<i>Preface</i>	<i>xi</i>
<i>About the Authors</i>	<i>xv</i>

## SECTION 1

### ***Taxonomic Classification of Medically Important Microorganisms*** **1**

General Comments	2
Taxonomic Classification of Bacteria	2
<b>Table 1.1</b> Reclassification of the Former Family <i>Enterobacteriaceae</i>	10
<b>Table 1.2</b> Newly Assigned Genera for Former <i>Mycobacterium</i>	11
<b>Table 1.3</b> <i>Enterobacter cloacae</i> Complex Organisms	12
<b>Table 1.4</b> <i>Klebsiella oxytoca</i> Complex Organisms	12
<b>Table 1.5</b> Taxonomy of <i>Citrobacter freundii</i> Complex	12
<b>Table 1.6</b> Taxonomy of <i>Pseudomonas fluorescens</i> Group Organisms	12
<b>Table 1.7</b> Taxonomy of <i>Pseudomonas putida</i> Group Organisms	13
<b>Table 1.8</b> Taxonomy of <i>Pseudomonas aeruginosa</i> Group Organisms	13
<b>Table 1.9</b> Taxonomy of <i>Acinetobacter calcoaceticus-baumannii</i> Complex	13
<b>Table 1.10</b> Taxonomy of <i>Burkholderia cepacia</i> Complex	13
<b>Table 1.11</b> Taxonomy of Mycobacteria	14
<b>Table 1.12</b> Taxonomy of the <i>Staphylococcus aureus</i> Complex	16
<b>Table 1.13</b> Taxonomy of the <i>Staphylococcus intermedius</i> Group	16
<b>Table 1.14</b> Taxonomy of the Viridans Group Streptococci	16
Taxonomic Classification of Human Viruses	17
Taxonomic Classification of Fungi	21
<b>Table 1.15</b> Revised Species Names of Selected Clinically Relevant Fungi	22
Taxonomic Classification of Parasites	25

**SECTION 2*****Indigenous and Pathogenic Microbes of Humans*** **31**

General Comments	32
<b>Table 2.1</b> Human Indigenous Flora	32
<b>Table 2.2</b> Summary of Notifiable Infectious Diseases: United States, 2016 and 2020	43
<b>Table 2.3</b> Arthropod Vectors of Medically Important Diseases	48
<b>Table 2.4</b> Fungal Pathogens and Geographic Distribution	51
<b>Table 2.5</b> Parasitic Pathogens and Geographic Distribution	62
Microbes Responsible for Human Disease	70

**SECTION 3*****Specimen Collection and Transport*** **93**

General Comments	94
<b>Table 3.1</b> Bacteriology: Collection and Transport Guidelines	96
<b>Table 3.2</b> Specimen Collection and Transport Guidelines for Infrequently Encountered Bacteria	114
<b>Table 3.3</b> Guidelines for Collection of Specimens for Anaerobic Culture	115
<b>Table 3.4</b> Possible Rejection Criteria for Specimens Submitted for Bacterial Culture	116
Virology: General Specimen Guidelines	117
Virology: Specific Specimen Guidelines	118
<b>Table 3.5</b> Recommended Blood Volumes to Collect for Blood Cultures	121
<b>Table 3.6</b> Mycology: Collection and Transport Guidelines	122
<b>Table 3.7</b> Parasitology: Specimen Guidelines	127
<b>Table 3.8</b> Guidelines for Processing Stool Specimens for Parasites	132

**SECTION 4*****Bacterial Diagnosis*** **135**

General Comments	136
<b>Table 4.1</b> Detection Methods from Clinical Specimens for Clinically Relevant Bacteria	136
<b>Table 4.2</b> Recommendations for Gram Stain from Primary Specimen and Plating Media	139
<b>Table 4.3</b> Screening Specimens for Routine Bacterial Culture	143
<b>Table 4.4</b> Processing Specimens for Mycobacterial Identification	144

Microscopy	144
Primary Plating Media: Bacteria	146
Primary Plating Media: Mycobacteria	159
Specific Diagnostic Tests for Pathogen Detection	161
Aerobic Gram-Positive Cocci	161
Aerobic Gram-Positive Rods	162
Acid-Fast and Partially Acid-Fast Gram-Positive Rods	164
Aerobic Gram-Negative Cocci	164
Aerobic Gram-Negative Rods	165
Anaerobic Bacteria	172
Curved and Spiral-Shaped Bacteria	173
<i>Mycoplasma</i> spp. and Obligate Intracellular Bacteria	176
Identification Tables	178

## **SECTION 5**

### ***Viral Diagnosis*** **217**

General Comments	218
<b>Table 5.1</b> Detection Methods for Viruses	218
<b>Table 5.2</b> Cells Used for Viral Isolation	220
RNA Viruses	221
DNA Viruses	229
<b>Table 5.3</b> EBV Serologic Profiles Under Different Conditions	231
<b>Table 5.4</b> Clinical Diseases of Parvovirus B19 and Method of Diagnosis	232
<b>Table 5.5</b> Hepatitis B Virus Markers in Different Stages of Infection and Convalescence	233
Transmissible Spongiform Encephalopathies	235

