

Nerve Surgery

Second Edition

Susan E. Mackinnon, MD

Minot Packer Fryer Professor of Plastic Surgery
Division of Plastic and Reconstructive Surgery;
Director of the Center for Nerve Injury and Paralysis;
Professor of Plastic and Reconstructive Surgery
Washington University School of Medicine
St. Louis, Missouri, USA

Contributing Editors

J. Megan M. Patterson, MD

Professor and Division Chief of Hand and Microsurgery
Director of Peripheral Nerve Center
Department of Orthopaedic Surgery
UNC School of Medicine at Chapel Hill
Chapel Hill, North Carolina, USA

Sami Tuffaha, MD

Associate Professor;
Director, Peripheral Nerve Surgery
Department of Plastic and Reconstructive Surgery
Johns Hopkins University School of Medicine
Baltimore, Maryland, USA

1204 Illustrations

Preface to the Second Edition	xix
Preface to the First Edition	xx
Acknowledgments to the Second Edition	xxii
Acknowledgments to the First Edition	xxiii
Contributors	xxiv
1. Nerve Surgery: Historical Perspectives	1
<i>Thomas H. Tung, Erica B. Lee, Kitty Y. Wu, and Thomas M. Brushart</i>	
1.1 Introduction	1
1.2 Ancient Theories: From Animal Spirits to Electricity	1
1.3 Nerve Injury and Regeneration	2
1.4 Primary Nerve Repairs	4
1.5 Nerve Grafting	5
1.6 Nerve Entrapment	6
1.7 Nerve Transfers	7
1.8 Conclusion	8
2. Anatomy and Physiology for the Nerve Surgeon	12
<i>Matthew D. Wood and Albina Jablonka-Shariff</i>	
2.1 Introduction	12
2.2 Nerve Fiber Anatomy	12
2.2.1 Fascicular Anatomy	12
2.3 The Basics of Nerve Injury	15
2.3.1 Mechanisms of Nerve Injury Level of Injury	17
2.3.2 Classifying Nerve Injury	17
2.4 Injection Nerve Injury	19
2.5 Mechanisms of Neurodegeneration	20
2.6 Transcriptional Control of Nerve Regeneration	23
2.7 Schwann Cell–Based Signaling in Peripheral Nerve Injury	24
2.8 Regeneration across a Nerve Gap	25
2.9 Extracellular Matrix Molecules in Nerve Regeneration	26
2.10 Neurotrophins and Neurotrophic Factors in Nerve Regeneration	28
2.11 Preferential Motor Reinnervation	29
2.12 Axonal Transport	30
2.13 Nerve Blood Supply	32
2.14 Accelerated Nerve Regeneration and FK-506 (Tacrolimus)	32
2.15 Electrical Stimulation and Nerve Regeneration	34
2.16 End-to-Side and Supercharge End-to-Side Nerve Transfer	38
2.17 Neuromuscular Anatomy and Physiology at the Neuromuscular Junction	40
2.17.1 Pathophysiology of Compression Neuropathy	43
2.17.2 Transcutaneous Peripheral Nerve Imaging	47

