Preface ix

CHAPTER 1 INTRODUCTION TO FIRST-ORDER DIFFERENTIAL EQUATIONS 1

- 1.1 Some Population Growth Problems 1
- 1.2 Equations with Variables Separable 6
- 1.3 Some Applications of Separable Equations 17
- 1.4 Linear Equations of First Order 27
- 1.5 Some Applications of First-Order Linear Equations 35
- 1.6 Existence and Uniqueness for First-Order Equations 46
- 1.7 Direction Fields 59
- 1.8 Equilibrium Points for First-Order Equations 65
- 1.9 Numerical Approximation of Solutions of First-Order Equations 73

CHAPTER 2 SOLUTIONS OF SOME SECOND-ORDER DIFFERENTIAL EQUATIONS 88

- 2.1 The Mass-Spring System 88
- 2.2 Solutions of the Linear Differential Equation $y'' + \omega^2 y = 0$ 95
- 2.3 Solution of Linear Homogeneous Differential Equations of Second Order with Constant Coefficients 101
- 2.4 Linearity and Some of Its Consequences 112
- 2.5 Linear Nonhomogeneous Second-Order Differential Equations 114
- 2.6 Some Applications of Linear Second-Order Differential Equations 127
- 2.7 Some Linear and Nonlinear Second-Order Equations Solvable by First-Order Methods 145
- 2.8 Numerical Approximation of Solutions of Second-Order Equations 153

•Denotes optional material.

CHAPTER 3 LINEAR SYSTEMS OF DIFFERENTIAL EQUATIONS AND LINEAR DIFFERENTIAL EQUATIONS OF ARBITRARY ORDER 165

- 3.1 Introduction to Linear Systems 166
- 3.2 Solutions of Some Linear Systems with Constant Coefficients 175
- 3.3 Vector-Matrix Notation for Linear Systems 180
- 3.4 Linear Homogeneous Systems 187
- 3.5 Linear Homogeneous Systems of Differential Equations with Constant Coefficients 199
- 3.6 Linear Systems with Constant Coefficients: Multiple Eigenvalues 211
- 3.7 Linear Nonhomogeneous Systems 224
- 3.8 Linear Differential Equations of Order n 230
- 3.9 The Euler Equation 245

CHAPTER 4 THE LAPLACE TRANSFORM 255

- 4.1 Definition and Properties of Laplace Transforms 255
- 4.2 The Inverse Transform 271
- 4.3 Applications to Linear Differential Equations with Constant Coefficients 279
- 4.4 An Application to Electric Circuits and Impulses 286
- 4.5 Applications to Linear Systems of Differential Equations 294
- 4.6 A Table of Laplace Transforms 304

CHAPTER 5 SERIES SOLUTIONS OF SECOND-ORDER LINEAR DIFFERENTIAL EQUATIONS WITH APPLICATIONS 306

- 5.1 Review of the Properties of Power Series 306
- 5.2 An Example 310
- 5.3 Power-series Solutions About an Ordinary Point 314
- 5.4 Singular Points of Linear Differential Equations 322
- 5.5 Three Examples of Solutions About a Regular Singular Point 326
- 5.6 Solutions About a Regular Singular Point: The Method of Frobenius 334
- 5.7 Solutions About a Regular Singular Point: Exceptional Cases 344
- 5.8 Singularities at Infinity 357
- 5.9 Properties of Bessel Functions 361
- 5.10 Some Properties of Legendre Polynomials 378

CHAPTER 6 AN INTRODUCTION TO THE QUALITATIVE STUDY OF DIFFERENTIAL EQUATIONS 383

- 6.1 Existence of Solutions 384
- 6.2 Uniqueness of Solutions 399
- 6.3 Existence Theory for Second-Order Equations 404
- 6.4 Equilibrium Points, the Phase Plane, and Linearization 410
- 6.5 Phase Plane Analysis of Real Autonomous Second-Order Equations 417
- 6.6 Nonlinear Systems with One Degree of Freedom 432

**CHAPTER 7 AN INTRODUCTION TO THE WAVE EQUATIONS,
SEPARATION OF VARIABLES, AND FOURIER SERIES 444**

- 7.1 Formulation of Boundary-Initial-Value Problems for the One-Dimensional Wave Equation 444
- 7.2 Separation of Variables in Boundary-Initial Value Problems for the Wave Equation 453
- 7.3 Fourier Series Expansions 465
- 7.4 Solution of Boundary-Initial-Value Problems for the Wave Equation 478
- 7.5 Some Properties of Solutions of the Wave Equation 486
- 7.6 The Wave Equation in More Than One Space Dimension 499

CHAPTER 8 THE HEAT AND LAPLACE EQUATIONS 510

- 8.1 Heat Flow in a Plate and in a Rod 510
- 8.2 Solution of Heat Flow Problems by Separation of Variables 521
- 8.3 Solution of the Laplace Equation by Separation of Variables 531
- 8.4 Some Properties of Solutions of the Laplace Equation 546
- 8.5 Some Properties of Solutions of the Heat Equation 559
- 8.6 Properly Posed Problems 567

APPENDIX 1 DETERMINANTS AND LINEAR SYSTEMS A-1**APPENDIX 2 COMPLEX NUMBERS AND COMPLEX-VALUED
FUNCTIONS A-4****APPENDIX 3 POLYNOMIAL EQUATIONS A-7****APPENDIX 4 IMPROPER AND INFINITE INTEGRALS, DIFFERENTIATION
OF INTEGRALS A-9****APPENDIX 5 SOME PROPERTIES OF THE GAMMA FUNCTION A-12****APPENDIX 6 ANSWERS TO ODD-NUMBERED EXERCISES A-15****INDEX I-1**
