Contents

Introduction *xxxi*

Assessment Test *lvii*

Chapter 1	What's New in vSphere 5.5	1
	vSphere ESXi Hypervisor Enhancements	3
	Hot-Pluggable PCIe SSD Devices	3
	Support for Reliable Memory Technology	3
	Enhancements to CPU C-States	4
	Virtual Machine Enhancements	4
	VM Compatibility with VMware ESXi 5.5	4
	Expanded vGPU Support	5
	Graphic Acceleration for Linux Guests	5
	vCenter Server Enhancements	5
	vCenter Single Sign-On	5
	vCenter Server Appliance	5
	vSphere Web Client	6
	vSphere App HA	6
	HA Compatibility with DRS VM-VM Affinity Rules	6
	vSphere Big Data Extensions	6
	Storage Enhancements	6
	Support for 62TB VMDK	7
	MSCS Updates	7
	16Gb E2E Support	7
	PDL AutoRemove	7
	vSphere Replication Interoperability	7
	vSphere Replication Multi-Point-in-Time (MPIT) Snapshot Retention	7
	VAAI UNMAP Improvements	8
	VMFS Heap Improvements	8
	vSphere Flash Read Cache	8
	Networking Enhancements	9
	Link Aggregation Control Protocol (LACP) Enhancements	9
	Traffic Filtering	10
	Quality of Service Tagging	10
	SR-IOV Enhancements	10
	Enhanced Host-Level Packet Capture	10
	40Gb NIC Support	10
	VMware Data Protection (VDP) Enhancements	10
	vCenter Operations Manager	11
	Summary	11

Chapter 2	Planning, Installing, Configuring, and Upgrading VMware ESXi and vCenter Server	13
	Introducing VMware ESXi	15
	Identifying ESXi Host Requirements	15
	Performing an Interactive Installation of ESXi	16
	Configuring NTP on an ESXi Host	25
	Configuring DNS and Routing on an ESXi Host	26
	Enabling, Configuring, and Disabling Hyperthreading	30
	Selecting a CPU Power Management Policy	31
	Enabling, Sizing, and Disabling Memory Compression Cache	33
	Licensing an ESXi Host	35
	Introducing vCenter Server	37
	Identifying Available vCenter Server Editions	37
	Identifying vCenter Server and vCenter Server Database Requirements	38
	Identifying Single Sign-On Requirements	40
	Creating a Database Connection to the vCenter Server Database	41
	Sizing the vCenter Server Database	44
	Installing vCenter Server into a Virtual Machine	46
	Deploying the vCenter Server Appliance	52
	Installing and Configuring the vSphere Client and vSphere Web Client	57
	Describing Single Sign-On Architecture	59
	Differentiating Single-Sign-On Deployment Scenarios	61
	Configuring and Administering Single Sign-On	62
	Managing Single Sign-On Users and Groups	65
	Installing Additional vCenter Server Components	73
	Installing and Removing vSphere Client Plug-Ins	78
	Enabling and Disabling vSphere Client Plug-Ins	78
	Licensing vCenter Server	80
	Determining Availability Requirements for a vCenter Server in a Given vSphere Implementation	83
	Planning and Performing Upgrades of vCenter Server and VMware ESXi	84
	Identifying Steps Required to Upgrade a vSphere Implementation	85
	Identifying Upgrade Requirements for ESXi Hosts	87
	Determining Whether an In-Place Upgrade Is Appropriate in a Given Upgrade Scenario	88
	Summary	90
	Exam Essentials	90
	Review Questions	91

