PREFACE	6
CHAPTER I	
CONSTRUCTING THE FRONT ELEVATION OF A FIGURE SIMILAR TO A PREASSIGNED FIGURE GIVEN ITS PLAN VIEW	11
1.1. Introduction	11
1.2. Constructing the front elevation of a circle from its plan	14
1.3. Determining the position of a plane containing a triangle	20
1.4. Constructing the conjugate semidiameters of an ellipse	22
1.5. Constructing the front elevation of a triangle	26
1.6. Constructing the front elevation of a parallelogram given its parameters and plan	31
1.7. Constructing the front elevation of a trapezoid similar to any preas- signed congener trapezoid from its plan	36
1.8. Constructing the front elevation of a curve similar to any preassigned congener curve from its plan	45
CHAPTER II	
CONSTRUCTING THE VIEWS OF PLANE FIGURES GIVEN THEIR TRUE SIZES AND THE PLAN VIEWS OF ANY HOMOTHETIC FIGURES	51
2.1. Constructing the views of a triangle	51
2.2. Constructing the views of a square	54
2.3. Constructing the views of a rectangle	56
2.4. Constructing the views of a rhombus	58
2.5. Constructing the views of a trapezoid	60
2.6. Constructing the views of a polygon	62
2.7. Constructing the views of a curvilinear figure	62
2.8. Constructing the views of a figure of the most general type	71
CHAPTER III	
CONSTRUCTING THE SECTIONS OF PRISMS, CYLINDERS AND TRIANGULAR PYRAMIDS BY PLANES GIVING IN THE SECTION FIGURES SIMILAR TO SOME PREASSIGNED ONES	76
3.1. Constructing sections of a triangular prism	78
3.2. Constructing sections of a quadrangular parallelepiped	80

3.3. Constructing sections of a trapezoidal prism	8
3.4. Constructing sections of a triangular pyramid	8
3.5. Constructing sections of a cylinder	9

CHAPTER IV

CONSTRUCTING A PLANE ONTO WHICH A GIVEN PLANE FIGURE CAN BE PROJECTED ORTHOGONALLY OR IN ANY GIVEN DIRECTION AS A FIGURE SIMILAR TO A PREASSIGNED ONE	9
4.1. A first way of solving the problems of Chapter 4	9
4.2. A second way of solving the problems of Chapter 4	12
4.3. Constructing a plane onto which a given triangle can be projected orthogonally as an equilateral triangle	13 [^]
4.4. A third way of solving the problems of Chapter 4	14
4.5. Constructing a plane onto which a plane curvilinear figure can be projected orthogonally as a figure similar to a preassigned one . . .	14 ^l
4.6. Constructing a plane onto which a given plane figure can be projected in any given direction as a figure similar to a preassigned one . . .	14 ^k
4.7. A second way of constructing plane sections of prisms	15 ^l
4.8. A second way of constructing sections of cylinders	15 ^l
CONCLUSION	16 ^l
BIBLIOGRAPHY	16 ^l
