

MRI in Orthopaedics and Sports Medicine

The Essentials

Uma Srikumaran, MD, MBA, MPH

Associate Professor and Vice Chair of Quality,
Safety and Service;

Director, Shoulder Fellowship;

Core Faculty, Hopkins Business of Health Initiative (HBHI)

Department of Orthopaedic Surgery

Johns Hopkins University

Baltimore, Maryland, USA

Amit Jain, MD, MBA

Associate Professor of Orthopaedic Surgery
and Neurosurgery;

Chief, Minimally-Invasive Spine Surgery

Department of Orthopaedic Surgery;

Director

Value-Based Care, Johns Hopkins Health System;

Co-Director

Johns Hopkins Spine Surgery Fellowship

Johns Hopkins University

Baltimore, Maryland, USA

A. Jay Khanna, MD, MBA

D'Aniello Department Chair and Professor

Department of Orthopaedic Surgery

Georgetown University School of Medicine

and MedStar Georgetown University

Hospital;

Physician Executive Director

MedStar Orthopaedic Institute

Washington, DC, USA

-------------------	-------

Part I: MRI Essentials

1. Essentials of MRI Physics and Pulse Sequences.....	3		
<i>Marc Greenberg, A. Jay Khanna, Rick W. Obray, Douglas P. Beall, John D. Reeder, John A. Carrino, and Laura M. Fayad</i>			
1.1 Introduction.....	3	1.3.4 Proton-Density SE and Proton-Density FSE.....	10
1.2 Fundamentals of MRI.....	3	1.3.5 Fat Suppression with T1-Weighted, T2-Weighted, and Proton-Density SE and FSE.....	10
1.2.1 Magnetization of Nuclei and Tissues and the Larmor Equation.....	3	1.3.6 STIR.....	11
1.2.2 T1, T2, and T2*.....	5	1.3.7 Gradient Echo, 3D Gradient Echo.....	11
1.2.3 Gradient Coils and Signal Localization.....	6	1.3.8 Contrast-Enhanced Imaging.....	12
1.2.4 MRI Pulse Sequence and TE, TR, and Inversion Time.....	6	1.4 Artifacts.....	13
1.3 MRI Applications.....	7	1.5 Summary.....	13
1.3.1 Standard Sequences.....	7	1.6 Common Clinical Questions.....	14
1.3.2 T1-Weighted SE.....	8	References.....	14
1.3.3 T2-Weighted SE and T2-Weighted FSE.....	9	Answers to Common Clinical Questions.....	15
2. Normal MRI Anatomy of the Musculoskeletal System.....	16		
<i>Emmanuel L. McNeely, A. Jay Khanna, Jason D. Dunleavy, and John A. Carrino</i>			
2.1 Introduction.....	16	2.5.1 Axial Images.....	35
2.2 Shoulder.....	16	2.5.2 Coronal Images.....	38
2.2.1 Axial Images.....	16	2.5.3 Sagittal Images.....	39
2.2.2 Coronal Oblique Images.....	17	2.6 Knee.....	39
2.2.3 Sagittal Oblique Images.....	19	2.6.1 Axial Images.....	39
2.3 Elbow.....	20	2.6.2 Coronal Images.....	39
2.3.1 Axial Images.....	20	2.6.3 Sagittal Images.....	43
2.3.2 Muscle Classification by Location.....	23	2.7 Foot/Ankle.....	45
2.3.3 Muscle Classification by Compartment.....	23	2.7.1 Axial Images.....	45
2.3.4 Coronal Images.....	25	2.7.2 Coronal Images.....	50
2.3.5 Sagittal Images.....	27	2.7.3 Sagittal Images.....	53
2.4 Wrist/Hand.....	27	2.8 General Spine Anatomy.....	54
2.4.1 Axial Images.....	27	2.8.1 Intervertebral Disks.....	54
2.4.2 Coronal Images.....	33	2.8.2 Vertebral Bodies.....	55
2.4.3 Sagittal Images.....	35	2.8.3 CSF.....	59
2.5 Hip.....	35	2.8.4 Spinal Cord.....	59
		2.8.5 Ligaments.....	59

