

# Contents

<b>1</b>	<b>Introduction</b> .....	1
1.1	The Beltrami Equation .....	1
1.2	Historical Remarks .....	2
1.3	Applications of Beltrami Equations .....	3
1.4	Classification of Beltrami Equations .....	3
1.5	ACL Solutions .....	3
1.6	Ellipticity of the Beltrami Equation .....	4
<b>2</b>	<b>Preliminaries</b> .....	5
2.1	BMO Functions in $\mathbb{C}$ .....	5
2.2	BMO Functions in $\overline{\mathbb{C}}$ .....	6
2.2.1	Removability of Isolated Singularities of BMO Functions .....	8
2.2.2	BMO Functions, qc Mappings, qc Arc, and Symmetric Extensions .....	8
2.3	FMO Functions .....	9
2.3.1	Examples of Functions $\varphi \in FMO \setminus BMO_{loc}$ .....	11
2.4	On Sobolev's Classes .....	13
2.5	Modulus and Capacity .....	19
2.6	Convergence Theorems for Homeomorphisms .....	26
2.7	Ring $\mathcal{Q}$ -Homeomorphisms at Inner Points .....	31
2.8	On Some Equivalent Integral Conditions .....	34
2.9	One More Integral Condition .....	38
2.10	On Weakly Flat and Strongly Accessible Boundaries .....	42
<b>3</b>	<b>The Classical Beltrami Equation <math>\ \mu\ _\infty &lt; 1</math></b> .....	47
3.1	Quasiconformal Mappings .....	47
3.2	The Main Problems .....	48
3.3	Integrability .....	48
3.4	The Classical Existence and Uniqueness Theorem .....	49

3.5	Methods of Proof of Uniqueness and Existence .....	50
3.5.1	Uniqueness .....	50
3.5.2	Existence .....	50
3.5.3	Smoothness of the Solutions .....	53
3.5.4	Analytic Dependence on Parameters .....	53
<b>4</b>	<b>The Degenerate Case .....</b>	<b>55</b>
4.1	Examples .....	55
4.1.1	Example One .....	55
4.1.2	Example Two .....	56
4.2	The Singular Set .....	57
4.3	Auxiliary Results .....	57
4.4	Case (i): The Singular Set $E$ is Specified and $E \subset \partial D$ .....	63
4.4.1	Existence and Uniqueness .....	63
4.4.2	Boundary Behavior .....	63
4.4.3	Proof of Theorem 4.1 .....	65
4.4.4	Proof of Theorem 4.2 .....	65
4.4.5	Examples .....	66
4.5	Case (ii): The Singular Set $E$ is Specified and $E \subset D$ .....	69
4.6	Case (iii): The Singular Set $E$ Is Not Specified .....	70
4.6.1	Pesin .....	71
4.6.2	Miklyukov and Suvorov .....	71
4.6.3	Lehto .....	72
4.6.4	Brakalova and Jenkins .....	72
4.6.5	Iwaniec and Martin .....	73
4.6.6	Gutlyanskii, Martio, Sugawa, and Vuorinen .....	74
4.6.7	David .....	75
4.6.8	Tukia .....	75
4.6.9	Ryazanov, Srebro and Yakubov .....	76
4.7	Modulus Inequalities .....	76
<b>5</b>	<b>BMO- and FMO-Quasiconformal Mappings .....</b>	<b>77</b>
5.1	Introduction .....	77
5.2	Inclusions, Integrability, and Group Properties .....	79
5.3	Distortion Lemmas .....	82
5.4	One Existence Theorem .....	84
5.5	Uniqueness and Approximation .....	85
5.5.1	Good Approximation .....	85
5.6	Other Properties .....	86
5.7	The Main Lemma on FMO .....	89
5.8	Estimate of Distortion .....	91
5.9	Further Existence Theorems .....	93
<b>6</b>	<b>Ring <math>Q</math>-Homeomorphisms at Boundary Points .....</b>	<b>97</b>
6.1	Introduction .....	97
6.2	Examples and Properties .....	100

