<i>Preface</i>	<i>page xi</i>
1 Local Langlands correspondence	1
1.1 The classical theory	1
1.2 Langlands parameters over the complex field	9
1.3 Representations of loop groups	18
2 Vertex algebras	31
2.1 The center	31
2.2 Basics of vertex algebras	38
2.3 Associativity in vertex algebras	52
3 Constructing central elements	61
3.1 Segal–Sugawara operators	62
3.2 Lie algebras associated to vertex algebras	70
3.3 The center of a vertex algebra	76
3.4 Jet schemes	81
3.5 The center in the case of \mathfrak{sl}_2	87
4 Opers and the center for a general Lie algebra	101
4.1 Projective connections, revisited	101
4.2 Opers for a general simple Lie algebra	107
4.3 The center for an arbitrary affine Kac–Moody algebra	117
5 Free field realization	126
5.1 Overview	126
5.2 Finite-dimensional case	128
5.3 The case of affine algebras	135
5.4 Vertex algebra interpretation	140
5.5 Computation of the two-cocycle	145
5.6 Comparison of cohomology classes	151
6 Wakimoto modules	161
6.1 Wakimoto modules of critical level	162
6.2 Deforming to other levels	167

6.3	Semi-infinite parabolic induction	178
6.4	Appendix: Proof of the Kac–Kazhdan conjecture	189
7	Intertwining operators	192
7.1	Strategy of the proof	192
7.2	The case of \mathfrak{sl}_2	197
7.3	Screening operators for an arbitrary \mathfrak{g}	205
8	Identification of the center with functions on opers	214
8.1	Description of the center of the vertex algebra	215
8.2	Identification with the algebra of functions on opers	226
8.3	The center of the completed universal enveloping algebra	237
9	Structure of $\widehat{\mathfrak{g}}$-modules of critical level	243
9.1	Opers with regular singularity	244
9.2	Nilpotent opers	247
9.3	Miura opers with regular singularities	256
9.4	Categories of representations of $\widehat{\mathfrak{g}}$ at the critical level	265
9.5	Endomorphisms of the Verma modules	273
9.6	Endomorphisms of the Weyl modules	279
10	Constructing the Langlands correspondence	295
10.1	Opers vs. local systems	297
10.2	Harish–Chandra categories	301
10.3	The unramified case	305
10.4	The tamely ramified case	326
10.5	From local to global Langlands correspondence	353
	<i>Appendix</i>	366
A.1	Lie algebras	366
A.2	Universal enveloping algebras	366
A.3	Simple Lie algebras	368
A.4	Central extensions	370
A.5	Affine Kac–Moody algebras	371
	<i>References</i>	373
	<i>Index</i>	377