2.8.6	Roots and Foramina	59	2.11.1	Sagittal Images	66
			2.11.2	Axial Images	66
2.9	Cervical Spine	62	2.11.3	Coronal Images	68
2.9.1	Sagittal Images	62	2.12	Common Clinical Questions	68
2.9.2	Axial Images	63		References	68
2.9.3	Coronal Images	65		Answers to Common Clinical Questions	69
2.10	Thoracic Spine	65			
2.11	Lumbar Spine	66			
3.	A Systematic Approach to the Review of Spine MRI Studies	70			
	<i>Andrew B. Harris, Amit Jain, and A. Jay Khanna</i>				
3.1	Introduction	70	3.5	Step 4: Evaluation of Specialized Pulse Sequences	79
3.2	Step 1: Determination of Pulse Sequences Available for Review	70	3.5.1	Fat-Suppressed T2-Weighted or STIR Images	79
3.2.1	T1-Weighted and T2-Weighted Images	70	3.5.2	Postgadolinium T1-Weighted Images	79
3.2.2	Fat-Suppressed T2-Weighted Images or STIR Images	71	3.6	Step 5: Correlation of Imaging Findings with Patient History and Examination Findings to Determine the Most Likely Diagnosis	80
3.2.3	Postgadolinium T1-Weighted Images	72			
3.2.4	MR Angiography Images	72	3.7	Summary	82
3.3	Step 2: Evaluation of T2-Weighted Images	73	3.8	Common Clinical Questions	82
3.3.1	Cervical Spine Example	73		References	82
3.3.2	Lumbar Spine Example	74		Answers to Common Clinical Questions	82
3.3.3	Pattern Recognition	77			
3.4	Step 3: Evaluation of T1-Weighted Images	78			
4.	Correlation of MRI with Other Imaging Modalities	84			
	<i>Laura M. Fayad, Shivani Ahlawat, Uma Srikumaran, and A. Jay Khanna</i>				
4.1	Introduction	84	4.6	PET	88
4.2	MRI	84	4.7	Ultrasonography	88
4.3	Conventional Radiography	84	4.8	Common Clinical Questions	89
4.4	CT	85		References	89
4.5	Nuclear Scintigraphy	86		Answers to Common Clinical Questions	90
5.	Articular Cartilage	91			
	<i>Andrea M. Spiker, Michael K. Shindle, Li Foong Foo, Bryan T. Kelly, and Hollis G. Potter</i>				
5.1	Introduction	91	5.5	Classification	95
5.2	Systematic Approach to Reviewing Cartilage on MRI	92	5.6	Traumatic Conditions	96
5.3	Specialized Pulse Sequences and Imaging Protocols	92	5.6.1	Knee	96
5.4	Clinical Cartilage Imaging	94	5.6.2	Hip	96
			5.6.3	Shoulder	97
			5.7	Degenerative Conditions	97

5.7.1	Hip.....	97	5.10	Common Clinical Questions	102
5.7.2	Shoulder	99		References	102
5.7.3	Smaller Joints.....	99		Answers to Common Clinical Questions	104
5.7.4	OA and Inflammatory Arthritis.....	99			
5.8	Infection	100			
5.9	Cartilage Imaging after Repair	100			
6.	MRI Safety Considerations for the Referring Clinician	105			
	<i>Monica D. Watkins and Bruce A. Wasserman</i>				
6.1	Introduction	105	6.5	Gadolinium-Based Contrast	107
6.2	Physiologic Effects of the Magnetic Field ...	105	6.5.1	Nephrogenic Systemic Fibrosis.....	108
6.2.1	Static Magnetic Fields.....	105	6.5.2	Accumulation of Free Gadolinium Ion.....	108
6.2.2	Time-Varying Magnetic Fields.....	105	6.5.3	Contrast Allergies.....	108
6.3	Metallic Substances	106	6.5.4	Pregnancy and Contrast.....	109
6.3.1	Field Distortion	106	6.5.5	Other Special Populations and Contrast	109
6.3.2	Metallic Objects in Magnetic Fields	106	6.6	Claustrophobia	109
6.3.3	Implant Safety Profiles	106	6.7	Common Clinical Questions	109
6.3.4	Superficial Metal	107		References	110
6.3.5	External Metallic Objects	107		Answers to Common Clinical Questions	111
6.4	Pregnancy	107			

