<i>Preface</i>	V
<i>Symbols and Definitions</i>	I
Chapter I Generalized Functions and Their Properties	
<b>1 Basic and Generalized Functions</b>	<b>5</b>
1.1 Introduction	5
1.2 The space of basic functions $\mathcal{L}(\mathcal{O})$	7
1.3 The space of generalized functions $\mathcal{L}'(\mathcal{O})$	11
1.4 The completeness of the space of generalized functions $\mathcal{L}'(\mathcal{O})$	14
1.5 The support of a generalized function	16
1.6 Regular generalized functions	18
1.7 Measures	20
1.8 Sochozki formulas	24
1.9 Change of variables in generalized functions	26
1.10 Multiplication of generalized functions	28
<b>2 Differentiation of Generalized Functions</b>	<b>29</b>
2.1 Derivatives of generalized functions	29
2.2 The antiderivative of a generalized function	32
2.3 Examples	34
2.4 The local structure of generalized functions	41
2.5 Generalized functions with compact support	43
2.6 Generalized functions with point support	44
<b>3 Direct Product of Generalized Functions</b>	<b>46</b>
3.1 The definition of a direct product	46
3.2 The properties of a direct product	50
3.3 Some applications	54
3.4 Generalized functions that are smooth with respect to some of the variables	56
<b>4 The Convolution of Generalized Functions</b>	<b>59</b>
4.1 The definition of a convolution	59
4.2 The properties of a convolution	63
4.3 The existence of a convolution	68
4.4 Cones in $\mathbb{R}^n$	71
4.5 Convolution algebras $\mathcal{L}'(\Gamma \dot{+})$ and $\mathcal{L}'(\Gamma)$	77
4.6 Regularization of generalized functions	79
4.7 Convolution as a continuous linear translation-invariant operator	81
4.8 Some applications	83

5	<b>Generalized Functions of Slow Growth</b>	91
5.1	The space $\mathcal{S}$ of basic (rapidly diminishing) functions	91
5.2	The space $\mathcal{S}'$ of generalized functions of slow growth	94
5.3	Examples of generalized functions of slow growth and elementary operations in $\mathcal{S}'$	96
5.4	The structure of generalized functions of slow growth	98
5.5	The direct product of generalized functions of slow growth	100
5.6	The convolution of generalized functions of slow growth	102
Chapter II Integral Transformations of Generalized Functions		
6	<b>The Fourier Transform of Generalized Functions of Slow Growth</b>	106
6.1	The Fourier transform of basic functions in $\mathcal{S}$	106
6.2	The Fourier transform of generalized functions in $\mathcal{S}'$	108
6.3	Properties of the Fourier transform	110
6.4	The Fourier transform of generalized functions with compact support	111
6.5	The Fourier transform of a convolution	112
6.6	Examples	114
7	<b>Fourier Series of Periodic Generalized Functions</b>	127
7.1	The definition and elementary properties of periodic generalized functions	127
7.2	Fourier series of periodic generalized functions	130
7.3	The convolution algebra $\mathcal{L}'_T$	132
7.4	Examples	135
8	<b>Positive Definite Generalized Functions</b>	136
8.1	The definition and elementary properties of positive definite generalized functions	136
8.2	The Bochner-Schwartz theorem	139
8.3	Examples	142
9	<b>The Laplace Transform of Generalized Functions of Slow Growth</b>	143
9.1	The Laplace transform defined	143
9.2	Properties of the Laplace transform	146
9.3	Examples	148
10	<b>The Cauchy Kernel and the Transforms of Cauchy-Bochner and Hilbert</b>	151
10.1	The space $\mathcal{H}_s$	151
10.2	The Cauchy kernel $\mathcal{K}'_C(z)$	158
10.3	The Cauchy-Bochner transform	166
10.4	The Hilbert transform	168
10.5	Holomorphic functions of the class $H''_{\alpha'}(C)$	169
10.6	The generalized Cauchy-Bochner representation	174