## **SECTION 6**

### ***Fungal Diagnosis*** **237**

Mycology: Specimen Collection and Transport Guidelines	238
<b>Table 6.1</b> Methods for the Identification of Fungi	240
Microscopy	240
<b>Table 6.2</b> Characteristic Fungal Elements Seen by Direct Examination of Clinical Specimens	243

Primary Plating Media	246
<b>Table 6.3</b> Mycology Plating Guide	249
Specific Diagnostic Tests	251
<i>Aspergillus</i> Species	251
<i>Blastomyces dermatitidis</i>	251
<i>Candida</i> Species	252
<i>Coccidioides</i> Species (Coccidioidomycosis)	252
<i>Cryptococcus neoformans</i> and <i>gattii</i> (Cryptococcosis)	253
<i>Histoplasma</i> Species	253
<i>Malassezia</i> Species	254
<i>Paracoccidioides brasiliensis</i>	254
<i>Talaromyces (Penicillium) marneffei</i>	255
<i>Pneumocystis jirovecii</i>	255
<i>Sporothrix schenckii</i>	255
Mucormycetes (Zygomycetes)	255
Identification Tables	257
<b>SECTION 7</b>	
<b><i>Parasitic Diagnosis</i></b>	<b>271</b>
General Comments	272
Microscopy	272
<b>Table 7.1</b> Detection Methods for Parasites	273
Specific Diagnostic Tests	277
Free-Living Amebae	277
Intestinal and Urogenital Protozoa	277
Blood and Tissue Protozoa	280
Microsporidia	282
Helminths: Nematodes	283
Helminths: Trematodes	285
Helminths: Cestodes	286
Identification Tables and Figures	287
<b>Table 7.2</b> Trophozoites of Common Intestinal Amebae	287
<b>Table 7.3</b> Cysts of Common Intestinal Amebae	290
<b>Figure 7.1</b> Intestinal Amebae of Humans	293
<b>Table 7.4</b> Trophozoites of Flagellates	294
<b>Table 7.5</b> Cysts of Flagellates	296

<b>Figure 7.2</b>	Intestinal and Urogenital Flagellates of Humans	297
<b>Table 7.6</b>	Morphological Characteristics of Ciliates, Coccidia, Microsporidia, and Tissue Protozoa	298
<b>Table 7.7</b>	Morphological Characteristics of Protozoa Found in Blood	300
<b>Table 7.8</b>	Morphological Characteristics of Blood and Tissue Nematodes	302
<b>Table 7.9</b>	Morphological Characteristics of Helminths	303
<b>Figure 7.3</b>	Relative Sizes of Helminth Eggs	305

## SECTION 8

### ***Susceptibility Testing and Methods of Organism Identification*** 307

General Comments	308
Susceptibility Testing Methods	308
<b>Table 8.1</b>	Clinical and Laboratory Standards Institute (CLSI) Documents Related to Antimicrobial Susceptibility Testing from Humans 308
<b>Table 8.2</b>	Summary of CLSI Antimicrobial Susceptibility Test Methods for Select Bacteria, Mycobacteria, and Fungi 311
Antimicrobial Treatment Information	315
<b>Table 8.3</b>	Organisms Included in CLSI and EUCAST Breakpoint Tables 315
<b>Table 8.4</b>	Guide to Interpretive Criteria for Select Organisms for Commonly Tested Antimicrobials 317
<b>Table 8.5</b>	Surrogate Antibiotic Susceptibility Prediction 330
<b>Table 8.6</b>	Routes of Administration and Drug Class for Select Antimicrobial Agents 334
<b>Table 8.7</b>	Routes of Administration and Drug Class for Select Antifungal Agents 337
<b>Table 8.8</b>	Routes of Administration and Drug Class for Select Antiparasitic Agents 338
<b>Table 8.9</b>	Antibacterial Agents for Specific Bacteria 339
Antimicrobial Resistance Mechanisms	345
<b>Table 8.10</b>	Intrinsic Resistance of Selected Gram-Negative Bacteria 345
<b>Table 8.11</b>	Intrinsic Resistance of Selected Gram-Positive Bacteria 346
<b>Table 8.12</b>	Important Mechanisms of Multidrug Resistance in Bacteria 346

<b>Table 8.13</b>	Activity Profiles of Select Beta-Lactam Antibiotics Against Commonly Encountered Gram-Negative Beta-Lactamases	350
	MALDI-TOF MS and Sequencing	351
<b>Table 8.14</b>	Summary of MALDI-TOF MS Identification of Bacteria, Mycobacteria, and Fungi	351
<b>Table 8.15</b>	Gene Sequencing Targets for Organism Identification	356
	<i>Index</i>	359