3.	Evaluation of the Patient with Nerve Injury or Nerve Compression	60		
	<i>Christine B. Novak</i>			
3.1	Introduction	60	3.4	Evaluation of Muscle Imbalance and Neural Mobility
3.2	Sensory and Motor Nerve Assessment	60	3.5	Patient-Reported Assessment
3.2.1	Sensory Evaluation	60	3.5.1	Pain Evaluation
3.2.2	Motor Evaluation	70	3.5.2	Self-Report Questionnaires
3.2.3	Grading Systems	71	3.6	Conclusion
3.3	Test Selection	71		
4.	The Electrodiagnostic Examination of Nerve Injuries	80		
	<i>Robert C. Bucelli, Stahs Pripotnev, and Muhammad Al-Lozi</i>			
4.1	Introduction	80	4.5	Important Limitations of the Electrodiagnostic Examination
4.2	Pertinent Anatomy	81	4.6	The Electrodiagnostic Manifestations of Peripheral Nerve Injuries
4.3	Pertinent Pathology and Pathophysiology ..	81	4.6.1	Axon Loss
4.4	The Electrodiagnostic Examination	82	4.6.2	Focal Demyelination
4.4.1	Overview	82	4.7	Electrodiagnostic–Clinical Correlations
4.4.2	Nerve Conduction Studies	82	4.8	The Differences between Lesions of Varying Onset and Severity
4.4.3	Evoked Response Parameters	82	4.8.1	The Proper Application of Electrodiagnostic Studies
4.4.4	Amplitude	83	4.9	Prognosis
4.4.5	Area	83	4.10	Clinical Comments
4.4.6	Latency	83	4.11	Conclusion
4.4.7	Conduction Velocity	84		
4.4.8	Duration	84		
4.4.9	Sensory Nerve Conduction Studies	84		
4.4.10	Motor Nerve Conduction Studies	84		
4.4.11	Mixed Nerve Conduction Studies	85		
4.4.12	Electromyography (Needle Electrode Examination)	85		
5.	Nerve Repair and Grafting	102		
	<i>David M. Brogan, Anna Rose Johnson, and Christopher J. Dy</i>			
5.1	Introduction	102	5.4.3	Effect of Tension on Nerve Repair
5.2	Nerve Injuries	102	5.4.4	Addressing a Nerve Gap
5.2.1	Degree of Nerve Injury	102	5.5	Nerve Conduits
5.2.2	Mechanism of Nerve Injury	103	5.6	Nerve Grafting
5.2.3	Level of Nerve Injury	108	5.6.1	Autograft
5.2.4	Patient Factors Affecting Outcomes	108	5.6.2	Allograft
5.3	Evaluation of Nerve Injury	109	5.6.3	Acellularized Nerve Allograft
5.4	Nerve Repair	109	5.7	Specific Examples of Upper Extremity Nerve Repair and Grafting
5.4.1	Timing of Nerve Repair	109	5.7.1	High Ulnar Nerve Injury
5.4.2	Type of Nerve Repair	109		

5.7.2	High Median Nerve Injury	120	5.9	Conclusion	128
5.7.3	Radial Nerve Injury	125			
5.8	Postoperative Rehabilitation	125			
6.	Nerve Transfers for the Forearm and Hand				132
	<i>Hollie A. Power and J. Megan M. Patterson</i>				
6.1	Introduction	132	6.4.1	Thumb Opposition	152
6.2	Nerve Transfers for the Forearm and Hand ..	133	6.4.2	Median Nerve Sensory Restoration	154
6.2.1	Principles and Indications for Nerve Transfers	133	6.4.3	Forearm Pronation and Wrist/Finger Flexion ..	159
6.2.2	Perioperative Assessment and Pearls	137	6.5	Ulnar Nerve Injury: Lack of Intrinsic Muscle Function and Ulnar Sensory Loss	175
6.3	Radial Nerve Injury: Lack of Wrist and Finger Extension	138	6.5.1	Ulnar Intrinsic Reinnervation	176
6.3.1	Median-to-Radial Nerve Transfer: Technique	143	6.5.2	Ulnar Nerve Sensory Restoration	184
6.3.2	Sensory Restoration in the Radial Nerve Distribution: Technique	151	6.6	Postoperative Care	190
6.4	Median Nerve Injury: Lack of Forearm Pronation, Thumb Opposition, and Finger Flexion	151	6.7	Conclusion	191
7.	Nerve Transfer Procedures for Tetraplegia				194
	<i>Ida K. Fox, Jana Dengler, and Emily M. Krauss</i>				
7.1	Introduction	194	7.5.3	Electrodiagnostic Testing and Imaging	206
7.2	Historical Perspective	194	7.5.4	Perioperative and Anesthetic Considerations ..	209
7.3	Pathophysiology	200	7.5.5	Options for Novel Nerve Transfer Treatment ..	209
7.4	Surgical Anatomy	201	7.6	Surgical Techniques	210
7.4.1	Nerve to the Deltoid Muscle Anatomy	202	7.6.1	General Principles and Positioning	210
7.4.2	Nerve to the Brachialis Muscle Anatomy	202	7.6.2	Nerves of Teres Minor to Triceps Transfer to Restore Elbow Extension (Anterior Approach) ..	211
7.4.3	Nerve to the Supinator and ECRB Muscles Anatomy	202	7.6.3	Nerves of Posterior Deltoid to Triceps Transfer to Restore Elbow Extension (Posterior Approach)	213
7.4.4	Nerve to the Triceps Muscles Anatomy	202	7.6.4	Nerve of Supinator to PIN Transfer to Restore Hand Opening	213
7.4.5	Relevant Median Nerve Anatomy	202	7.6.5	Nerves of Brachialis to Median Motor Transfer to Restore Hand Closing	214
7.4.6	Posterior Interosseous Nerve Anatomy	202	7.6.6	Postoperative Care	214
7.5	Evaluation and Management	202	7.7	Conclusion	215
7.5.1	History	202			
7.5.2	Physical Examination	206			
8.	Nerve Autograft Substitutes: Processed Allografts and Conduits				218
	<i>Blair R. Peters, Matthew D. Wood, and Sami Tuffaha</i>				
8.1	Introduction	218	8.3	Nerve Conduits: Experimental and Clinical Evidence	219
8.2	Nerve Conduits: Ideal Characteristics and Physiology	218	8.3.1	Polyglycolic Acid (PGA) Conduit	219
			8.3.2	Poly(DL-lactide-ε-caprolactone) Conduit	224

