List of notations

Introduction ix

1 Basic ideas 1

2 Some simple results 11

3 Open and closed sets 30

4 Denseness, separability and completeness 42

5 Function spaces 52

6 Compactness 71

7 The contraction mapping theorem 83

8 Linear mappings 92

9 Differentiation in $\mathbb{R}^2$ 120

10 Differentiation – a more abstract viewpoint 142

11 The Riemann integral 156

12 Two hard results 176

Appendix Countability 187