Chapter 3	Securing vCenter Server and ESXi and Identifying vSphere Architecture and Solutions	95
	Securing vCenter Server and ESXi	97
	Configuring and Administering the ESXi Firewall	97
	Enabling, Configuring, and Disabling Services in the ESXi Firewall	103
	Enabling Lockdown Mode	106
	Adding an ESXi Host to a Directory Service	109
	Viewing, Sorting, and Exporting User and Group Lists	113
	Identifying Common vCenter Server Privileges and Roles	114
	Describing How Permissions Are Applied and Inherited in vCenter Server	116
	Adding, Modifying, and Removing Permissions for Users and Groups on vCenter Server	
	Inventory Objects	118
	Creating, Cloning, and Editing vCenter Server Roles	123
	Determining the Appropriate Set of Privileges for Common Tasks in vCenter Server	126
	Identifying vSphere Architecture and Solutions	127
	Explaining ESXi and vCenter Server Architectures	127
	Identifying Available vSphere Editions and Features	130
	Determining Appropriate vSphere Edition Based on Customer Requirements	130
	Identifying the Various Datacenter Solutions That Interact with vSphere (Horizon, SRM, Etc.)	132
	Summary	133
	Exam Essentials	133
	Review Questions	134
Chapter 4	Planning and Configuring vSphere Networking	139
	Configuring vNetwork Standard Switches	141
	Identifying vNetwork Standard Switch Capabilities	141
	Creating and Deleting a vNetwork Standard Switch	145
	Adding, Configuring, and Removing vmnics on a vNetwork Standard Switch	149
	Configuring VMkernel Ports for Network Services	153
	Adding, Editing, and Removing Port Groups on a vNetwork Standard Switch	157
	Determining the Use Case for a vNetwork Standard Switch	163
	Configuring vNetwork Distributed Switches	164
	Identifying vNetwork Distributed Switch Capabilities	164
	Creating and Deleting a vNetwork Distributed Switch	167

Adding and Removing ESXi Hosts to/from a vNetwork Distributed Switch	170
Adding and Removing Uplink Adapters to/from dvUplink Groups	176
Adding, Configuring, and Removing dvPort Groups	179
Creating, Configuring, and Removing Virtual Adapters	184
Migrating Virtual Adapters to and from a vNetwork Standard Switch	188
Migrating Virtual Machines to and from a vNetwork Distributed Switch	192
Upgrading a vNetwork Distributed Switch	195
Determining the Use Case for a vNetwork Distributed Switch	198
Configuring vSS and vDS Policies	198
Identifying Common vSwitch and dvSwitch Policies	199
Configuring Load Balancing and Failover Policies	199
Configuring Network Security Policies	203
Configuring Traffic Shaping Policies	205
Configuring VLAN Settings	209
Determining Appropriate VLAN Configuration for a vSphere Implementation	210
Configuring dvPort Group Blocking Policies	211
Enabling Jumbo Frames Support on Appropriate Components	212
Summary	217
Exam Essentials	218
Review Questions	220
Chapter 5 Planning and Configuring vSphere Storage	225
Configuring Shared Storage for vSphere	227
Identifying Storage Adapters and Devices	227
Identifying Storage Naming Conventions	228
Scanning and Rescanning Storage	230
Enabling, Configuring, and Disabling vCenter Server Storage Filters	233
Describing Zoning and LUN Masking Practices	235
Identifying Hardware/Dependent Hardware /Software iSCSI Initiator Requirements	236
Determining Use Case for Hardware /Dependent Hardware/Software iSCSI Initiator	237
Configuring and Editing Hardware /Dependent-Hardware Initiators	237
Enabling and Disabling a Software iSCSI Initiator	242
Configuring and Editing Software iSCSI Initiator Settings	245

Configuring iSCSI Port Binding	245
Enabling, Configuring, and Disabling iSCSI CHAP	247
Configuring FC/iSCSI LUNs as ESXi Boot Devices	252
Comparing and Contrasting Array Thin Provisioning and Virtual Disk Thin Provisioning	254
Determining Use Case for and Configuring Array Thin Provisioning	255
Creating and Configuring VMFS and NFS Datastores	256
Identifying VMFS-5 Capabilities	256
Creating, Renaming, Unmounting, and Deleting a VMFS Datastore	258
Identifying VMFS Datastore Properties	264
Extending and Expanding VMFS Datastores	266
Upgrading a VMFS-3 Datastore to VMFS-5	269
Placing a VMFS Datastore in Maintenance Mode	271
Determining the Appropriate Path Selection Policy for a Given VMFS Datastore	271
Selecting the Preferred Path for a VMFS Datastore	272
Disabling a Path to a VMFS Datastore	274
Creating an NFS Share for Use with vSphere	275
Identifying NFS Datastore Properties	277
Mounting and Unmounting an NFS Datastore	277
Determining the Use Case for Multiple VMFS /NFS Datastores	279
Summary	280
Exam Essentials	281
Review Questions	282

