Separation in Point-Free Topology

 Birkhäuser

Contents

I	Separation in Spaces	1
1	T_0 : Not So Much for Point-Free Purposes, But with at Least One Important Aspect	2
2	T_1 and Symmetry	2
3	Hausdorff Axiom and Regularity	4
4	Complete Regularity, Normality and the T_k Sequence	5
5	A Few Notes About the Lattices $\Omega(X)$ and Frames.....	9
6	One More Axiom into the T_k Sequence: T_D	11
7	Sobriety: Not Quite Separation, But Important.....	14
8	A Few Notes About Categories	18
II	Subfitness and Basics of Fitness	21
1	T_1 , T_U and Subfitness	22
2	Some Basic Facts on Subfitness.....	23
3	Two Somewhat Unexpected Formulas	25
4	Isbell's Approach: Fitness	29
5	Subfitness and Fitness in Sublocales.....	32
6	Subfitness, Fitness and Congruences	35
7	(Generalized) Nearness	37
III	Axioms of Hausdorff Type	39
1	Five Approaches and Four Concepts.....	39
2	Weakly Hausdorff Frames	41
3	Hausdorff Frames	42
4	Prime, Semiprime and Maximal Elements	46
5	Strongly Hausdorff Frames.....	49
6	(sH) Implies (H), and Is Not Conservative	54
7	Johnstone and Shu-Hao's Modification of (sH)	57
8	A Few Technical Facts.....	58
9	Two Important Properties of Strongly Hausdorff Frames.....	62

10	Regular Monomorphisms and Epimorphisms in Strongly Hausdorff Frames	64
11	(Co)reflection	67
IV	Summarizing Low Separation	69
1	Axioms Akin to Classical T_1	69
2	Some Statements Equivalent to (sH)	73
3	The Hausdorff Type Axioms: Merits of the Strong One	76
4	Strong Hausdorff Does Not Imply Subfit	78
5	Fit Does Not Imply Hausdorff	82
6	The Tangle of Implications	83
7	Concluding Remarks.....	85
V	Regularity and Fitness	87
1	The Relation Rather Below	88
2	Regularity and Lower Separation	90
3	Regularity Replacing Hausdorff I: Density	92
4	Regularity Replacing Hausdorff II: Compactness	94
5	Prefit (Almost Regular) and Fit	96
6	Fitness as Relaxed Regularity	101
7	(Co)reflections	103
VI	Complete Regularity	107
1	The Completely Below Relation	108
2	Complete Regularity	111
3	Complete Regularity is Stronger Than Regularity	113
4	A Class of Non-spatial Completely Regular Frames	116
5	Complete Regularity and Uniformity	118
6	Cozero Elements	120
7	The Regular Lindelöf Reflection	126
8	Choice-Free Complete Regularity	129
9	Choice-Free Compactification.....	132
VII	Normality	137
1	Normal Frames	138
2	Normality and the System of Finite Covers	141
3	The Wallman Compactification	143
4	Complete Normality: Heredity	149
VIII	More on Normality and Related Properties	155
1	Perfect Normality	155
2	Collectionwise Normality	161
3	Real-Valued Functions	167
4	Katětov–Tong Insertion Theorem	172
5	Dualizing Normality: Extremal Disconnectedness	177
6	Dualizing Katětov–Tong Insertion Theorem	180

IX	Scatteredness: Joins of Closed Sublocales	187
1	The Concept of Scatteredness in Frames	188
2	Joins of Closed Sublocales	189
3	Sublocales and Subspaces	191
4	Classical Scatteredness and Simmons Sublocale Theorem	194
5	The Frame $S_c(L)$	199
6	$S_c(L)$ of a Subfit L (and of a T_1 -Space)	200
7	The Nature of the $S_c(L)$ as an Extension of the Frame L	204
8	Lifting Subfit Frames by S_c : Boolean Target	206
9	Aside: Exact Filters in $\mathfrak{U}(L)$	209
X	Subfit, Fit, Open and Complete	213
1	Some Merits of Subfitness	214
2	Some Merits of Fitness	216
3	Joyal–Tierney Theorem	217
4	Fitting, “Another Closure”	219
5	Complete and Weakly Complete Sublocales	221
6	A Formal Relaxation of Subfitness	225
7	Remarks on the role of T_D	227
	Appendix	229
1	Partial Order	229
2	Pseudocomplements, Supplements and Complements; (Co)linearity	231
3	Frames, Coframes, and Locales	233
4	The Heyting Structure on a Frame	236
5	The Coframe of Sublocales. Nuclei and Congruences	238
6	Special Sublocales	243
7	Images and Preimages	246
8	Binary Coproduct of Frames in a Broader Perspective	249
9	Free Frames and Defining Equations	256
