

Energy Communities

Customer-Centered, Market-Driven, Welfare-Enhancing?

Edited by

Sabine Löbbe

**Professor for Energy Economics, Reutlingen
Center for Distributed Energy Systems and
Energy Efficiency,
Reutlingen, Germany**

Fereidoon Sioshansi

**President, Menlo Energy Economics,
San Francisco, CA, United States**

David Robinson

**Senior Research Fellow,
Oxford Institute for Energy Studies,
Oxford, United Kingdom**

Author biographies	xiii
Foreword	xxxi
Introduction	xxxiii
Part One The concept of energy communities and their regulatory framework	1
1 A taxonomy of energy communities in liberalized energy systems	3
<i>Nicolò Rossetto, Stefano F. Verde and Thomas Bauwens</i>	
1. Introduction	3
2. A heterogeneous set of collective actors	4
3. A taxonomy to inform policy and regulatory debates	6
4. Well-established energy communities	7
5. New kids on the block	14
6. Conclusions	21
Acknowledgment	22
Bibliography	22
2 The EU policy framework for energy communities	25
<i>Deyana Spasova and Sibylle Braungardt</i>	
1. Introduction	25
2. RECs versus CECs	27
3. Other relevant policy developments	32
4. Energy communities in European Member States	33
5. Conclusions	39
Bibliography	40
Further reading	42
3 Energy communities: a U.S. regulatory perspective	43
<i>R. Bruce Williamson</i>	
1. Introduction	43
2. The regulator, the legislator, and the North American regulatory policy framework	45
3. Evaluating EC entry in already served markets	48
4. Can ECs be “market driven” and “welfare enhancing”?	52
5. Conclusions	54
Bibliography	56

4	Developing a legal framework for energy communities beyond energy law	59
	<i>Job Swens and Lea Diestelmeier</i>	
1.	Introduction	59
2.	EU law on the purpose of energy communities	61
3.	The energy community “ <i>Schoonschip</i> ” in Amsterdam	61
4.	In search of novel legislation for energy communities	64
5.	The way forward: transposing EU law on energy communities in the Netherlands	68
6.	Conclusion	70
	References	71
5	Alignment of energy community incentives with electricity system benefits in Spain	73
	<i>David Robinson and Iñigo del Guayo</i>	
1.	Introduction	73
2.	Analytical framework	74
3.	Current legislation	75
4.	Factors potentially favoring alignment	81
5.	Factors that potentially do not favor alignment	87
6.	Assessment and recommendations	91
	Bibliography	93
6	The “virtual” model for collective self-consumption in Italy	95
	<i>Luca Lo Schiavo, Andrea Galliani and Arianna Rossi</i>	
1.	Introduction	95
2.	Legislative and regulatory framework	96
3.	The Italian pilot regulation for collective self-consumption	99
4.	Conclusions	103
	Annex A	104
	Bibliography	106
7	Energy communities: a North American perspective	107
	<i>Mark Kolesar</i>	
1.	Introduction	107
2.	What is an energy community?	109
3.	Energy communities in North America	109
4.	The North American policy landscape	121
5.	Conclusions	126
	Bibliography	127
	Further reading	128

8	Energy communities: challenges for regulators and policymakers	131
	<i>Darryl Biggar and Mohammad Reza Hesamzadeh</i>	
1.	Introduction	131
2.	Preliminaries	133
3.	Regulatory challenges arising from energy communities	140
4.	Conclusions	145
	Appendix	147
	References	149
 Part Two The appeal of energy communities to customers and citizens		 151
9	What motivates private households to participate in energy communities? A literature review and German case study	153
	<i>André Hackbarth and Sabine Löbbe</i>	
1.	Introduction	153
2.	Preferences for energy communities identified in the scientific literature	154
3.	Preferences for energy communities identified in a German case study	156
4.	Motivations to participate in energy communities	161
5.	Conclusions	163
	References	165
10	Community energy initiatives as a space for emerging imaginaries? Experiences from Switzerland	167
	<i>Benjamin Schmid, Mònica Serlavós and Léon Francis Hirt</i>	
1.	Introduction	167
2.	The Swiss context	168
3.	Applying the concept of sociotechnical imaginary to Swiss community energy initiatives	170
4.	Evidence of emerging sociotechnical imaginaries	172
5.	Reflecting on community energy from a sociotechnical imaginaries perspective	177
6.	Conclusions	179
	Bibliography	179
11	The construction of a citizen-centered ecosystem for renewable energies in France	183
	<i>Pascale Château Terrisse, Hajar El Karmouni and Marion Maignan</i>	
1.	Introduction	183
2.	Background to Enercoop and Enercoop Languedoc Roussillon	185
3.	The Enercoop Languedoc Roussillon ecosystem: linking and empowering energy communities based on citizens' collectives	186
4.	The main organizing alternative characteristics of the ELR ecosystem	188

