Toroidal Embeddings I

Springer-Verlag
Berlin . Heidelberg . New York 1973

Table of Contents

Chapter I: Equivariant Embeddings of Tori 1

§ 1. B.SAINT-DONAT: Affine Embeddings 1
§ 2. B.SAINT-DONAT: General Embeddings. 20
§ 3. G.KEMPF: Cohomology and Convexity. 41

Chapter II: Semi-Stable Reduction 53
by D.MUMFORD

§ 1. Toroidal Embeddings - Definitions. 54
§ 2. Toroidal Embeddings - Theorems 73
§ 3. Reduction of the Theorem to a Construction 98

Chapter III: Construction of Nice Polyhedral Subdivisions . . 109
by F.KNUDSEN

§ 1. Definitions and Projective Subdivisions. 110
§ 2. Some Examples of Projective Subdivisions 117
§ 3. Waterman Points. 155
§ 4. Statement and Proof of the Main Theorem. 161

Chapter IV: Further Applications. 165
by D.MUMFORD

§ 1. Actions of T^{n-1} on X^n. 165
§ 2. Tits' Buildings. 177
§ 3. Extensions to Schemes over R 190