Part II: Upper Extremity

7.	The Shoulder	115			
	<i>Kelly G. Kilcoyne and Uma Srikumaran</i>				
7.1	Normal Anatomy	115	7.4	Degenerative Conditions	121
7.1.1	Rotator Cuff	115	7.4.1	Rotator Cuff: Tendinopathy, Partial- and Full-Thickness Tears.....	121
7.1.2	Glenoid Labrum and Capsular Ligaments	115	7.5	Other Pathologic Conditions	124
7.1.3	Biceps	117	7.5.1	Septic Arthritis	124
7.1.4	Glenoid and Scapula.....	117	7.5.2	Adhesive Capsulitis.....	124
7.1.5	Humeral Head	118	7.5.3	Calcific Tendonitis	124
7.2	Systematic Approach to Image Review	118	7.6	Postoperative MRI Findings	124
7.2.1	Rotator Cuff	118	7.7	Common Clinical Questions	126
7.2.2	Glenoid Labrum and Capsular Ligaments	119		References	127
7.2.3	LHBT	119		Answers to Common Clinical Questions	128
7.2.4	Bone and Cartilage Defects	119			
7.2.5	Acromioclavicular Joint	119			
7.3	Traumatic Conditions	119			
7.3.1	Labrum	119			

8. The Elbow	129		
<i>Ariel A. Williams, Lance M. Brunton, Mark W. Anderson, and A. Bobby Chhabra</i>			
8.1 Normal Anatomy	129	8.5 Degenerative Conditions: Lateral and Medial Epicondylitis	133
8.1.1 Coronal Anatomy	129	8.6 Other Pathologic Conditions	134
8.1.2 Sagittal Anatomy	129	8.6.1 Infections	134
8.1.3 Axial Anatomy	130	8.6.2 OCD	135
8.2 Specialized Pulse Sequences and Imaging Protocols	130	8.6.3 Compression Neuropathies	136
8.3 Systematic Approach to Image Review	130	8.6.4 Synovial Disorders	136
8.4 Traumatic Conditions	131	8.6.5 Soft Tissue Masses	136
8.4.1 Occult Fractures	131	8.6.6 Postoperative MRI Findings	137
8.4.2 Loose Bodies	131	8.7 Common Clinical Questions	137
8.4.3 MCL Injury	132	References	138
8.4.4 LCL Complex Injury	132	Answers to Common Clinical Questions	139
8.4.5 Biceps Tendon Injury	133		
8.4.6 Triceps Tendon Injury	133		

9. The Wrist and Hand	140		
<i>Ariel A. Williams, Lance M. Brunton, Mark W. Anderson, and A. Bobby Chhabra</i>			
9.1 Normal Anatomy	140	9.5.1 Ulnar Impaction Syndrome	147
9.1.1 Sagittal Anatomy	140	9.5.2 Tendon Disorders	147
9.1.2 Coronal Anatomy	140	9.5.3 Carpal Instability	148
9.1.3 Axial Anatomy	141	9.6 Other Pathologic Conditions	148
9.2 Systematic Approach to Image Review	141	9.6.1 Infectious Conditions	148
9.3 Six Specialized Pulse Sequences and Imaging Protocols	142	9.6.2 Kienböck Disease	148
9.4 Traumatic Conditions	142	9.6.3 Posttraumatic Scaphoid Osteonecrosis	149
9.4.1 Occult Fractures of the Scaphoid and Other Bones	142	9.6.4 RA	150
9.4.2 Triangular Fibrocartilage Complex Injury	143	9.6.5 Compression Neuropathies	150
9.4.3 Interosseous Ligament Injury	144	9.6.6 Soft Tissue Masses	151
9.4.4 Extrinsic Carpal Ligament Injury	144	9.7 Postoperative MRI Findings	153
9.4.5 Thumb Ulnar Collateral Ligament Injury	145	9.8 Common Clinical Questions	153
9.4.6 Tendon Injuries	145	References	154
9.5 Degenerative Conditions	146	Answers to Common Clinical Questions	155

Part III: Lower Extremity

10. The Hip	159		
<i>Andrea M. Spiker, Michael K. Shindle, Marc J. Philippon, Bryan T. Kelly, Luis E. Moya, and Douglas N. Mintz</i>			
10.1 Normal Anatomy	159	10.1.1 Sagittal Anatomy	159