8.3.3	Collagen Conduits.....	224	8.7	Future Directions.....	241
8.4	Direct Comparisons of Conduits.....	225	8.8	Conclusion: Recommendations for Conduit and ANA Use.....	244
8.5	Acellularized Nerve Allografts.....	226			
8.6	Expanding the Indications of Nerve Substitute Use.....	233			
9.	Median Nerve Entrapment and Injury				252
	<i>Stephanie A. Russo and J. Megan M. Patterson</i>				
9.1	Introduction.....	252	9.3.6	The Advantages of Open Carpal Tunnel Release.....	265
9.2	Anatomy of the Median Nerve.....	252	9.3.7	Outcomes.....	266
9.3	Carpal Tunnel Syndrome.....	255	9.3.8	Complications.....	268
9.3.1	Introduction.....	255	9.3.9	Revision Surgery.....	269
9.3.2	Clinical Presentation and Diagnosis.....	255	9.3.10	Operative Procedure.....	273
9.3.3	Etiology.....	261	9.4	Median Nerve Compression in the Proximal Forearm	277
9.3.4	Nonsurgical Treatment.....	262	9.5	Anterior Interosseous Nerve Palsy	280
9.3.5	Open versus Endoscopic Carpal Tunnel Release.....	263	9.6	Conclusion	292
10.	Ulnar Nerve Entrapment and Injury				297
	<i>J. Megan M. Patterson and Hollie A. Power</i>				
10.1	Introduction.....	297	10.5	Management of Cubital Tunnel Syndrome	310
10.2	Ulnar Nerve Anatomy.....	297	10.5.1	Nonoperative Management.....	310
10.2.1	Course and Internal Topography.....	297	10.5.2	Operative Management.....	311
10.2.2	Blood Supply.....	299	10.5.3	Complications.....	319
10.2.3	Anatomical Variations.....	300	10.5.4	Outcomes and Comparative Studies.....	319
10.3	Etiology and Pathophysiology of Ulnar Nerve Compression	301	10.6	Management of Compression at the Guyon Canal	321
10.3.1	Ulnar Nerve Compression Proximal to the Elbow (Arcade of Struthers).....	301	10.6.1	Nonoperative Management.....	321
10.3.2	Cubital Tunnel Syndrome.....	302	10.6.2	Operative Management.....	321
10.3.3	Ulnar Nerve Compression at the Forearm and Wrist.....	303	10.6.3	Complications.....	322
10.4	Evaluation of a Patient with Ulnar Nerve Compression	305	10.6.4	Outcomes and Comparative Studies.....	322
10.4.1	History.....	305	10.7	Ulnar Nerve Compression at Multiple Sites ...	323
10.4.2	Pain Questionnaire.....	307	10.8	Failed Decompression	323
10.4.3	Physical Examination.....	307	10.8.1	Recurrent Cubital Tunnel Syndrome.....	326
10.4.4	Provocative Testing.....	309	10.8.2	Recurrent Guyon Canal Release.....	329
10.4.5	Electrodiagnostic Studies.....	309	10.9	Nerve Transfers to Supercharge Recovery ...	329
10.4.6	Imaging.....	310	10.10	Electrical Stimulation to Enhance Nerve Recovery	331
10.4.7	Classification of Disease Severity.....	310	10.11	Conclusion	332

