## PREFACE

XV

## 1 INTRODUCTION TO COGNITIVE PSYCHOLOGY 1

- Chapter Introduction, 1
- Cognitive Psychology: Overview, 1
  - Origins of Cognitive Psychology, 4
    - Wilhelm Wundt, 4
    - Early Memory Researchers, 5
    - William James, 5
    - Behaviorism, 5
    - Edward Tolman, 6
    - The Gestalt Approach, 7
  - Cognitive Revolution, 7
  - Cognitive Psychology More Recently, 8
- Perspectives on Cognitive Psychology, 9
  - The Computer Metaphor of the Mind and Information Processing, 9
  - The Connectionist Approach, 11
  - Cognitive Neuroscience, 12
- Textbook Overview, 12
- Chapter Preview, 13
- Themes in the Book, 14
  - Theme 1: Cognitive processes are active, rather than passive, 14
  - Theme 2: Cognitive processes are remarkably efficient and accurate, 14
  - Theme 3: Cognitive processes handle positive information better than negative information, 14
  - Theme 4: Cognitive processes are interrelated with one another; they do not operate in isolation, 14
  - Theme 5: Many cognitive processes rely on both bottom-up and top-down processing, 15
- How to Use Your Book Effectively, 15
  - Chapter Outline, 15
  - Chapter Introductions, 15
  - Demonstrations, 15
  - “Focus on Methodology” Boxes, 16
  - Application, 16
  - Section Summaries, 16
  - End of Chapter Review Questions, 16
  - Keywords, 16
  - Keywords List and Glossary, 16
  - Recommended Readings, 17
- Section Summary Points, 17
- Chapter Review Questions, 17
- Keywords, 18
- Recommended Readings, 18

**2 VISUAL AND AUDITORY RECOGNITION 19**

- Chapter Introduction, 19
- Overview of Visual Object Recognition, 20
  - The Visual System, 20
  - Organization in Visual Perception, 22
  - Theories of Visual Object Recognition, 23
    - Feature-Analysis Theory, 23
    - The Recognition-by-Components Theory, 25
- Top-Down Processing and Visual Object Recognition, 28
  - Bottom-Up Versus Top-Down Processing, 28
  - Top-Down Processing and Reading, 29
  - “Smart Mistakes” in Object Recognition, 30
    - Change Blindness, 30
    - Inattentional Blindness, 32
- Specialized Visual Recognition Processes, 33
  - Neuroscience Research on Face Recognition, 33
  - Applied Research on Face Recognition, 34
- Speech Perception, 36
  - Characteristics of Speech Perception, 37
    - Word Boundaries, 37
    - Variability in Phoneme Pronunciation, 37
    - Context and Speech Perception, 38
    - Visual Cues as an Aid to Speech Perception, 38
  - Theories of Speech Perception, 39
    - The Special Mechanism Approach, 39
    - The General Mechanism Approaches, 40
- Section Summary Points, 40
- Chapter Review Questions, 41
- Keywords, 42
- Recommended Readings, 42

**3 ATTENTION AND CONSCIOUSNESS 43**

- Chapter Introduction, 43
- Overview of Attention, 44
  - Divided Attention, 44
  - Selective Attention, 45
    - Dichotic Listening, 45
    - The Stroop Effect, 46
    - Visual Search, 48
- Neuroscience of Attention, 50
  - The Orienting Attention Network, 50
  - The Executive Attention Network, 52
- Theories of Attention, 52
  - Early Theories of Attention, 52
  - Feature-Integration Theory, 53
- Consciousness, 55
  - Thought Suppression, 56
  - Blindsight, 57
  - Mindfulness Meditation, 57
- Section Summary Points, 58

