

Hydrogen Regulation in Europe

*Emerging Issues and Best Practices for the
Clean Energy Transition*

Edited by

RUVEN FLEMING

*Associate Professor and Scientific Coordinator of the Groningen Center of
Energy Law and Sustainability, University of Groningen*

OXFORD
UNIVERSITY PRESS

Contents

<i>Table of Cases</i>	xiii
<i>Table of Legislation</i>	xv
<i>International Instruments</i>	xxix
<i>List of Abbreviations</i>	xxxix
<i>Editor and Author Biographies</i>	xxxiii
I. Introduction	1
<i>Ruven Fleming</i>	
1. Introduction	1
2. Critical Key Observations	3
3. Literature Review on Hydrogen Regulation in Europe	4
4. The Contribution of this Book	11
5. Conclusion	13
PART 1 HYDROGEN UPSTREAM: PERMITTING REGIMES FOR ELECTROLYSERS	
II. The Netherlands	17
<i>Yegor Osipov-Gipsh and Jeanette Maria Jansen</i>	
1. Introduction	17
2. General Observations on the Permitting Regime	18
3. Specific Permits Applicable to Electrolysers	20
4. Recommendations to Improve the System	32
5. Conclusion	33
Appendix	33
Further Reading	34
III. Denmark	35
<i>Emilie Victoria Nørgaard Elkjær</i>	
1. Introduction	35
2. General Observations on the Permitting Regime	38
3. Specific Permits Applicable to Electrolysers	40
4. Recommendations to Improve the System	49
5. Conclusion	50
Further Reading	51
IV. Germany	52
<i>Ruven Fleming</i>	
1. Introduction	52
2. General Observations on the Permitting Regime	53
3. Specific Permits Applicable to Electrolysers	54
4. Recommendations to Improve the System	65
5. Conclusion	66

X CONTENTS

Appendix	67
Further Reading	69
V. Poland	70
<i>Maciej Owidzki</i>	
1. Introduction	70
2. General Observations on the Permitting Regime	71
3. Specific Permits Applicable to Electrolysers	72
4. Recommendations to Improve the System	86
5. Conclusion	87
Further Reading	88
VI. Spain	89
<i>Íñigo del Guayo and Laura Bucher</i>	
1. Introduction	89
2. General Observations on the Permitting Regime	91
3. Specific Permits Applicable to Electrolysers	93
4. Recommendations to Improve the System	106
5. Conclusion	107
Appendix	108
VII. Italy	111
<i>Giovanni Volpi</i>	
1. Introduction	111
2. General Observations on the Permitting Regime	112
3. Specific Permits Applicable to Electrolysers	114
4. Recommendations to Improve the System	128
5. Conclusion	130
Further Reading	131
VIII. Greece	132
<i>Konstantinos Kounelis and Dimitra Douka</i>	
1. Introduction	132
2. General Observations on the Permitting Regime	133
3. Specific Permits Applicable to Electrolysers	135
4. Recommendations to Improve the System	151
5. Conclusion	151
Further Reading	152
IX. United Kingdom—England and Wales	153
<i>Silke Goldberg and Martyn Jarvis</i>	
1. Introduction	153
2. The Role of Hydrogen in the UK Decarbonization Strategy	154
3. Planning Permission and Development Consent	156
4. Environmental Impact Assessment	162
5. Other Planning Consenting Routes—Development Orders	164
6. Other Permits and Authorizations	165
7. Conclusion	170
Further Reading	172

PART 2 HYDROGEN DOWNSTREAM:
KEY REGULATORY ISSUES

X.	Repurposing Offshore Oil and Gas Infrastructure for Hydrogen Production	177
	<i>Diomidis Afentoulis, Torhild Nordtveidt, and Ignacio Herrera Anchustegui</i>	
	1. Introduction	177
	2. The Norwegian Offshore Energy Landscape: Between Oil and Gas and Hydrogen	178
	3. What Do We Mean by Reusing Offshore Hydrocarbon Infrastructure for Hydrogen Development?	179
	4. Supranational Challenges in Reusing Hydrocarbon Infrastructure for Offshore Hydrogen Production	182
	5. Norwegian Legal Challenges When Reusing Infrastructure for Hydrogen Production	184
	6. Conclusion	192
	Acknowledgements	193
	Further Reading	193
XI.	Decarbonizing Gas Infrastructure with Hydrogen: Overview of the Permitting Regime for Hydrogen Pipelines in Poland	194
	<i>Monika Radomska</i>	
	1. Introduction	194
	2. Brief Overview of the Polish Administrative Landscape	199
	3. Local Spatial Development Plan (Local Plan)/Decision on Location of a Public Purpose Investment (Decision on the Location)	199
	4. Decision on the Environmental Conditions	202
	5. Construction Permit	205
	6. Recommendations	208
	7. Conclusion	210
	Further Reading	211
XII.	Legal Barriers in the Dutch Permitting Regime for the Rollout of Hydrogen for Industrial High-Temperature Heating Processes	213
	<i>Jeanette Maria Jansen</i>	
	1. Introduction	213
	2. Scope and Characteristics	216
	3. ‘The’ Dutch Permitting Regime for Hydrogen Use in High-Temperature Heating Processes	219
	4. Recommendations: Overcoming Legal Barriers in the Dutch Permitting Regime	228
	5. Conclusion	231
	Acknowledgements	232
	Further Reading	232
XIII.	Conclusion	233
	<i>Ruven Fleming</i>	
	1. Introduction	233
	2. Key Observations on Hydrogen Regulation in Europe	234
	3. Conclusion	239
	<i>Index</i>	241