6.3	The Completeness of Ring Homeomorphisms.....	103
6.4	One Integral Inequality.....	105
6.5	Distortion Estimates.....	107
6.6	On Removability of Isolated Singularities.....	114
6.7	On Extending Inverse Mappings to the Boundary.....	118
6.8	On Extending Direct Mappings to the Boundary.....	119
6.9	Consequences for Quasixtremal Distance Domains.....	123
6.10	On Singular Null Sets for Extremal Distances.....	127
<b>7</b>	<b>Strong Ring Solutions of Beltrami Equations.....</b>	<b>129</b>
7.1	Introduction.....	129
7.2	General Existence Lemma and Corollaries.....	130
7.3	Extension of Lehto's Existence Theorem.....	133
7.4	Sufficient Integral Conditions for Solvability.....	135
7.5	Necessary Integral Conditions for Solvability.....	139
7.6	Representation, Factorization, and Uniqueness Theorems.....	142
7.7	Historical Comments and Final Remarks.....	146
<b>8</b>	<b>On the Dirichlet Problem for Beltrami Equations.....</b>	<b>153</b>
8.1	Introduction.....	153
8.2	Characterization of Ring $\mathcal{Q}$ -Homeomorphisms at the Boundary... ..	154
8.3	The Regular Homeomorphisms.....	157
8.4	On Extension of Regular Homeomorphisms to the Boundary.....	159
8.5	Existence Theorems for the Dirichlet Problem.....	162
8.6	Examples of the Dirichlet Problem.....	165
8.7	On Integral Conditions in the Dirichlet Problem.....	168
<b>9</b>	<b>On the Beltrami Equations with Two Characteristics.....</b>	<b>171</b>
9.1	Introduction.....	171
9.2	One Convergence Theorem.....	172
9.3	The Main Lemma.....	174
9.4	Some Existence Theorems.....	176
9.5	Consequences for the Reduced Beltrami Equations.....	178
9.6	Existence Theorems with Integral Conditions.....	180
<b>10</b>	<b>Alternating Beltrami Equation.....</b>	<b>183</b>
10.1	Introduction.....	183
10.1.1	The Geometric Configuration and the Conditions on $\mu$ .....	183
10.1.2	A Symmetric Form of the Alternating Beltrami Equation.....	184
10.1.3	Branched Folded Maps.....	185
10.1.4	Definition of BF-Maps.....	185
10.1.5	Discrete Maps, Canonical Maps, and Classification of Critical Points.....	186
10.1.6	Branch Points, Power Maps, and Winding Maps.....	186

10.1.7	Folding Maps .....	186
10.1.8	$(\mathbf{p}, \mathbf{q})$ -Cusp Maps and $(\mathbf{p}, \mathbf{q})$ -Cusp Points .....	187
10.1.9	Umbrella and Simple Umbrella Maps .....	187
10.2	Branched Folded Maps .....	188
10.2.1	BF-Maps Which Are Locally Different from the Canonical Maps .....	193
10.2.2	Discrete Maps Which Are Not BF-Maps .....	193
10.2.3	The Degree of a BF-Map and Prime BF-Maps .....	194
10.3	Alternating Beltrami Equations and FQR-Maps .....	196
10.3.1	Proper Folding, Cusp, and Umbrella Solutions .....	196
10.3.2	Example .....	199
10.3.3	Definition .....	202
10.4	Existence of Local Folding Solutions .....	204
10.4.1	Assumptions on the Equation and Geometric Configuration .....	204
10.4.2	Uniformization and Folds .....	207
10.4.3	Example .....	207
<b>A</b>	<b>Archives of the Existence Theorems</b> .....	209
A.1	The Existence Theorems of Brakalova–Jenkins .....	209
A.1.1	Introduction .....	209
A.1.2	Statements of the Main Results .....	211
A.1.3	Construction of the Function $\mathbf{f}(\mathbf{z})$ .....	212
A.1.4	$\mathbf{f}(\mathbf{z})$ Is a Homeomorphism .....	216
A.1.5	Differentiability Properties of $\mathbf{f}(\mathbf{z})$ .....	218
A.1.6	The Limit Function Satisfies the Beltrami Equation .....	222
A.1.7	The Inverse Function $\mathbf{g}(\mathbf{w})$ of $\mathbf{f}(\mathbf{z})$ .....	224
A.1.8	Proof of the Main Results .....	227
A.1.9	Examples and Comparisons .....	229
A.1.10	Formulations of New Existence Theorems .....	233
A.1.11	Auxiliary Results and an Equivalent Statement .....	234
A.1.12	Construction of a Solution .....	235
A.1.13	The Solution Is a Homeomorphism .....	237
A.1.14	Differentiability Properties of the Solution .....	237
A.1.15	The Inverse Mapping .....	238
A.1.16	The Case of the Whole Plane .....	238
A.2	The Existence Theorems of Gutlyanski–Martio– Sugawa–Vuorinen .....	238
A.2.1	Introduction .....	238
A.2.2	Sequences of Self-Homeomorphisms .....	241
A.2.3	Existence Theorems .....	251
A.2.4	Uniqueness .....	259
A.2.5	Dominating Factors and Modulus Bounds .....	262

A.3	The Existence and Uniqueness Theorems of Martio–Miklyukov..	267
A.3.1	Introduction and Main Results.....	267
A.3.2	Proof of Theorem A.14 .....	268
A.3.3	Proof of Theorem A.13 .....	275
A.4	The Existence Theorems of Miklyukov–Suvorov .....	275
A.4.1	Notations .....	275
A.4.2	The main result .....	276
A.4.3	The main lemma .....	277
A.4.4	Proof of Theorem A.15 .....	278
A.4.5	One more theorem .....	279
A.4.6	The final conclusions .....	281
A.5	One Example of Iwaniec–Martin .....	282