Chapter Review Questions, 59  
 Keywords, 59  
 Recommended Readings, 60

#### 4 WORKING MEMORY 61

Chapter Introduction, 61  
 Classical Research on Short-Term Memory, 62  
   Short-Term Memory Capacity Limits, 62  
     The Brown/Peterson & Peterson Technique, 63  
     The Serial-Position Effect, 63  
     Semantic Similarity of the Items in Short-Term Memory, 65  
 Atkinson–Shiffrin Model of Information Processing, 66  
 The Turn to Working Memory, 67  
   Evidence for Components with Independent Capacities, 69  
   Phonological Loop, 69  
     Neuroscience Research on the Phonological Loop, 70  
   Visuospatial Sketchpad, 71  
     Research on the Visuospatial Sketchpad, 72  
     Neuroscience Research on the Visuospatial Sketchpad, 72  
   Central Executive, 73  
     Characteristics of the Central Executive, 73  
     The Central Executive and Daydreaming, 73  
     Neuroscience Research on the Central Executive, 74  
     Recent Views of the Central Executive, 74  
   Episodic Buffer, 75  
 Applications of Working Memory, 76  
   Working Memory and Academic Performance, 76  
   Working Memory Abilities in Clinical Populations, 77  
     Working Memory and Major Depression, 77  
     Working Memory and ADHD, 78  
     Working Memory and Generalized Anxiety Disorder, 79  
   Summary, 79  
 Section Summary Points, 79  
 Chapter Review Questions, 80  
 Keywords, 81  
 Recommended Readings, 81

#### 5 LONG-TERM MEMORY 82

Chapter Introduction, 82  
 Overview of Long-Term Memory, 83  
 Encoding in Long-Term Memory, 83  
   Levels of Processing, 84  
     Levels of Processing and Memory for General Material, 84  
     Levels of Processing and the Self-Reference Effect, 85  
   Encoding-Specificity Principle, 86  
     Research on Encoding Specificity, 86  
     Levels of Processing and Encoding Specificity, 87  
   Emotions, Mood, and Memory, 88  
 Retrieval in Long-Term Memory, 90  
   Explicit Versus Implicit Memory Tasks, 90  
     Anxiety Disorders and Explicit and Implicit Memory Tasks, 92

Individuals with Amnesia,	92
Expertise,	93
The Context-Specific Nature of Expertise,	94
How Do Experts and Novices Differ?,	94
Autobiographical Memory,	95
Schemas and Autobiographical Memory,	95
Source Monitoring and Reality Monitoring,	96
Flashbulb Memories,	97
Eyewitness Testimony,	98
Example of Inappropriate Eyewitness Testimony,	98
The Post-Event Misinformation Effect,	99
Factors Affecting the Accuracy of Eyewitness Testimony,	100
The Relationship Between Memory Confidence and Memory Accuracy,	101
The Recovered-Memory/False-Memory Controversy,	101
The Two Contrasting Positions in the Controversy,	101
The Potential for Memory Errors,	102
Arguments for False Memory,	102
Arguments for Recovered Memory,	103
Both Perspectives Are At Least Partially Correct,	103
Section Summary Points,	104
Chapter Review Questions,	105
Keywords,	105
Recommended Readings,	105
<b>6 MEMORY STRATEGIES AND METACOGNITION</b>	<b>106</b>
Chapter Introduction,	106
Absentmindedness and Strategies for Avoiding It,	106
Memory Strategies Involving Practice and Mnemonics,	108
Memory Strategies Emphasizing Practice,	108
Distributed-Practice Effect,	109
Testing Effect,	109
Test Anxiety,	110
Mnemonics Using Imagery and Organization,	111
Imagery,	111
Organization,	112
Improving Prospective Memory,	114
Comparing Prospective and Retrospective Memory,	114
Absentmindedness and Prospective Memory Failures,	115
Suggestions for Improving Prospective Memory,	115
Metamemory,	116
Accuracy of Metamemory,	117
Estimating the Accuracy for Total Score Versus the Accuracy for Individual Items,	117
Estimating the Score Immediately Versus After a Delay,	118
Metamemory About Factors Affecting Memory Accuracy,	118
Metamemory and the Regulation of Study Strategies,	119
Allocating Time When the Task Is Easy,	119
Allocating Time When the Task Is Difficult,	119
Conclusions About the Regulation of Study Strategies,	119
Tip-of-the-Tongue and Feeling-of-Knowing Effects,	120
Tip-of-the-Tongue Effect,	120
Feeling of Knowing,	121

