Series Foreword <i>Edwin A. Fleishman</i>	xi
Author's Foreword <i>David Meister</i>	xv
1 The Concept of Work Activity	1
1.1 Overview and Introduction	1
1.2 Needs, Motives, and Goals	2
1.3 The Units of Analysis of Work Activity	10
1.4 The Task as a Basic Component of Activity	18
1.5 Psychological Components of Work Activity	25
1.6 Motivation and Goal Formation	32
1.7 Concluding Comments	47
2 Self-Regulation of Activity	50
2.1 Overview and Introduction	50
2.2 The Regulation of Movements and Motor Actions	51
2.3 Psychological Mechanisms of Self-Regulation	62
2.4 Self-Regulation of More Complex Activities	70
2.5 Functional Structure of Self-Regulation	74
2.6 Concluding Comments	92
3 Information Processing	94
3.1 Overview and Introduction	94
3.2 Receiving Information	96
3.3 Processing Information	106
3.4 Thinking	111
3.5 Decision Making	117

3.6	Attention	123	
3.7	Imagination in Work Activity	131	
3.8	Concluding Comments	138	
4	Design of the Human-Machine System		140
4.1	Overview and Introduction	140	
4.2	Theoretical Approaches to System Design From the Standpoint of Work Activity	143	
4.3	The Temporal Characteristics of the Operator's Activity	150	
4.4	Operator Precision	162	
4.5	The Reliability of an Operator's Work Activity	176	
4.6	Concluding Comments	185	
5	Examples of Russian Ergonomics Studies		188
5.1	Overview and Introduction	188	
5.2	Experimental Methods for Studying Work Activity in Aviation	190	
5.3	Algorithmical Analysis of Task Performance	204	
5.4	The Application of Graph Theory to Control Room Design	211	
5.5	Examples From Practice	220	
5.6	Concluding Comments	229	
6	Systemic-Structural Analysis and Design of Work Activity		232
6.1	Introduction	232	
6.2	Overview of Systemic-Structural Analysis and Design of Work Activity	234	
6.3	Temporal Structural of Work Activity	246	
6.4	Design of Time Structure of Work Activity	252	
6.5	Theoretical Problems of Evaluation of Task Complexity	262	
6.6	Mathematical Formalization of Task Complexity	271	
6.7	Application of Systemic-Structural Analysis of Work Activity for New Design	277	
6.8	Concluding Comments	293	
7	Learning and Training		298
7.1	Overview and Introduction	298	
7.2	The Activity Views of Learning	300	
7.3	Knowledge and Skills	307	
7.4	Basic Laws of Skill Acquisition	312	
7.5	Theory of Stage-by-Stage Formation of Mental Actions and Skills	323	
7.6	Concluding Comments	328	

8 Other Theories of Learning From the Activity Viewpoint	330
8.1 Overview and Introduction	330
8.2 The Algo-Heuristic Theory of Learning	331
8.3 Self-Regulation Theory of Learning	341
8.4 Some Examples and Conclusion	356
8.5 Concluding Comments	369
9 Characteristics of the Work Process	374
9.1 Overview and Introduction	374
9.2 Work Space Organization	376
9.3 Work Capacity and Fatigue	380
9.4 Monotony and Vigilance	389
9.5 Ergonomics Aspects of Safety	396
9.6 Concluding Comments	403
References	405
Author Index	420
Subect Index	427