Chapter 6

Creating and Deploying Virtual Machines and vApps 287

Creating and Deploying Virtual Machines	289
Identifying Capabilities of Virtual Machine Hardware Versions	289
Configuring and Deploying a Guest OS into a New Virtual Machine	291
Placing Virtual Machines in Selected ESXi Hosts /Clusters/Resource Pools	295
Identifying Methods to Access and Use a Virtual Machine Console	296
Installing, Upgrading, and Updating VMware Tools	298
Identifying VMware Tools Device Drivers	302
Upgrading Virtual Machine Hardware	304
Configuring Virtual Machine Time Synchronization	307
Identifying Virtual Machine Storage Resources	309

Configuring and Modifying the Disk Controller for Virtual Disks	311
Configuring the Appropriate Virtual Disk Type for a Virtual Machine	316
Creating and Converting Thin/Thick Provisioned Virtual Disks	320
Configuring Disk Shares	323
Determining Appropriate Datastore Locations for Virtual Machines Based on Application Workloads	324
Configuring and Modifying Virtual CPU and Memory Resources According to OS and Application Requirements	325
Configuring and Modifying Virtual NIC Adapters and Connecting Virtual Machines to Appropriate Network Resources	326
Converting a Physical Machine Using VMware Converter	330
Importing a Supported Virtual Machine Source Using VMware Converter	335
Modifying Virtual Hardware Settings Using VMware Converter	339
Creating and Deploying vApps	345
Determining When a Tiered Application Should Be Deployed as a vApp	345
Creating a vApp	346
Adding Objects to an Existing vApp	348
Identifying and Editing vApp Settings	350
Configuring IP Pools	352
Suspending and Resuming a vApp	357
Cloning and Exporting a vApp	358
Summary	361
Exam Essentials	362
Review Questions	364

Chapter 7	Managing and Administering Virtual Machines and vApps	369
	Managing Virtual Machine Clones and Templates	371
	Identifying Cloning and Template Options	371
	Cloning an Existing Virtual Machine	372
	Creating a Template from an Existing Virtual Machine	375
	Deploying a Virtual Machine from a Template	377
	Updating Existing Virtual Machine Templates	379
	Deploying Virtual Appliances and vApps from an OVF Template	380
	Importing and Exporting an OVF Template	381

Determining the Appropriate Deployment Methodology for a Given Virtual Machine Application	382
Identifying Content Types	383
Creating a Local/Remote Content Library with /without external storage (VMs, ISOs, Scripts, vApps)	384
Publishing/Subscribing/Sharing a Content Library	386
Administering Virtual Machines and vApps	388
Identifying Files Used by Virtual Machines	388
Identifying Locations for Virtual Machine Configuration Files and Virtual Disks	390
Configuring Virtual Machine Options	392
Configuring Virtual Machine Power Settings	395
Configuring Virtual Machine Boot Options	398
Configuring Virtual Machine Troubleshooting Options	399
Identifying Common Practices for Securing Virtual Machines	400
Determining When an Advanced Virtual Machine Parameter Is Required	402
Hot-Extending a Virtual Disk	403
Enabling TCP Segmentation Offload Support for a Virtual Machine	405
Adjusting Virtual Machine Resources (Shares, Limits, and Reservations) Based on Virtual Machine Workloads	407
Configuring USB passthrough from an ESXi Host	409
Configuring Serial port redirection	412
Summary	414
Exam Essentials	414
Review Questions	416

Chapter 8	Establishing Service Levels with Clusters, Fault Tolerance, and Resource Pools	421
	Creating and Configuring VMware Clusters	423
	Determining the Appropriate Failover Methodology and Required Resources for an HA Implementation	424
	DRS Virtual Machine Entitlement	424
	Creating and Deleting a DRS/HA Cluster	425
	Adding and Removing ESXi Hosts to /from a DRS/HA Cluster	427
	Adding and Removing Virtual Machines to /from a DRS/HA Cluster	430
	Enabling and Disabling Host Monitoring	432
	Configuring Admission Control for HA and Virtual Machines	434