<b>11</b>	<b>Poisson Kernel and Poisson Transform</b>	<b>176</b>
11.1	The definition and properties of the Poisson kernel	176
11.2	The Poisson transform and Poisson representation	179
11.3	Boundary values of the Poisson integral	181
<b>12</b>	<b>Algebras of Holomorphic Functions</b>	<b>185</b>
12.1	The definition of the $H_+(C)$ and $H(C)$ algebras	185
12.2	Isomorphism of the algebras $\mathcal{S}'(C^*+) \sim H_+(C)$ and $\mathcal{S}'(C^*) \sim H(C)$	186
12.3	The Paley-Wiener-Schwartz theorem and its generalizations	192
12.4	The space $H_\alpha(C)$ is the projective limit of the spaces $H_{\alpha'}(C')$	193
12.5	The Schwartz representation	196
12.6	A generalization of the Phragmén-Lindelöf theorem	199
<b>13</b>	<b>Equations in Convolution Algebras</b>	<b>199</b>
13.1	Divisors of unity in the $H_+(C)$ and $H(C)$ algebras	199
13.2	On division by a polynomial in the $H(C)$ algebra	201
13.3	Estimates for holomorphic functions with nonnegative imaginary part in $T^C$	203
13.4	Divisors of unity in the algebra $W(C)$	207
13.5	Example	208
 Chapter III Some Applications in Mathematical Physics		
<b>14</b>	<b>Differential Operators With Constant Coefficients</b>	<b>210</b>
14.1	Fundamental solutions in $\mathcal{Z}'$	210
14.2	Fundamental solutions of slow growth	214
14.3	A descent method	216
14.4	Examples	220
14.5	A comparison of differential operators	230
14.6	Elliptic and hypoelliptic operators	234
14.7	Hyperbolic operators	236
<b>15</b>	<b>Cauchy Problem</b>	<b>237</b>
15.1	The generalized Cauchy problem for a hyperbolic equation	237
15.2	Retarded potential	241
15.3	Surface retarded potentials	247
15.4	The Cauchy problem for the wave equation	249
15.5	A statement of the generalized Cauchy problem for the heat equation	251
15.6	Thermal potential	252
15.7	Solution of the Cauchy problem for the heat equation	256

<b>16</b>	<b>Holomorphic Functions With Nonnegative Imaginary Part in <math>T^C</math></b>	<b>258</b>
16.1	Preliminary remarks	258
16.2	Estimates of the growth of functions of the class $\mathcal{S}_+(T^C)$	261
16.3	Estimates of the growth of functions of the class $H_+(T^C)$	270
16.4	Smoothness of the spectral function	272
16.5	Indicator of growth of functions of the class $\mathcal{P}_+(T^C)$	274
16.6	An integral representation of functions of the class $H_+(T^C)$	278
<b>17</b>	<b>Holomorphic Functions With Nonnegative Imaginary Part in <math>T^n</math></b>	<b>284</b>
17.1	Lemmas	284
17.2	Functions of the classes $H_+(T^1)$ and $\mathcal{P}_+(T^1)$	290
17.3	Functions of the class $\mathcal{S}_+(T^n)$	296
17.4	Functions of the class $H_+(T^n)$	302
<b>18</b>	<b>Positive Real Matrix Functions in <math>T^C</math></b>	<b>306</b>
18.1	Positive real functions in $T^C$	307
18.2	Positive real matrix functions in $T^C$	310
<b>19</b>	<b>Linear Passive Systems</b>	<b>314</b>
19.1	Introduction	314
19.2	Corollaries to the condition of passivity	316
19.3	The necessary and sufficient conditions for passivity	321
19.4	Multidimensional dispersion relations	327
19.5	The fundamental solution and the Cauchy problem	331
19.6	What differential and difference operators are passive operators?	334
19.7	Examples	338
<b>20</b>	<b>Abstract Scattering Operator</b>	<b>342</b>
20.1	The definition and properties of an abstract scattering matrix	342
20.2	A description of abstract scattering matrices	345
20.3	The relationship between passive operators and scattering operators	347
