

CONTENTS VOLUME 2

C	TOPOSES AS SPACES	469
C1	Sheaves on a locale	471
C1.1	Frames and nuclei	471
C1.2	Locales and spaces	490
C1.3	Sheaves, local homeomorphisms and frame-valued sets	502
C1.4	Continuous maps	513
C1.5	Some topological properties of toposes	519
C1.6	Internal locales	528
C2	Sheaves on a site	536
C2.1	Sites and coverages	536
C2.2	The topos of sheaves	545
C2.3	Morphisms of sites	563
C2.4	Internal sites and pullbacks	578
C2.5	Fibrations of sites	594
C3	Classes of geometric morphisms	606
C3.1	Open maps	606
C3.2	Proper maps	627
C3.3	Locally connected morphisms	648
C3.4	Tidy morphisms	665
C3.5	Atomic morphisms	684
C3.6	Local maps	695
C4	Local compactness and exponentiability	711
C4.1	Locally compact locales	711
C4.2	Continuous categories	722
C4.3	Injective toposes	738
C4.4	Exponentiable toposes	745
C5	Toposes as groupoids	755
C5.1	The descent theorems	755
C5.2	Groupoid representations	767
C5.3	Morita equivalence for groupoids	777
C5.4	The Freyd representation	792

D TOPOSES AS THEORIES	805
D1 First-order categorical logic	807
D1.1 First-order languages	807
D1.2 Categorical semantics	817
D1.3 First-order logic	828
D1.4 Syntactic categories	841
D1.5 Classical completeness	852
D2 Sketches	861
D2.1 The concept of sketch	861
D2.2 Sketches and theories	868
D2.3 Sketchable and accessible categories	874
D2.4 Properties of model categories	882
D3 Classifying toposes	890
D3.1 Classifying toposes via syntactic sites	890
D3.2 The object classifier	901
D3.3 Coherent toposes	910
D3.4 Boolean classifying toposes	918
D3.5 Conceptual completeness	931
D4 Higher-order logic	940
D4.1 Interpreting higher-order logic in a topos	940
D4.2 λ -Calculus and cartesian closed categories	951
D4.3 Toposes as type theories	963
D4.4 Predicative type theories	976
D4.5 Axioms of choice and booleanness	987
D4.6 De Morgan's law and the Gleason cover	998
D4.7 Real numbers in a topos	1012
D5 Aspects of finiteness	1033
D5.1 Natural number objects revisited	1033
D5.2 Finite cardinals	1041
D5.3 Finitary algebraic theories	1049
D5.4 Kuratowski-finiteness	1058
D5.5 Orbitals and numerals	1075
Bibliography	<i>follows p. 1089</i>
Index of notation	[55]
General Index	[61]