11. Radial Nerve and Axillary Nerve Entrapment and Injury	343		
<i>Elspeth J.R. Hill, J. Megan M. Patterson, and Brendan M. Patterson</i>			
11.1 Radial Nerve Entrapment and Injury:		11.2 Axillary Nerve Entrapment and Injury:	
Introduction	343	Introduction	362
11.1.1 Historical Perspective	343	11.2.1 Key Surgical Anatomy	363
11.1.2 Etiology of Radial Neuropathy	343	11.2.2 Etiology of Axillary Neuropathy	363
11.1.3 Surgical Anatomy	345	11.2.3 Diagnosis and Physical Examination	365
11.1.4 Diagnosis and Physical Examination	345	11.2.4 Management of Axillary Nerve Palsy	365
11.1.5 Posterior Interosseous Nerve Compression (Radial Tunnel Syndrome)	347	11.2.5 Open Axillary Nerve Injury	365
11.1.6 Management of Radial Nerve Palsy	347	11.2.6 Closed Axillary Nerve Injury	366
11.1.7 Surgical Options	348	11.2.7 Surgical Management of Axillary Nerve Injury	367
11.1.8 Surgical Techniques for Decompression	348	11.2.8 Postoperative Care for Axillary Nerve Transfers	367
11.1.9 Surgical Techniques for Radial Nerve Repair	351	11.2.9 Results	367
11.1.10 Postoperative Care for Radial Nerve Decompression	356	11.2.10 Conclusion	369
11.1.11 Results	356		
11.1.12 Conclusion	362		
12. Thoracic Outlet Syndrome	373		
<i>Renee Ivens and Amy M. Moore</i>			
12.1 Introduction	373	12.4.2 Vascular Thoracic Outlet Syndrome	384
12.2 History	373	12.5 Management	385
12.3 Anatomy and Pathophysiology	374	12.5.1 Physical Therapy	385
12.4 Diagnosis	376	12.5.2 Surgical Treatment	387
12.4.1 Neurogenic Thoracic Outlet Syndrome	376	12.6 Conclusion	395
13. Lower Extremity Nerve Injury, Compression, and Transfers	399		
<i>Stephanie A. Russo and Thomas H. Tung</i>			
13.1 Introduction	399	13.9.1 Historical Review	403
13.2 Historical Review	399	13.9.2 Surgical Anatomy	403
13.3 Surgical Anatomy of the Lumbosacral Plexus	399	13.9.3 Diagnosis	404
13.4 Etiology of Lumbosacral Plexopathy	401	13.9.4 Surgical Technique	404
13.5 Nonsurgical Etiologies	401	13.9.5 Results	406
13.6 Vascular Etiologies	402	13.10 Meralgia Paresthetica	406
13.7 Neoplastic Processes	402	13.10.1 Historical Review	406
13.8 Lumbosacral Trauma	402	13.10.2 Surgical Anatomy	406
13.9 The "Border Nerves": Iliohypogastric, Ilioinguinal, and Genitofemoral	403	13.10.3 Diagnosis	406
		13.10.4 Surgical Technique	406
		13.10.5 Results	407
		13.11 Femoral Nerve	407
		13.11.1 Historical Review	407
		13.11.2 Surgical Anatomy	408
		13.11.3 Diagnosis	408