Enabling, Configuring, and Disabling Virtual Machine and Application Monitoring	442
Configuring Automation Levels for DRS and Virtual Machines	445
Configuring Migration Thresholds for DRS and Virtual Machines	448
Creating VM-Host and VM-VM Affinity Rules	450
Configuring Enhanced vMotion Compatibility	457
Monitoring a DRS/HA Cluster	460
Configuring Storage DRS	464
Enabling BIOS P/C States	467
Enabling, Configuring, and Disabling Host Power Management and Distributed Power Management	468
Determining Appropriate Power Threshold for a Given Implementation	473
Planning and Implementing VMware Fault Tolerance	474
Determining Use Cases for Enabling VMware Fault Tolerance on a Virtual Machine	475
VMware Fault Tolerance Requirements	476
Configuring VMware Fault Tolerance Networking	477
Enabling and Disabling VMware Fault Tolerance on a Virtual Machine	479
Testing an FT Configuration	482
Creating and Administering Resource Pools	483
The Resource Pool Hierarchy	483
The Expandable Reservation Parameter	484
Creating and Removing a Resource Pool	488
Configuring Resource Pool Attributes	490
Adding and Removing Virtual Machines to /from a Resource Pool	491
Determining Resource Pool Requirements for a Given vSphere Implementation	492
Evaluating Appropriate Shares, Reservations, and Limits for a Resource Pool Based on Virtual Machine Workloads	493
Describing vSphere Flash Read Cache Architecture	497
Adding/Removing vFlash Read Cache Resource Capacity	499
Assigning vFlash Read Cache Resources to VMDKs	501
Summary	504
Exam Essentials	505
Review Questions	506

Chapter 9	Maintaining Service Levels	511
	Migrating Virtual Machines	514
	Migrating a Powered-Off or Suspended Virtual Machine	514
	ESXi Host and Virtual Machine Requirements for vMotion and Storage vMotion	518
	Enhanced vMotion Compatibility CPU Requirements	519
	Snapshot Requirements for vMotion /Storage vMotion Migration	519
	Configuring a Virtual Machine Swap File Location	520
	Migrating Virtual Machines Using vMotion /Storage vMotion	525
	Using Storage vMotion Techniques	528
	Backing Up and Restoring Virtual Machines	531
	Identifying Snapshot Requirements	531
	Creating, Deleting, and Consolidating Virtual Machine Snapshots	533
	Differentiating Between VDP and VDPA	541
	Explaining VMware Data Protection Sizing Guidelines	542
	Identifying VMware Data Protection Requirements	543
	Installing and Configuring VMware Data Protection	545
	Creating a Backup Job With VMware Data Protection	551
	Managing and Monitoring VDP Capacity	554
	Performing a Test/Live Full/File-Level Restore with VMware Data Protection	556
	Performing a VDR Data Migration	562
	Describing vSphere Replication Architecture	562
	Installing/Configuring/Upgrading vSphere Replication	563
	Configuring Replication for Single/Multiple VMs	565
	Recovering a VM Using vSphere Replication	568
	Performing a Failback Operation Using vSphere Replication	571
	Determining the Appropriate Backup Solution for a Given vSphere Implementation	571
	Patching and Updating ESXi and Virtual Machines	573
	Patching Requirements for ESXi Hosts and Virtual Machine Hardware/Tools	573
	Creating, Editing, and Removing a Host Profile from an ESXi Host	575
	Attaching and Applying a Host Profile to an ESXi Host or Cluster	578
	Performing Compliance Scanning and Remediating an ESXi Host Using Host Profiles	580

Applying Permissions to ESXi Hosts Using Host Profiles	582
Importing/Exporting a Host Profile	584
Installing and Configuring VMware vSphere Update Manager	586
Configuring Patch Download Options	594
Creating, Editing, and Deleting an Update Manager Baseline	597
Attaching an Update Manager Baseline to an ESXi Host or Cluster	603
Scanning and Remediating ESXi Hosts and Virtual Machine Hardware /Tools Using Update Manager	606
Staging ESXi Host Updates	615
Upgrading an ESXi Host Using vSphere Update Manager	616
Summary	621
Exam Essentials	622
Review Questions	624
Chapter 10 Performing Basic Troubleshooting	629
Performing Basic Troubleshooting for ESXi Hosts	631
Troubleshooting Common Installation Issues	631
Monitoring ESXi System Health	632
General ESXi Host Troubleshooting Guidelines	634
Exporting Diagnostic Information	636
Performing Basic vSphere Network Troubleshooting	638
Verifying Network Configuration	638
Troubleshooting Physical Network Adapter Configuration Issues	640
Troubleshooting Virtual Switch and Port Group Configuration Issues	643
Verifying a Given Virtual Machine Is Configured with the Correct Network Resources	645
Identifying the Root Cause of a Network Issue Based on Troubleshooting Information	646
Performing Basic vSphere Storage Troubleshooting	646
Verifying Storage Configuration	646
Troubleshooting Storage Contention Issues	648
Troubleshooting Storage Overcommitment Issues	652
Troubleshooting iSCSI Software Initiator Configuration Issues	653
Troubleshooting Storage Reports and Storage Maps	654
Identifying the Root Cause of a Storage Issue Based on Troubleshooting Information	655

