Adams Spectral Sequences and Franke's Algebraicity Conjecture

Irakli Patchkoria
Piotr Pstrągowski

May 2026 • Volume 321 • Number 1636 (third of 6 numbers)

Contents

Chapter 1. Introduction	1
1.1. Adams spectral sequences	3
1.2. Derived ∞ -categories and Goerss-Hopkins theory	5
1.3. Further applications	7
1.4. Summary of contents	8
1.5. Background on algebraicity results in stable homotopy theory	9
1.6. Conventions	12
Acknowledgments	13
Chapter 2. Homology theories and Adams spectral sequences	15
2.1. Homological functors	15
2.2. Adams spectral sequence and adaptedness	16
2.3. Recollections on the Freyd envelope	20
2.4. Characterization of adapted homology theories	25
Chapter 3. Classification of Adams spectral sequences	27
3.1. Epimorphism classes and Miller's Adams spectral sequence	27
3.2. Adams spectral sequence and adapted homology theories	31
3.3. Digression: Adapted factorization	35
Chapter 4. Prestable Freyd envelope	37
4.1. Almost perfect presheaves	37
4.2. Perfect presheaves	41
4.3. Prestable enhancements to a homological functor	46
4.4. Thread structure on the prestable Freyd envelope	51
Chapter 5. Derived ∞ -categories	57
5.1. Bounded derived ∞ -category of an abelian category as sheaves	57
5.2. Perfect derived ∞ -category of a stable ∞ -category	61
5.3. Homology adjunction and the thread structure	68
5.4. Postnikov towers and Adams filtrations	70
5.5. Digression: Monoidality of the Adams filtration	75
Chapter 6. Further topics in derived ∞ -categories	81
6.1. Completing derived ∞ -categories	81
6.2. Digression: Hypercompletion and locality	85
6.3. Goerss-Hopkins theory	87
6.4. Digression: The Grothendieck abelian case	94
6.5. The case of modules and synthetic spectra	101
Chapter 7. Franke's algebraicity conjecture	107

7.1. The algebraic model	107
7.2. Splittings of abelian categories and the Bousfield functor	109
7.3. Bousfield adjunction	111
7.4. The truncated thread monad	114
7.5. Proof of Franke's conjecture	120
Chapter 8. Applications of the conjecture	125
8.1. Modules over ring spectra	125
8.2. Chromatic algebraicity	128
8.3. Diagram ∞ -categories	129
Appendix A. Comodules and quotients of abelian categories	135
Bibliography	137