13.11.4	Surgery.....	408	13.16.4	Surgical Technique.....	429
13.11.5	Results	408	13.16.5	Results	430
13.12	Saphenous Nerve	408	13.17	Sural Nerve	430
13.12.1	Historical	408	13.17.1	Historical Review	430
13.12.2	Surgical Anatomy	408	13.17.2	Surgical Anatomy.....	431
13.12.3	Diagnosis	409	13.17.3	Diagnosis.....	432
13.12.4	Surgery.....	409	13.17.4	Surgical Technique.....	432
13.12.5	Results	410	13.17.5	Results	432
13.13	Obturator Nerve	410	13.18	Tibial Nerve	432
13.13.1	Historical Review	410	13.18.1	Historical Review.....	432
13.13.2	Surgical Anatomy	411	13.18.2	Surgical Anatomy.....	433
13.13.3	Diagnosis	412	13.18.3	Surgical Technique.....	433
13.13.4	Surgery.....	412	13.19	Tarsal Tunnel Syndrome	433
13.13.5	Results	413	13.19.1	Historical Review.....	433
13.14	Common Peroneal Nerve	413	13.19.2	Surgical Anatomy.....	435
13.14.1	Historical Review	413	13.19.3	Diagnosis.....	436
13.14.2	Surgical Anatomy	414	13.19.4	Surgical Technique.....	438
13.14.3	Diagnosis	416	13.20	Morton Neuroma	439
13.14.4	Surgical Technique.....	416	13.20.1	Historical Review.....	439
13.14.5	Results	422	13.20.2	Surgical Anatomy.....	439
13.15	Superficial Peroneal Entrapment	422	13.20.3	Diagnosis.....	440
13.15.1	Historical Review	422	13.20.4	Surgical Technique.....	447
13.15.2	Surgical Anatomy	422	13.21	Nerve Transfers	447
13.15.3	Diagnosis	422	13.21.1	Restoration of Femoral Nerve Function	449
13.15.4	Surgical Technique.....	423	13.21.2	Restoration of Tibial Nerve Function.....	452
13.15.5	Results	429	13.21.3	Other Lower Extremity Reconstructive Procedures	452
13.16	Deep Peroneal Nerve	429	13.22	Conclusion	453
13.16.1	Historical Review	429			
13.16.2	Surgical Anatomy	429			
13.16.3	Diagnosis	429			
14.	Brachial Plexus Injuries	456			
	<i>Stahs Pripotnev and Thomas H. Tung</i>				
14.1	Introduction	456	14.4.3	Principles of Management	468
14.2	Historical Review	456	14.4.4	Shoulder Function	486
14.3	Surgical Anatomy	457	14.4.5	Triceps Function.....	499
14.4	Epidemiology and Classification	463	14.4.6	Hand Function	499
14.4.1	Epidemiology	463	14.4.7	Other Specific Procedures to Restore Hand Function	501
14.4.2	Diagnosis	465	14.4.8	Postoperative Management	508
			14.4.9	Outcomes	509
			14.5	Conclusion	530

15. Brachial Plexus Birth Injury	535		
<i>Kristen Davidge and Alison K. Snyder-Warwick</i>			
15.1 Introduction	535	15.7.1 Operative Preparations	539
15.2 Etiology	535	15.7.2 Sural Nerve Harvest	539
15.3 Nomenclature	536	15.7.3 Exposure of the Brachial Plexus	539
15.4 Evaluation	536	15.7.4 Neuroma Resection	540
15.4.1 Perinatal History	536	15.7.5 Reconstruction of the Brachial Plexus	540
15.4.2 Physical Examination	537	15.7.6 Postoperative Management	543
15.5 Preoperative Planning	538	15.8 Adjunctive Management	543
15.6 Indications for Primary Brachial Plexus Exploration	538	15.9 Outcomes	544
15.6.1 Preoperative Radiologic Evaluation	539	15.9.1 Outcome Assessment	544
15.7 Operative Management: Brachial Plexus Exploration, Nerve Grafting, and Nerve Transfers	539	15.9.2 Outcomes of Neurolysis versus Neuroma Resection and Interpositional Nerve Grafting	544
		15.9.3 Outcomes of Nerve Transfers	546
		15.9.4 Sensory Outcomes	547
		15.9.5 Global Functioning and Patient-Reported Outcomes	548
		15.10 Conclusion	548
16. Facial Nerve Injury	552		
<i>Alison K. Snyder-Warwick and Johnny Chuieng-Yi Lu</i>			
16.1 Introduction	552	16.5.1 Technique	559
16.2 Etiology	552	16.5.2 Regional Considerations	560
16.3 Anatomical Considerations	552	16.5.3 The Nasolabial Fold	563
16.3.1 Facial Nerve	552	16.6 Rehabilitation	570
16.3.2 Facial Muscles	554	16.6.1 Neuromuscular Reeducation	571
16.4 Evaluation	556	16.6.2 Patient Treatment	571
16.5 Management	558	16.6.3 Postoperative Neuromuscular Retraining	572
		16.7 Conclusion	573
17. Postoperative Rehabilitation of Nerve Transfers	576		
<i>Amy M. Young and Christine B. Novak</i>			
17.1 Introduction	576	17.3 Sensorimotor Re-education Strategies	577
17.1.1 Role of Neuroplasticity	576	17.3.1 Early Phase	577
17.2 Nerve Transfer Rehabilitation	576	17.3.2 Middle Phase	582
17.2.1 Preoperative Phase	576	17.3.3 Late Phase	583
17.2.2 Acute Postoperative Phase	577	17.3.4 Psychosocial Aspects of Care	584
		17.4 Conclusion	584

