The furniture and designs illustrated in this book are the work of Thomas Chippendale Sen., unless the captions to the plates state otherwise. Where the words 'attributed to', 'probably' or 'possibly' occur the evidence for his authorship, although substantial, leaves an element of doubt. No purely speculative attributions are advanced. The majority of captions include a reference to the pages in Volume I on which relevant documentation or a discussion of the item will be found; this system obviates the need for separate notes to the plates.