10.1.2	Coronal Anatomy	159	10.5	Degenerative Conditions	169
10.1.3	Axial Anatomy	159	10.5.1	Osteoarthritis	169
10.2	Specialized Pulse Sequences and Imaging Protocols	159	10.5.2	Dysplasia	169
10.3	Systematic Approach to Image Review	160	10.6	Other Pathologic Conditions	169
10.4	Traumatic Conditions and the Athletic Hip	161	10.6.1	Osteonecrosis	169
10.4.1	Acetabular Labral Tears	161	10.6.2	Idiopathic Transient Osteoporosis	170
10.4.2	Femoroacetabular Impingement	163	10.7	Inflammatory Disorders	170
10.4.3	Stress Fractures	164	10.8	Synovial Disorders	171
10.4.4	Traumatic Posterior Subluxation/Dislocation/ Lateral Impaction	166	10.9	Postoperative MRI Findings	172
10.4.5	Muscle Strains and Tears	166	10.10	Brief High-Yield Review	172
10.4.6	Apophyseal Avulsion	167	10.11	Common Clinical Questions	173
10.4.7	Athletic Pubalgia/Core Muscle Injury	167	References	173	
10.4.8	Ligamentum Teres Tears	167	Answers to Common Clinical Questions	176	
10.4.9	Greater Trochanteric Pain Syndrome	168			
10.4.10	Abductor Tears	168			
10.4.11	Snapping Hip Syndrome (Coxa Saltans)	168			
10.4.12	Deep Gluteal Syndrome	169			
11.	The Knee	177			
	<i>Miho J. Tanaka, Bashir Zikria, A. Jay Khanna, Andrew J. Cosgarea, and John D. Reeder</i>				
11.1	Specialized Pulse Sequences and Protocols	177	11.3.7	ITB Syndrome	196
11.2	Traumatic Pathology	177	11.3.8	Osteonecrosis	196
11.2.1	Acute Hemarthrosis	177	11.3.9	Degenerative Joint Disease	197
11.2.2	Meniscal Tears	177	11.3.10	Degenerative Meniscus	198
11.2.3	ACL Tears	182	11.3.11	Adhesion Formation	198
11.2.4	PCL Tears	186	11.3.12	Anterior Interval Scarring	198
11.2.5	Collateral Ligament Tears	186	11.3.13	Baker (Popliteal) Cyst	198
11.2.6	Posterolateral Corner	187	11.4	Infectious Conditions: Osteomyelitis and Septic Effusion	198
11.2.7	Posteromedial Corner	188	11.5	Postoperative Findings	199
11.2.8	Knee Dislocation	189	11.5.1	Postoperative Meniscus: Partial Meniscectomy, Repair, and Allograft Replacement	199
11.2.9	Extensor Mechanism	189	11.5.2	ACL Reconstruction	200
11.2.10	Muscle Strain	190	11.5.3	Cyclops Lesion	201
11.2.11	Loose Bodies	191	11.6	Summary	203
11.2.12	Hoffa Disease	192	11.7	Common Clinical Questions	203
11.3	Degenerative (Nonacute) Pathology	192	References	203	
11.3.1	Stress Fracture	192	Answers to Common Clinical Questions	205	
11.3.2	Extensor Mechanism: Patellar Tendinosis	192			
11.3.3	Osteochondroses	193			
11.3.4	Discoid Meniscus	193			
11.3.5	Plicae	193			
11.3.6	Bursitis	196			
12.	The Foot and Ankle	206			
	<i>Casey Jo Humbyrd, Shadpour Demehri, Delaram Shakoore, Rebecca Cerrato, and James R. Ficke</i>				
12.1	Imaging of the Normal Anatomy	206	12.1.1	Osseous Structures	206

Contents

12.1.2	Ligaments	206	12.6	Degenerative Conditions	214
12.1.3	Tendons	207	12.6.1	Tendon Disorders	214
12.2	Specialized Pulse Sequence and Imaging Protocols	207	12.6.2	FHL and Posterior Impingement (Os Trigonum)	219
12.3	Systemic Approach to Image Review	208	12.6.3	Plantar Plate Injuries	220
12.3.1	Axial and Coronal Planes	208	12.7	Postoperative MRI Findings	220
12.3.2	Sagittal Planes	209	12.7.1	Tendon Repair	220
12.4	Traumatic Conditions	209	12.7.2	Lateral Ankle Ligament Reconstruction	221
12.5	Stress Fractures	209	12.7.3	Other Foot and Ankle Surgical Procedures	221
12.5.1	Ankle Sprains	210	12.8	Common Clinical Questions	221
12.5.2	Syndesmotic Injuries	212	References	222	
12.5.3	OCLs of the Ankle	213	Answers to Common Clinical Questions	224	