5.	Recommendations for building an alternative renewable energy ecosystem	190
6.	Conclusion: the appeal of energy communities to citizens	192
	Bibliography	193
12	Energy communities' social role in a just energy transition	195
	<i>Florian Hanke, Rachel Guyet and Mariëlle Feenstra</i>	
1.	Introduction	195
2.	Toward democratizing energy—energy communities' social role	196
3.	The energy justice framework	198
4.	Toward energy justice in energy communities	202
5.	Conclusion	205
	Bibliography	206
	Part Three Enabling technologies, community design, and business models	209
13	The digitalization of peer-to-peer electricity trading in energy communities	211
	<i>Emilio Ghiani, Mario Mureddu, Marco Galici, Matteo Troncia and Fabrizio Pilo</i>	
1.	Introduction	211
2.	Digital enablers for energy communities	213
3.	Distributed ledger technologies in P2P energy markets	217
4.	Local energy markets for energy communities	220
5.	LEC case study	220
6.	Conclusions	223
	Acknowledgments	224
	References	224
	Further reading	227
14	Enabling business models and grid stability: case studies from Germany	229
	<i>Simon Köppl, Elisabeth Springmann, Vincenz Regener and Andreas Weigand</i>	
1.	Introduction	229
2.	Levels of coordination within distributed energy systems: basis for energy communities?	231
3.	The big picture: how different coordination entities interact with each other	236
4.	Pros and cons of a “federated” system architecture	240
5.	Conclusion	241
	References	242

15	The path to energy communities via local energy management and digital customer care	245
	<i>Tina Hadler</i>	
	1. Introduction	245
	2. Roles and archetypes in energy communities	246
	3. Implementation of energy communities	251
	4. Case study of energy communities	256
	5. Conclusion	258
	References	259
16	Governing energy communities: the role of actors and expertise in business model innovation	261
	<i>Jake Barnes and Paula Hansen</i>	
	1. Introduction	261
	2. Business models and energy communities	262
	3. “Do it yourself” energy communities	265
	4. “Form an alliance” energy communities	267
	5. “Someone else does it for you” energy communities	269
	6. Conclusions	272
	Acknowledgments	273
	References	273
17	Grid-friendly clean energy communities and induced intracommunity cash flows through peer-to-peer trading	277
	<i>Reinhard Madlener and Robert Crump</i>	
	1. Introduction	277
	2. Methodology	279
	3. Scenarios considered	284
	4. Results	286
	5. Sensitivity analysis	296
	6. Conclusions	297
	References	298
	Further reading	301
18	Italian energy communities from a DSO’s perspective	303
	<i>Anita Del Pizzo, Giuseppe Montesano, Carlo Papa, Marina Artipoli and Mariangela Di Napoli</i>	
	1. Introduction	303
	2. Power distribution networks and DSOs in Italy	304
	3. Role of DSOs	305
	4. What incentives?	311
	5. The territorial extension of energy communities	313
	6. Conclusions	316
	Bibliography	316
	Further reading	316

19	Community energy design models in Brazil: from niches to mainstream	317
	<i>Richard L. Hochstetler and Paulo H.S. Born</i>	
	1. Introduction	317
	2. Energy community initiatives in Brazil	318
	3. Brazil's net metering program	322
	4. The future of energy communities in Brazil and their impact on social welfare	332
	5. Conclusions	335
	References	336
	Further reading	337
Part Four	Case studies and implementation	339
20	Institutional and policy context of energy communities in France and Italy: how to increase the welfare-enhancing capacity of the sector	341
	<i>Maksym Koltunov, Valentina-Miriam Cittati and Adriano Bisello</i>	
	1. Introduction	341
	2. The energy communities' movements in France and Italy	342
	3. The case studies: ECs from France and Italy	352
	4. How to increase the welfare-enhancing capacity of ECs	357
	Bibliography	359
21	Energy communities in Europe: a review of the Danish and German experiences	363
	<i>Simona Benedettini and Carlo Stagnaro</i>	
	1. Introduction	363
	2. The analytical framework	364
	3. Energy communities in Denmark	366
	4. Energy communities in Germany	372
	5. Conclusions	380
	References	382
22	Platform-based energy communities in Germany and their benefits and challenges	385
	<i>Christian Chudoba and Tereza Borges</i>	
	1. Introduction	385
	2. The historical development of energy communities in Germany	386
	3. Defining energy service providers	389
	4. The power of digital platforms	391
	5. The opportunities and threats for energy service providers	392
	6. Conclusion	396
	Bibliography	397

23	A community-based biomethane heat network: case study from Trier	399
	<i>Christoph Menke, Achim Hill, Matthias Gebauer, Rudi Schöller, Daniel Gregetz and David Lellinger</i>	
	1. Introduction	399
	2. How the idea got started	401
	3. Biomethane from biogas units for the CHP units	402
	4. Local heat network in downtown Trier	403
	5. Dynamic scenario simulator for interactive participation of residents	410
	6. Participation process for residents and stakeholders for building up an energy community	415
	7. Conclusions	416
	References	417
24	Establishing energy communities in postcommunist states: the case of Bulgaria	419
	<i>Toby D. Couture and Teodora Stoyanova</i>	
	1. Introduction	419
	2. Overview of the electricity sector in Bulgaria	420
	3. A brief history of the cooperative movement in Bulgaria	424
	4. Establishing energy communities in Bulgaria	427
	5. Conclusion	431
	References	432
	Further reading	433
25	Sustainable island energy systems: a case study of Tilos Island, Greece	435
	<i>Xin Li</i>	
	1. Introduction	435
	2. The TILOS project—a brief description	436
	3. Technology solutions in the TILOS project	439
	4. Local citizen engagement	440
	5. Summary of results and extended work beyond the TILOS project	443
	6. Conclusions	446
	Bibliography	446
	Epilogue	449
	Index	451