- Metacomprehension, 121
  - Metacomprehension Accuracy, 122
  - Improving Metacomprehension, 123
- Section Summary Points, 124
- Chapter Review Questions, 124
- Keywords, 125
- Recommended Readings, 125
- Answer to Demonstration 6.4, 125
- 7 MENTAL IMAGERY AND COGNITIVE MAPS 126**
  - Chapter Introduction, 126
  - Classical Research on Visual Imagery, 127
    - Overview of Mental Imagery, 127
    - Mental Rotation, 128
      - Subsequent Behavioral Research on Mental Rotation, 130
    - The Imagery Debate, 130
      - Cognitive Neuroscience Research on Visual Mental Imagery Tasks, 131
    - Visual Imagery and Ambiguous Figures, 132
      - Summary, 134
  - Factors That Influence Visual Imagery, 134
    - Distance and Shape Effects on Visual Imagery, 134
    - Visual Imagery and Interference, 135
    - Individual Differences in Mental Imagery, 136
      - Verbalizers versus Visualizers, 136
    - Gender Comparisons in Spatial Ability, 136
  - Auditory Imagery, 139
    - Auditory Imagery and Pitch, 139
    - Auditory Imagery and Timbre, 140
  - Cognitive Maps, 140
    - Distance and Shape Effects on Cognitive Maps, 142
      - Cognitive Maps and Shape, 144
    - Relative Position Effects on Cognitive Maps, 144
      - The Rotation Heuristic, 144
      - The Alignment Heuristic, 145
    - Creating a Cognitive Map, 146
      - The Spatial Framework Model, 146
      - The Situated Cognition Approach, 147
  - Section Summary Points, 148
  - Chapter Review Questions, 149
  - Keywords, 149
  - Recommended Readings, 149
- 8 GENERAL KNOWLEDGE 150**
  - Chapter Introduction, 150
  - Background and Approaches to Semantic Memory, 150
    - Background Information, 151
    - Prototype Approach, 152
      - Characteristics of Prototypes, 154
      - Levels of Categorization, 155
      - Conclusions About the Prototype Approach, 156
    - Exemplar Approach, 156
    - Comparing the Prototype and Exemplar Approaches, 158

Network Models, 158
The Collins and Loftus Network Model, 159
Anderson's ACT-R Approach, 160
The Parallel Distributed Processing Approach, 161
Schemas and Scripts, 165
Background on Schemas and Scripts, 166
Identifying the Script in Advance, 166
Memory Selection, 167
Boundary Extension, 168
Memory Abstraction, 169
The Constructive Approach, 169
The Pragmatic Approach, 171
The Current Status of Schemas and Memory Abstraction, 172
Memory Integration, 172
The Classic Research on Memory Integration, 172
Section Summary Points, 173
Chapter Review Questions, 173
Keywords, 174
Recommended Readings, 174
Answer to Demonstration 8.8, 174

## **9 LANGUAGE I: INTRODUCTION TO LANGUAGE AND LANGUAGE COMPREHENSION 175**

Chapter Introduction, 175
Overview of Psycholinguistics, 176
Background on Language, 176
Basic Facts About Human Language, 177
A Brief History of Psycholinguistics, 177
Chomsky's Approach, 178
Reactions to Chomsky's Theory, 178
Psycholinguistic Theories That Emphasize Meaning, 179
Sentence Comprehension, 180
Negation, 180
Syntactic Complexity, 180
Lexical and Syntactic Ambiguity, 182
Lexical Ambiguity, 182
Syntactic Ambiguity, 182
Good-Enough Processing, 184
Brain and Language, 185
General Considerations, 185
Aphasia, 185
Revisiting Broca's Area, 186
Hemispheric Specialization, 188
The Mirror System, 189
Reading, 190
Comparing Written and Spoken Language, 190
Eye Movements During Reading, 191
Reading Words: Theoretical Approaches, 192
The Direct-Access Route, 193
The Indirect-Access Route, 193
Implications for Teaching Reading to Children, 194

Section Summary Points, 196  
 Chapter Review Questions, 197  
 Keywords, 197  
 Recommended Readings, 197  
 Answer to Demonstration 9.1, 198

## 10 LANGUAGE II: LANGUAGE PRODUCTION AND BILINGUALISM 199

Chapter Introduction, 199  
 Language Production: Speaking, 200  
   Producing a Word, 200  
   Producing a Sentence, 202  
   Producing Discourse, 202  
   The Role of Gesture During Communication, 203  
 Language Production: Writing, 205  
   The Role of Working Memory in Writing, 206  
   Planning a Formal Writing Assignment, 207  
   Sentence Generation During Writing, 207  
   The Revision Phase of Writing, 208  
 Bilingualism and Second Language Learning, 208  
   Background on Bilingualism, 208  
   Advantages (and Minor Disadvantages) of Bilingualism, 210  
   Second Language Learning, 212  
     Vocabulary, 212  
     Phonology, 213  
     Grammar, 213  
   Simultaneous Interpreters, 214  
 Section Summary Points, 216  
 Chapter Review Questions, 216  
 Keywords, 217  
 Recommended Readings, 217