18. Tendon Transfers for Functional Reconstruction	586		
<i>Mitchell A. Pet, J. Megan M. Patterson, and Christopher J. Dy</i>			
18.1 Introduction	586	18.3.2 Tendon Transfers for Median Nerve Palsy	592
18.2 History	586	18.3.3 Tendon Transfers for Radial Nerve Palsy	598
18.3 Principles of Tendon Transfer	586	18.3.4 Tendon Transfers for Elbow Function	611
18.3.1 Tendon Transfers for Ulnar Nerve Palsy.....	589	18.4 Conclusion	613
19. Tumors of the Peripheral Nervous System	615		
<i>Damiano Giuseppe Barone and Robert J. Spinner</i>			
19.1 Introduction	615	19.3 Neoplasms of Nonneural Origin	643
19.2 Neoplasms of Nerve Sheath Origin	616	19.3.1 Adipose Lesions of Nerve.....	643
19.2.1 Historical Background.....	616	19.3.2 Intra-neural Ganglion Cysts.....	654
19.2.2 Schwannoma.....	616	19.3.3 Intra-neural Perineuriomas.....	654
19.2.3 Neurofibromatoses.....	621	19.3.4 Extrinsic Tumors Compressing Nerve.....	658
19.2.4 Neurofibroma.....	627	19.4 Conclusion	662
19.2.5 Granular Cell Tumors.....	630		
19.2.6 Malignant Peripheral Nerve Sheath Tumors....	630		
20. Surgical Management of Chronic Headaches, Migraines, and Neuralgias	665		
<i>Ivica Ducic, Lisa Gfrerer, and John M. Felder</i>			
20.1 Introduction	665	20.3.1 Peripheral and Central Sensitization Role in Triggering and Maintaining Chronic Headaches and Migraine Headaches.....	670
20.1.1 Migraine Headache.....	666	20.4 Diagnostic Evaluation and Workup	671
20.1.2 Frontotemporal Trigeminal Neuralgia.....	667	20.5 Surgical Technique	673
20.1.3 Occipital Neuralgia.....	667	20.5.1 Patients with Frontal or Temporal Neuralgia-Related <i>Chronic Headaches</i>	673
20.2 Anatomy	667	20.5.2 Patients with Occipital Neuralgia-Related Chronic Headaches.....	675
20.2.1 Supraorbital, Supratrochlear, and Infratrochlear Nerves.....	667	20.6 Discussion	677
20.2.2 Zygomaticotemporal and Auriculotemporal Nerves.....	668	20.7 Conclusion	682
20.2.3 Greater, Lesser, and Dorsal Occipital Nerves.....	669		
20.3 Pathophysiology	670		
21. Painful Sequelae of Nerve Injuries	686		
<i>Sami Tuffaha, John M. Felder, Jason H. Ko, and Emily M. Krauss</i>			
21.1 Introduction	686	21.3.1 Neuromatous Pain Overview.....	689
21.2 Normal Pain Response	686	21.3.2 Pain Syndromes.....	698
21.2.1 Physiology.....	686	21.3.3 Diagnosis of Complex Regional Pain Syndrome.....	706
21.2.2 Treatment.....	688	21.3.4 Treatment of Complex Regional Pain Syndrome... ..	711
21.3 Approach to the Abnormal Pain Response	688	21.4 Controversy	715
		21.5 Conclusion	716

22. Dissemination and Implementation Science in Nerve Surgery	720		
<i>William M. Padovano, Andrew Yee, Jana Dengler, and Kristen Davidge</i>			
22.1 Introduction	720	22.6 Example of Dissemination and Implementation in Nerve Surgery: Increasing Access to Nerve Transfer Surgery in Spinal Cord Injury	724
22.2 Definitions	721	22.6.1 Background	724
22.3 Importance of Dissemination and Implementation Science to Nerve Surgery ...	721	22.6.2 Contextual Assessment: Provider Barriers to Nerve Transfer Surgery in SCI	724
22.4 Historical Roots	722	22.6.3 Implementation Strategies	726
22.5 Elements of a Dissemination and Implementation Study	723	22.7 Dissemination and Implementation Using Educational Approaches	727
		22.8 Conclusions	729
Key References			731
