Notices

Knowledge and best practice in this field are constantly changing. As new research and experience broaden our understanding, changes in research methods, professional practices, or medical treatment may become necessary.

Practitioners and researchers must always rely on their own experience and knowledge in evaluating and using any information, methods, compounds, or experiments described herein. In using such information or methods they should be mindful of their own safety and the safety of others, including parties for whom they have a professional responsibility.

To the fullest extent of the law, neither the Publisher nor the authors, contributors, or editors, assume any liability for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions, or ideas contained in the material herein.

Contents

<i>Contributors</i>	<i>ix</i>
<i>Preface</i>	<i>xī</i>
1. Beryllium complexes with p-block donor ligands: Structure, bonding and reactivity	1
Magnus R. Buchner	
1. Introduction	1
2. Group 13 ligands	2
3. Group 14 ligands	3
4. Group 15 ligands	10
4.1 N-donor ligands	10
4.2 P-donor ligands	14
5. Group 16 ligands	16
5.1 O-donor ligands	16
5.2 S-donor ligands	20
6. Group 17 ligands	21
7. Summary and outlook	22
Acknowledgement	23
References	23
2. New secondary explosives and oxidizers	27
Thomas M. Klapötke	
1. Secondary explosives	27
2. Oxidizers	38
3. Summary	42
Acknowledgments	43
References	43
3. Aromaticity of singlet and triplet states of sandwich-like alkaline earth metal-doped boron clusters	45
Slađana Đorđević and Slavko Radenković	
Key references	46
1. Introduction	46
2. Methodology	50

3. M_nB_n clusters (M = Be, Mg, Ca, Sr, Ba, n = 6, 7, 8)	52
3.1 M_nB_n clusters (M = Be, Mg, Ca, Sr, Ba)	52
3.2 $Be_nB_n^{x-}$ clusters (x = 7,8)	60
4. MB_n clusters (M = Be, Mg)	65
5. Be_nB_n clusters (n = 10, 11)	71
6. Predicting magnetic aromatic properties using electron counting rules	77
7. Conclusions	80
References	82
4. Interhalogen compounds and polyhalogen ions: Structural diversity, bonding, and applications	91
Ali A. Khairbek	
1. Introduction	92
2. Advances in the structural understanding of alkali-metal tetrafluoridobromates (III) $M[BrF_4]$ (M= Na ⁺ , K ⁺ , Rb ⁺ , and Cs ⁺): A comprehensive redetermination	94
2.1 Effects of metal cations on the crystal structure	94
2.2 Bonding and interactions between components	95
2.3 Structural influence on practical applications	98
2.4 Future directions and challenges in synthesis	99
2.5 Comparison with other halogen compounds	100
2.6 Environmental and safety considerations	101
2.7 Integration with computational and theoretical studies	102
2.8 Conclusion and future perspectives	103
3. Advances in the structural understanding of BrF_5 and $[BrF_6]^-$: A comprehensive redetermination	103
3.1 Preparation of BrF_5 and $[BrF_6]^-$ and structural features and bonding	103
3.2 Thermal stability	106
3.3 Applications and industrial relevance	106
3.4 Complementary properties and future potential	106
4. Advances in the structural understanding of Br_2F_4 : A comprehensive redetermination	107
4.1 Preparation of Br_2F_4 and structural features and bonding	107
4.2 Thermal stability	109
4.3 Applications and industrial relevance	110
5. Advances in the structural understanding of Br_3F_3 and $[Br_3F_3]^+$: A comprehensive redetermination	110

5.1	Preparation of $\text{Br}_3\text{F}_{10}^-$ and $[\text{Br}_3\text{F}_8]^+$ and structural features and bonding	110
5.2	Thermal stability	112
6.	Advances in the structural understanding of $[\text{Br}_4\text{F}_{13}]^-$ and $[[\text{Br}_4\text{F}_{11}]]^+$: A comprehensive redetermination	112
6.1	Structural characteristics and bonding analysis of $[\text{Br}_4\text{F}_{13}]^-$ and $[[\text{Br}_4\text{F}_{11}]]^+$	112
6.2	Thermal stability and applications	113
7.	Advances in the structural understanding of ClF_2 -containing compounds: A comprehensive redetermination	115
7.1	Analysis of bonding and applications of ClF_2 -containing compounds	115
8.	Conclusion	118
	References	118
5.	Noncovalent interactions involving metals: The emerging roles of spodium, matere, and coinage bonds	121
	Rosa M. Gomila and Antonio Frontera	
1.	Introduction	122
2.	The emerging roles of spodium, matere, and coinage (regium) bonds	125
2.1	Spodium bonds	126
2.2	Coinage (regium) bonds	132
2.3	Matere bonds	139
3.	Concluding remarks	145
	Acknowledgments	146
	References	147
