 Shiftwork versus normal daywork	172
	14.2.2 Types of shift pattern	174
	14.2.3 The incidence of nightshifts	177
	14.2.4 Recent trends in shift patterns	179
	14.3 Prospects for Shiftwork	180
	14.3.1 The shiftworkers' problems	180
	14.3.2 The shiftworker/shiftwork interface	182
Chapter 15	ADJUSTMENT OF PHYSIOLOGICAL CIRCADIAN RHYTHMS AND THE SLEEP-WAKE CYCLE TO SHIFTWORK	185
	<i>Torbjorn Akerstedt</i>	
	15.1 Introduction	185
	15.2 Adjustment of Circadian Rhythms	186
	15.2.1 Phase-shifts in the laboratory	186
	15.2.2 Nightwork	188
	15.2.3 Alternating work hours	189
	15.3 Adjustment of Sleep and Wakefulness	190
	15.3.1 Sleep	190
	15.3.2 Wakefulness/fatigue	192
	15.4 Factors Affecting Adjustment	193
	15.4.1 Amount of exposure	193
	15.4.2 Type of synchronizer	193
	15.4.3 Methods of analysis	193
	15.5 Rhythmicity and Well-being	195
	15.6 Implications for Shift Schedules	197
	15.7 Conclusions	197
Chapter 16	OCCUPATIONAL HEALTH MEASURES FOR NIGHTWORKERS AND SHIFTWORKERS	199
	<i>Joseph Rutenfranz, Manfred Haider and Margit Koller</i>	
	16.1 Introduction	200
	16.2 Effects of Shiftwork on Well-being and Disease	200
	16.2.1 Health-relevant aspects of shiftwork	200

16.2.2 Lowering of well-being	201
16.2.3 Dangers to health	202
16.2.4 The development of health problems	203
16.2.5 Open questions	204
16.3 Special Health Measures for Nightworkers	205
16.3.1 Individual differences	205
16.3.2 Situational differences	207
16.4 Possible Preventive Health Measures	207
16.4.1 Time-contingency	207
16.4.2 Regular health checks	208
16.4.3 Other preventive measures	208
16.4.4 Nightshift-scheduling	209
16.5 Conclusions	210
Chapter 17 SOCIAL PROBLEMS OF SHIFTWORK	211
<i>James Walker</i>	
17.1 Introduction	211
17.2 Effects of Shiftwork on Domestic Life	214
17.3 Effects of Shiftwork on Social Life	218
17.4 Women on Shiftwork	224
17.5 Conclusion	225
Chapter 18 INDIVIDUAL DIFFERENCES IN SHIFTWORK ADJUSTMENT	227
<i>Timothy H. Monk and Simon Folkard</i>	
18.1 Introduction	227
18.2 General Factors	228
18.2.1 Age	228
18.2.2 Sex differences	230
18.2.3 Personality	230
18.2.4 Level of commitment	231
18.3 Circadian Rhythm Parameters	233
18.3.1 Phase differences	234
18.3.2 Rhythm amplitude	235
18.3.3 Circadian types	235
18.4 Conclusions	236

Chapter 19	SHIFTWORK AND PERFORMANCE	239
	<i>Timothy H. Monk and Simon Folkard</i>	
	19.1 Introduction	239
	19.2 Real Task Measures	242
	19.3 Simulated Shiftwork Studies	244
	19.3.1 Circadian studies	244
	19.3.2 Sleep deprivation studies	247
	19.4 Interpolated Task Studies	248
	19.4.1 Circadian studies	249
	19.4.2 Sleep deprivation studies	250
	19.5 Environmental Factors	251
	19.6 Conclusions	252
Chapter 20	SCHEDULING WATCHES AT SEA	253
	<i>W. Peter Colquhoun and Simon Folkard</i>	
	20.1 Introduction	253
	20.2 Watchkeeping Schedules	254
	20.3 Studies of the Three-crew Systems	255
	20.3.1 Stabilized systems	255
	20.3.2 Rotating systems	257
	20.3.3 Alternative three-crew systems	258
	20.4 Two-crew Systems	259
	20.5 Conclusions	260
Chapter 21	JET-LAG AND AIRCREW SCHEDULING	263
	<i>Hans M. Wegmann and Karl E. Klein</i>	
	21.1 Introduction	263
	21.2 Determinants of Jet-lag	264
	21.3 Aircrew-scheduling	267
	21.4 Disruptive Effects of Transmeridian Flights	270
	21.5 Internal Dissociation	272
	21.6 Conclusions	275
	REFERENCES	277
	INDEX	323