Part IV: Neurological Imaging

13.	Normal Spine MRI Anatomy	227			
	<i>Majd Marrache, Swati Deshmukh, John A. Carrino, Jason D. Dunleavy, and A. Jay Khanna</i>				
13.1	Normal Anatomy	227	13.3.3	Axial MRI	246
13.2	General Spine Anatomy	227	13.3.4	Coronal MRI	247
13.2.1	Vertebral Bodies	227	13.4	Thoracic Spine	247
13.2.2	Intervertebral Disks	230	13.5	Lumbar Spine	247
13.2.3	Epidural Space	232	13.5.1	Anatomy	247
13.2.4	Cerebrospinal Fluid (CSF)	232	13.5.2	Sagittal MRI	247
13.2.5	Spinal Cord	233	13.5.3	Axial MRI	249
13.2.6	Ligaments	233	13.5.4	Coronal MRI	250
13.2.7	Roots and Foramina	235	13.6	Sacrum and Coccyx	250
13.2.8	Facet Joints	236	13.7	Common Clinical Questions	250
13.2.9	Vascular Structures	237	References	251	
13.2.10	Muscles	238	Answers to Common Clinical Questions	252	
13.3	Cervical Spine	238			
13.3.1	Anatomy	238			
13.3.2	Sagittal MRI	245			
14.	The Occipitocervical Junction	253			
	<i>Colin Haines, A. Jay Khanna, John A. Carrino, Shih-Chun Lin, and Joseph R. O'Brien</i>				
14.1	Occipitocervical Craniometry	253	14.4	Miscellaneous	262
14.2	MRI Anatomy and Imaging Protocols	253	14.4.1	Down Syndrome	262
14.3	Pathology of the OCJ	256	14.4.2	Trauma to the OCJ	262
14.3.1	Primary/Congenital Conditions	256	14.5	Common Clinical Questions	266
14.3.2	Acquired Conditions	257	References	266	
14.3.3	Neoplasms	259	Answers to Common Clinical Questions	269	

15. The Cervical Spine	270		
<i>Lukas P. Zebala, Jacob M. Buchowski, Aditya R. Daftary, Joseph R. O'Brien, John A. Carrino, and A. Jay Khanna</i>			
15.1 Specialized Pulse Sequences and Imaging Protocols	270	15.4 Infectious Conditions	291
15.2 Traumatic Conditions	271	15.4.1 Cervical Vertebral Osteomyelitis and Diskitis...	293
15.2.1 Classification of Cervical Spine Trauma	271	15.4.2 Epidural Abscess.....	293
15.2.2 OCJ Injuries.....	276	15.4.3 Intradural Infections	294
15.2.3 Vertebral Artery Injury.....	278	15.5 Other Pathologic Conditions	295
15.2.4 Penetrating Trauma.....	278	15.5.1 Tumors.....	295
15.2.5 Characterization of Spinal Cord Injury.....	278	15.5.2 Intrinsic Inflammatory Myelopathies	295
15.2.6 Characterization of Cervical Spine Instability...	280	15.5.3 Arthritides.....	296
15.3 Degenerative Conditions	282	15.6 Common Clinical Questions	298
15.3.1 Degenerative Disk Disease.....	282	References	298
15.3.2 Disk Displacement.....	283	Answers to Common Clinical Questions	300
15.3.3 Spinal Stenosis.....	286		
15.3.4 Rheumatoid Arthritis	290		
16. The Lumbar and Thoracic Spine	302		
<i>Gbolahan O. Okubadejo, Aditya R. Daftary, Jacob M. Buchowski, John A. Carrino, and A. Jay Khanna</i>			
16.1 Specialized Pulse Sequences and Imaging Protocols	302	16.5.1 Vertebral Osteomyelitis.....	333
16.2 Traumatic Conditions	303	16.5.2 Diskitis.....	334
16.2.1 Classification of Thoracolumbar Spine Trauma	303	16.5.3 Epidural Abscess.....	334
16.2.2 Role of MRI in Thoracolumbar Spine Trauma ...	304	16.5.4 Tuberculosis.....	335
16.3 Nomenclature and Classification of Lumbar Disk Pathology	310	16.6 Postoperative MRI Findings	336
16.4 Degenerative Conditions	312	16.6.1 After Decompression without Instrumentation/ Fusion.....	336
16.4.1 Disks and End Plates.....	314	16.6.2 After Instrumentation/Fusion.....	339
16.4.2 Facets.....	320	16.6.3 Hematoma.....	339
16.4.3 Lumbar Spinal Stenosis.....	327	16.6.4 Pseudomeningocele.....	339
16.4.4 Cauda Equina Syndrome	330	16.6.5 Arachnoiditis.....	341
16.4.5 Spondylolisthesis.....	330	16.7 Common Clinical Questions	342
16.4.6 Scoliosis	331	References	342
16.4.7 Epidural Lipomatosis	333	Answers to Common Clinical Questions	345
16.5 Infectious Conditions	333		
17. MRI of the Pediatric Spine	347		
<i>A. Jay Khanna, Bruce A. Wasserman, and Paul D. Sponseller</i>			
17.1 Specialized Pulse Sequences and Imaging Protocols	347	17.3.1 Adolescents and Adults	348
17.2 Pediatric Sedation Protocols	347	17.3.2 Children	349
17.3 Normal Pediatric MRI Anatomy	348	17.3.3 Conus Medullaris	349
		17.4 Pathologic Processes Involving the Pediatric Spine	349

