# Discrete Isothermic Surfaces in Lie Sphere Geometry

 Springer

# Contents

<b>1</b>	<b>Introduction</b> .....	1
1.1	Purpose .....	1
1.2	Background .....	2
1.3	Approach .....	9
1.4	Prerequisites and Intended Audience .....	11
<b>2</b>	<b>Isothermic Surfaces in Möbius Geometry</b> .....	13
2.1	3-dimensional Space Forms .....	13
2.2	Minkowski Model of the Conformal 3-sphere .....	20
2.3	Spheres .....	25
2.4	Möbius Transformations .....	30
2.5	Cross Ratios .....	33
2.6	Isothermic Surfaces .....	41
2.7	Sphere Congruences .....	45
2.8	Cross Ratio Characterization of Isothermicity .....	49
2.9	Moutard Lifts .....	50
2.10	Christoffel Transformation .....	51
<b>3</b>	<b>From Smooth to Discrete via Permutability</b> .....	57
3.1	Wedge Product .....	57
3.2	Connections on the Trivial Bundle .....	60
3.3	Isothermicity via Flat Connections .....	64
3.4	Calapso Transformations .....	66
3.5	Darboux Transformations .....	69
3.6	Bianchi Permutability and the Cube Theorem .....	73
3.7	Polynomial Conserved Quantities .....	80
3.8	Constant Mean Curvature Surfaces and Lawson Correspondence .....	85
	Recommended further readings for Chapters 2 and 3 .....	90

<b>4</b>	<b>Discrete Isothermic Surfaces</b> .....	93
4.1	Circular Nets .....	93
4.2	Discrete Curvature via Steiner's Formula .....	96
4.3	Discrete Isothermic Surfaces .....	98
4.4	Discrete Christoffel Transformations .....	101
4.5	Discrete Isothermicity via Flat Connections .....	107
4.6	Discrete Moutard Lifts .....	111
4.7	Discrete Calapso Transformations .....	114
4.8	Discrete Darboux Transformations .....	116
4.9	Polynomial Conserved Quantities of Discrete Isothermic Surfaces .....	118
4.10	Discrete Minimal and cmc Surfaces in $\mathbb{R}^3$ .....	121
	Recommended Further Readings for Chap. 4 .....	125
<b>5</b>	<b><math>\Omega</math>-surfaces in Lie Sphere Geometry</b> .....	131
5.1	Lie Sphere Geometry .....	131
5.2	Lie Sphere Transformations .....	136
5.3	Legendre Immersions and Contact Lifts .....	138
5.4	Sphere Congruences Enveloping a Surface .....	143
5.5	Dupin Cyclides .....	145
5.6	Lie Cyclides .....	147
5.7	Normal Bundle for Surfaces in $P(L^4)$ .....	150
5.8	Normal Bundle for Surfaces in $P(L^5)$ .....	152
5.9	Definition of $\Omega$ -surfaces .....	154
5.10	The First Fundamental Form of Sphere Congruences .....	156
5.11	The Second Fundamental Form of Sphere Congruences .....	157
5.12	Harmonic Separation of Curvature Sphere Congruences .....	164
<b>6</b>	<b>Integrability of <math>\Omega</math>-surfaces via Isothermicity</b> .....	167
6.1	Isothermic Sphere Congruences as Isothermic Surfaces .....	167
6.2	Flat Connections of $\Omega$ -surfaces .....	171
6.3	Calapso Transformations of $\Omega$ -surfaces .....	174
6.4	Christoffel Dual Lifts of $\Omega$ -surfaces .....	175
6.5	Other Lie Applicable Surfaces .....	178
6.6	Guichard Surfaces .....	181
6.7	Linear Weingarten Surfaces .....	183
	Recommended further readings for Chapters 5 and 6 .....	192
<b>7</b>	<b>Discrete <math>\Omega</math>-surfaces</b> .....	197
7.1	Discrete Legendre Maps .....	197
7.2	Contact Elements of Discrete Legendre Maps .....	201
7.3	Discrete Curvatures via Mixed Area: Revisited .....	202
7.4	Discrete Isothermic Sphere Congruences .....	206
7.5	Discrete $\Omega$ -surfaces .....	208
7.6	Isothermic Sphere Congruences of Discrete $\Omega$ -surfaces .....	209

7.7	Calapso Transformations of Discrete $\Omega$ -surfaces .....	213
7.8	Discrete Linear Weingarten Surfaces .....	214
	Recommended further readings for Chapter 7 .....	218
	<b>References</b> .....	221
	<b>Index</b> .....	233