Performing Basic Troubleshooting for HA	
/DRS Clusters and vMotion/Storage vMotion	656
HA/DRS and vMotion Requirements	656
Verifying vMotion/Storage vMotion Configuration	657
Verifying HA Network Configuration	657
Verifying HA/DRS Cluster Configuration	658
Troubleshooting HA Capacity Issues	660
Troubleshooting HA Redundancy Issues	661
Troubleshooting DRS Load Imbalance Issues	662
Interpreting the DRS Resource Distribution Graph and Target/Current Host Load Standard Deviation	665
Troubleshooting vMotion/Storage vMotion Migration Issues	667
Interpret vMotion Resource Maps	668
Identifying the Root Cause of a DRS/HA Cluster or Migration Issue Based on Troubleshooting Information	669
Summary	669
Exam Essentials	670
Review Questions	672

Chapter 11

Monitoring a vSphere Implementation and Managing vCenter Server Alarms 677

Monitoring ESXi, vCenter Server, and Virtual Machines	680
How Tasks and Events Are Viewed in vCenter Server	680
Creating, Editing, and Deleting Scheduled Tasks	683
Configuring SNMP for vCenter Server	687
Configuring User Directory and SMTP Settings for vCenter Server	689
Configuring vCenter Server Timeout Settings	690
Configuring vCenter Server Logging Options	691
Creating a Log Bundle	692
Starting, Stopping, and Verifying vCenter Server Service Status	693
Starting, Stopping, and Verifying ESXi Host Agent Status	695
Monitoring and Administering vCenter Server Connections	698
Configuring, Viewing, Printing, and Exporting Resource Maps	699
Common Memory Metrics	703
Common CPU Metrics	705
Common Network Metrics	706
Common Storage Metrics	707

Critical Performance Metrics	708
Comparing and Contrasting Overview and Advanced Charts	709
Creating an Advanced Chart	712
Determining Host Performance Using <i>resxtop</i> and Guest Perfmon	715
Given Performance Data, Identifying the Affected vSphere Resource	719
Installing, Configuring, and Administering vCenter Operations Manager	721
Explaining vCenter Operations Manager Architecture	721
Deploying and Configuring vCenter Operations Manager Appliance	723
Upgrading vCenter Operations Manager	728
Differentiating Major/Minor vCenter Operations Manager Badges	731
Understanding Metrics Used by Major /Minor vCenter Operations Manager Badges	732
Monitoring a vSphere Environment	733
For a Given Alarm, Identify the Affected Resource In a vSphere Implementation	737
Creating and Administering vCenter Server Alarms	738
Listing vCenter Default Utilization Alarms	739
Listing vCenter Default Connectivity Alarms	739
Listing Possible Actions for Utilization and Connectivity Alarms	739
Creating a vCenter Utilization Alarm	741
Creating a vCenter Connectivity Alarm	745
Configuring Alarm Triggers	747
Configuring Alarm Actions	748
For a Given Alarm, Identifying the Affected Resource in a vSphere Implementation	749
Summary	750
Exam Essentials	751
Review Questions	753
Appendix A Answers to Review Questions	757
Chapter 2: Planning, Installing, Configuring, and Upgrading VMware ESXi and vCenter Server	758
Chapter 3: Securing vCenter Server and ESXi and Identifying vSphere Architecture and Solutions	759
Chapter 4: Planning and Configuring vSphere Networking	760
Chapter 5: Planning and Configuring vSphere Storage	762

Chapter 6: Creating and Deploying Virtual Machines and vApps	763
Chapter 7: Managing and Administering Virtual Machines and vApps	764
Chapter 8: Establishing Service Levels with Clusters, Fault Tolerance, and Resource Pools	766
Chapter 9: Maintaining Service Levels	767
Chapter 10: Performing Basic Troubleshooting	768
Chapter 11: Monitoring a vSphere Implementation and Managing vCenter Server Alarms	770
Appendix B About the Additional Study Tools	773
Additional Study Tools	774
Sybex Test Engine	774
Electronic Flashcards	774
PDF of Glossary of Terms	774
Adobe Reader	774
System Requirements	775
Using the Study Tools	775
Troubleshooting	775
Customer Care	776
<i>Index</i>	777
