

Table of Contents

About the Author	xiii
About the Technical Reviewer	xv
Acknowledgments	xvii
Introduction	xix
Chapter 1: Logic & AI	1
What Is Logic?.....	2
Propositional Logic.....	3
Logical Connectives	6
Negation	7
Conjunction.....	8
Disjunction.....	9
Implication.....	10
Equivalence	11
Laws of Propositional Logic	12
Normal Forms	16
Logic Circuits	17
Practical Problem: Using Inheritance and C# Operators to Evaluate Logic Formulas	21
Practical Problem: Representing Logic Formulas as Binary Decision Trees.....	26
Practical Problem: Transforming a Formula into Negation Normal Form (NNF).....	31

TABLE OF CONTENTS

Practical Problem: Transforming a Formula into Conjunctive Normal Form (CNF)	36
Summary.....	40
Chapter 2: Automated Theorem Proving & First-Order Logic	41
Automated Theorem Proving.....	42
Practical Problem: Clauses and CNFs Classes in C#.....	45
DPLL Algorithm	55
Practical Problem: Modeling the Pigeonhole Principle in Propositional Logic.....	67
Practical Problem: Finding Whether a Propositional Logic Formula is SAT	68
First-Order Logic	75
Predicates in C#	80
Practical Problem: Cleaning Robot.....	82
Summary.....	89
Chapter 3: Agents	91
What's an Agent?	92
Agent Properties	95
Types of Environments.....	99
Agents with State.....	102
Practical Problem: Modeling the Cleaning Robot as an Agent and Adding State to It.....	103
Agent Architectures.....	113
Reactive Architectures: Subsumption Architecture	114
Deliberative Architectures: BDI Architecture.....	119
Hybrid Architectures	127
Touring Machines	131
InteRRaP	133
Summary.....	135

Chapter 4: Mars Rover	137
What's a Mars Rover?	138
Mars Rover Architecture	140
Mars Rover Code.....	143
Mars Rover Visual Application.....	176
Summary.....	192
Chapter 5: Multi-Agent Systems	193
What's a Multi-Agent System?.....	194
Multi-Agent Organization	197
Communication	199
Speech Act Theory.....	201
Agent Communication Languages (ACL)	204
Coordination & Cooperation	211
Negotiation Using Contract Net	215
Social Norms & Societies	218
Summary.....	220
Chapter 6: Communication in a Multi-Agent System Using WCF	221
Services	222
Contracts.....	224
Bindings	227
Endpoints	229
Publisher/Subscriber Pattern.....	230
Practical Problem: Communicating Among Multiple Agents Using WCF	231
Summary.....	248

TABLE OF CONTENTS

Chapter 7: Cleaning Agents: A Multi-Agent System Problem	249
Program Structure	250
Cleaning Task.....	251
Cleaning Agent Platform	254
Contract Net.....	256
FIPA-ACL	262
MAS Cleaning Agent.....	267
GUI.....	280
Running the Application	283
Summary.....	288
Chapter 8: Simulation.....	289
What Is Simulation?	290
Discrete-Event Simulation	292
Probabilistic Distributions	294
Practical Problem: Airport Simulation	297
Summary.....	313
Chapter 9: Support Vector Machines	315
What Is a Support Vector Machine (SVM)?.....	318
Practical Problem: Linear SVM in C#.....	328
Imperfect Separation	343
Non-linearly Separable Case: Kernel Trick.....	345
Sequential Minimal Optimization Algorithm (SMO).....	348
Practical Problem: SMO Implementation	356
Summary.....	365

Chapter 10: Decision Trees	367
What Is a Decision Tree?	368
Generating a Decision Tree: ID3 Algorithm.....	372
Entropy and Information Gain.....	375
Practical Problem: Implementing the ID3 Algorithm.....	377
C4.5 Algorithm	393
Practical Problem: Implementing the C4.5 Algorithm.....	399
Summary.....	410
Chapter 11: Neural Networks	411
What Is a Neural Network?	412
Perceptron: Singular NN.....	415
Practical Problem: Implementing the Perceptron NN	420
Adaline & Gradient Descent Search.....	427
Stochastic Approximation.....	431
Practical Problem: Implementing Adaline NN	432
Multi-layer Networks.....	435
Backpropagation Algorithm	440
Practical Problem: Implementing Backpropagation & Solving the XOR Problem.....	446
Summary.....	459
Chapter 12: Handwritten Digit Recognition	461
What Is Handwritten Digit Recognition?	462
Training Data Set.....	464
Multi-layer NN for HDR.....	464

TABLE OF CONTENTS

Implementation	467
Testing.....	476
Summary.....	478
Chapter 13: Clustering & Multi-objective Clustering	479
What Is Clustering?	480
Hierarchical Clustering.....	484
Partitional Clustering	486
Practical Problem: K-Means Algorithm	490
Multi-objective Clustering.....	499
Pareto Frontier Builder.....	501
Summary.....	507
Chapter 14: Heuristics & Metaheuristics.....	509
What Is a Heuristic?	510
Hill Climbing.....	512
Practical Problem: Implementing Hill Climbing.....	515
P-Metaheuristics: Genetic Algorithms.....	522
Practical Problem: Implementing a Genetic Algorithm for the Traveling Salesman Problem	526
S-Metaheuristics: Tabu Search	538
Summary.....	548
Chapter 15: Game Programming	549
What Is a Video Game?	551
Searching in Games	553
Uninformed Search	556
Practical Problem: Implementing BFS, DFS, DLS, and IDS	560

Practical Problem: Implementing Bidirectional Search on the Sliding Tiles Puzzle	568
Informed Search	580
A* for the Sliding Tiles Puzzle	583
Summary.....	588
Chapter 16: Game Theory: Adversarial Search & Othello Game	589
What Is Game Theory?	590
Adversarial Search.....	593
Minimax Search Algorithm.....	596
Alpha-Beta Pruning.....	599
Othello Game.....	602
Practical Problem: Implementing the Othello Game in Windows Forms	607
Practical Problem: Implementing the Othello Game AI Using Minimax.....	628
Summary.....	631
Chapter 17: Reinforcement Learning.....	633
What Is Reinforcement Learning?.....	634
Markov Decision Process.....	636
Value/Action–Value Functions & Policies.....	640
Value Iteration Algorithm.....	644
Policy Iteration Algorithm.....	646
Q-Learning & Temporal Difference.....	647
Practical Problem: Solving a Maze Using Q-Learning.....	650
Summary.....	668
Index.....	669