## 11 PROBLEM SOLVING AND CREATIVITY 218

Chapter Introduction, 218  
 Understanding the Problem, 219  
   Methods of Representing the Problem, 220  
     Symbols, 220  
     Matrices, 221  
     Diagrams, 221  
     Visual Images, 222  
   Perspectives on Problem Solving, 222  
     Situated Cognition, 223  
     Embodied Cognition, 223  
 Problem-Solving Strategies, 224  
   The Analogy Approach, 224  
   The Means-Ends Heuristic, 225  
   The Hill-Climbing Heuristic, 226  
 Factors That Influence Problem Solving, 227  
   Expertise, 227  
   Mental Set, 228  
   Functional Fixedness, 229  
   Gender Stereotypes and Math Problem Solving, 230

	Problem Type: Insight Versus Noninsight Problems,	231
	Metacognition During Problem Solving,	232
	Advice About Problem Solving,	232
	Creativity,	233
	The Nature of Creativity,	233
	Motivation and Creativity,	234
	Section Summary Points,	236
	Chapter Review Questions,	236
	Keywords,	237
	Recommended Readings,	237
	Answer to Demonstration 11.3,	237
	Answer to Demonstration 11.5,	237
	Answer to Demonstration 11.6B,	238
	Answer to Demonstration 11.7A,	238
	Answer to Demonstration 11.7B,	238
<b>12</b>	<b>DEDUCTIVE REASONING AND DECISION MAKING</b>	<b>239</b>
	Chapter Introduction,	239
	Deductive Reasoning,	240
	Overview of Conditional Reasoning,	240
	Factors That Cause Difficulty in Reasoning,	242
	Biases and Deductive Reasoning,	243
	Belief-Bias Effect,	243
	Confirmation Bias,	244
	Heuristics and Decision Making,	245
	Representativeness Heuristic,	246
	Sample Size and Representativeness,	247
	Base Rate and Representativeness,	247
	The Conjunction Fallacy and Representativeness,	248
	Availability Heuristic,	250
	Recency and Familiarity Effects,	250
	The Recognition Heuristic,	251
	Anchoring and Adjustment Heuristic,	251
	Research on the Anchoring and Adjustment Heuristic,	252
	Estimating Confidence Intervals,	253
	Current Status of Heuristics and Decision Making,	253
	Applications of Decision-Making Research,	254
	Framing Effect,	254
	The Wording of a Question and the Framing Effect,	255
	Overconfidence About Decisions,	256
	General Studies on Overconfidence,	256
	Overconfidence About Completing Projects on Time,	257
	Reasons for Overconfidence,	257
	Hindsight Bias,	258
	Explanations for the Hindsight Bias,	258
	Decision-Making Style and Psychological Well-Being,	259
	Section Summary Points,	260
	Chapter Review Questions,	261
	Keywords,	261

- Recommended Readings, 261
- Answer to Demonstration 12.1, 262
- Answer to Demonstration 12.6, 262

### 13 COGNITIVE DEVELOPMENT THROUGHOUT THE LIFESPAN 263

- Chapter Introduction, 263
- The Lifespan Development of Memory, 263
  - Memory in Infants, 264
  - Memory in Children, 266
    - Children's Working Memory, 267
    - Children's Long-Term Memory, 267
    - Children's Memory Strategies, 269
    - Children's Eyewitness Testimony, 271
    - Children's Intellectual Abilities and Eyewitness Testimony, 272
  - Memory in Older Adults, 273
    - Working Memory in Older Adults, 273
    - Long-Term Memory in Older Adults, 274
    - Explanations for Age Differences in Memory, 275
- The Lifespan Development of Metamemory, 276
  - Metamemory in Children, 276
    - Children's Understanding of How Memory Works, 276
    - Children's Awareness That Effort Is Necessary, 277
    - Children's Judgments About Their Memory Performance, 277
    - Children's Metamemory: The Relationship Between Metamemory and Memory Performance, 278
  - Metamemory in Older Adults, 279
    - Beliefs About Memory, 279
    - Memory Monitoring, 279
    - Awareness of Memory Problems, 280
- The Development of Language, 280
  - Language in Infants, 280
    - Speech Perception During Infancy, 281
    - Language Comprehension During Infancy, 281
    - Language Production During Infancy, 282
    - Adults' Language to Infants, 283
    - Can Infants Learn Language from a DVD?, 283
  - Language in Children, 284
    - Words, 284
    - Morphology, 285
    - Syntax, 286
- Section Summary Points, 286
- Chapter Review Questions, 287
- Keywords, 288
- Recommended Readings, 288