17.4.1	Infection.....	349	17.6.1	Scoliosis.....	355
17.4.2	Trauma.....	350	17.6.2	Evaluation of the Tethered Cord Syndrome.....	356
			17.6.3	Imaging in the Presence of Implants.....	356
17.5	Imaging of Spinal Dysraphism.....	352	17.7	Common Clinical Questions.....	356
17.5.1	Chiari Malformations.....	354	References.....	357	
17.5.2	Tethered Cord Syndrome.....	354	Answers to Common Clinical Questions.....	358	
17.6	Controversies with MRI of the Pediatric Spine.....	355			
18.	MRI of the Peripheral Nervous System.....	359			
	<i>Shivani Ahlawat and Laura M. Fayad</i>				
18.1	Technical Considerations.....	359	18.5	Common Clinical Questions.....	365
18.2	Nerve Anatomy.....	360	References.....	366	
18.3	Nerve Abnormalities.....	360	Answers to Common Clinical Questions.....	366	
18.4	Accuracy and Effect of MRI of the Peripheral Nerves.....	365			
Part V: Tumors					
19.	Soft-Tissue Tumors.....	369			
	<i>Carol D. Morris, Adam S. Levin, Raj M. Amin, and Laura M. Fayad</i>				
19.1	Introduction.....	369	19.2.7	Reactive Lesions.....	373
19.2	Benign Tumors.....	370	19.3	Malignant Tumors.....	375
19.2.1	Lipoma.....	370	19.3.1	Soft-Tissue Sarcoma.....	375
19.2.2	Ganglion Cyst.....	370	19.3.2	Lymphoma.....	377
19.2.3	Hemangioma.....	370	19.3.3	Metastatic Carcinoma.....	377
19.2.4	Neurofibroma.....	371	19.4	Summary.....	378
19.2.5	Schwannoma.....	372	References.....	378	
19.2.6	Tenosynovial Giant Cell Tumor/Pigmented Villonodular Synovitis.....	373			
20.	Bone Tumors.....	381			
	<i>Keith T. Aziz, Jonathan A. Forsberg, Edward F. McCarthy, Laura M. Fayad, Carol D. Morris, and Adam S. Levin</i>				
20.1	Introduction.....	381	20.2.10	NOF.....	388
20.2	Benign Tumors.....	381	20.2.11	Fibrous Dysplasia.....	388
20.2.1	Osteoid Osteoma.....	381	20.3	Malignant Tumors.....	389
20.2.2	Osteoblastoma.....	382	20.3.1	Osteosarcoma.....	389
20.2.3	Chondroblastoma.....	382	20.3.2	Ewing Sarcoma.....	390
20.2.4	Periosteal Chondroma.....	383	20.3.3	Chondrosarcoma.....	390
20.2.5	Enchondroma.....	383	20.4	Common Clinical Questions.....	392
20.2.6	Osteochondroma.....	384	References.....	392
