SECTION I General Considerations

Chapter 1	Surgical Approaches to the Heart and Great Vessels	3
Chapter 2	Preparation for Cardiopulmonary Bypass	20
Chapter 3	Myocardial Preservation	34
Chapter 4	Venting and Deairing of the Heart	38

SECTION II Surgery for Acquired Heart Disease

Chapter 5	Surgery of the Aortic Valve	45
Chapter 6	Surgery of the Mitral Valve	84
Chapter 7	Surgery of the Tricuspid Valve	110
Chapter 8	Surgery of the Aorta	118
Chapter 9	Surgery for Coronary Disease	140
Chapter 10	Surgery for Mechanical Complications of Myocardial Infarction	173
Chapter 11	Heart Transplantation	183
Chapter 12	Cardiac Tumors	189
Chapter 13	Surgery for Atrial Fibrillation	192

SECTION III Surgery for Congenital Heart Defects

Chapter 14	Patent Ductus Arteriosus	199
Chapter 15	Coarctation of the Aorta	206
Chapter 16	Pulmonary Artery Banding	215
Chapter 17	Vascular Ring and Pulmonary Artery Sling	219
Chapter 18	Systemic Pulmonary Shunting	224
Chapter 19	Atrial Septal Defect	234
Chapter 20	Total Anomalous Pulmonary Venous Connection	246

Chapter 21	Ventricular Septal Defect	255
Chapter 22	Atrioventricular Septal Defect	263
Chapter 23	Right Ventricular Outflow Tract Obstruction	272
Chapter 24	Left Ventricular Outflow Tract Obstruction	284
Chapter 25	Transposition of the Great Vessels	301
Chapter 26	Aortopulmonary Window	325
Chapter 27	Truncus Arteriosus	328
Chapter 28	Ebstein Anomaly	334
Chapter 29	Interrupted and Hypoplastic Aortic Arch	341
Chapter 30	The Norwood Principle	348
Chapter 31	The Fontan Principle	360
Chapter 32	Coronary Artery Anomalies	372
